# Gasoline For Every Motor Car

**D**URING June, 1922, 271 thousand automobiles and trucks were produced as against 180 thousand cars in June, 1921, and 256 thousand cars in May, 1922. This is a new high record.

The estimated increase for 1922 in automobile registration for the 10 states served by the Standard Oil Company (Indiana) is 500,000, making a probable registration for this territory of 3,850,000 automobiles and trucks besides a largely increased number of tractors.

This means that the already enormous demand for petroleum products will be materially increased. To meet this demand requires unremitting effort on the part of the Standard Oil Company (Indiana).

When you look down the street and see the curb lined with automobiles, parked so closely that you have difficulty in finding space for your car, multiply what you see by hundreds of streets in hundreds of towns all over the Middle West and you will have a faint conception of the problem confronting the petroleum industry.

Next consider that the Standard Oil Company (Indiana) is performing without a hitch a large part of the job of supplying this multitude of machines with fuel. This is made possible by superb organization and by keen appreciation of human values in business.

The same spirit of progressiveness which is applied to refining methods, machinery, stills, storage depots, and to distributing units is also applied to the personnel of 26 thousand men and women all interested in carrying out the Company's policy of serving the public well.
