HON. SAM S. WRIGHT OF TIPTON AT BLOOMFIELD SATURDAY AFTERNOON.

Democratic Speaker Faced Audience of Only About Fifty of the Unterrified of Davis County at Opening of His Address—Bloomfield News.

Bloomfield, Oct. 26.—The second democratic speech of the campaign was delivered at the court house Saturday afternoon by Hon. Sam S. Wright of Tipton. The meeting must have been a disappointment to those who arranged for the same, for when Mr. Wright began his address there were less than fifty persons assembled to hear him. During the progress of the speech the number increased to probably one hundred persons. Hon. W. H. Taylor of this city acted as chairman of the meeting, and in his usual felicitous manner introduced Hon. L. L. Taylor of Appanoose county, democratic candidate for senator from the Appanoose-Davis district, who responded briefly and who was followed by an address by Mr. Wright. Mr. Wright assailed the republican party upon the questions of taxation and tariff, and failed to arouse any great amount of enthusiasm.

arrived home about a week ago from a two months' visit with Mr. and Mrs. Neis Chilberg of Seattle, Wash. It will be remembered that Mr. and Mrs. Chilberg visited here last June this being their old home about thirty years ago. Mrs. Pierson says the climate of that part of Washington is perfect, being tempered by the Pacific ocean breezes so that it does not become uncomfortably warm during the day and very cool and refreshing during the nights. She also visited the farming country near Seattle, and says that it is certainly impossible for land to be more fertile any place than there. SOCIALIST SPEAKS

ADDRESS BY JOHN M. WORK OF DES MOINES.

ADVOCATES ABOLITION OF CAPITAL

The Introduction of Socialism and Public Ownership and Popular Management of Public Industries, Solution for Emancipation of Laboring Men.

From Saturday's Daily. "The abolition of capital and the introduction of socialism is the only possible solution of the emancipation of the laboring man," declared John M. Work of Des Moines, candidate for governor of the state of Iowa upon the socialist ticket at a meeting held last evening in the Woodmen hall in the Taylor building. There was a good sized audience in attendance and close attention was given to the speaker. Mr. Work speaks in a peculiarly quiet and effective manner. There is no attempt to make a display of oratory or to win applause from his audience by a special burst of eloquence in language or thought. Granting the premises from which he starts, he makes a closely thought out and argumentative presentation of his subject.

The address was in part as follows: "Every product is saturated with human labor. The lead pencil which I use may have been made by an unskilled laborer and it may have taken him a long time to make it. Again, it may have been made by a skilled laborer who worked more rapidly and did it in half the time. The value of a lead pencil is fixed by the average amount of time that it takes the makers of the pencils to make each individual one. The value of every other product of human labor is fixed in the same way by the average amount of human labor which it takes to produce it. The laborer is entitled to the full value of the product which he produces and yet the great working class do not receive by at least one-half, the value of the product which it produces. To obtain for the laborer this full value is the purpose of the socialist party.

"When a laboring man goes to a capitalist to secure a job, the capitalist says to him not in words but he virtually says it, nevertheless; in one or two hours the profit on what you produce will pay me for what I pay you. In one hour more the profit you produce will pay for the cost of the raw goods which you will use all day. All the rest of the day you will work and produce for me for absolutely nothing. This profit is mine not because I have any good reason or argument for making it mine, but because I have you at my mercy and in my power."

"There is a fiction in this country that all men are free. The only freedom that is guaranteed the workingman is freedom from money. The capitalist says, 'This is my factory. I own the raw material, the tools and the building. You have the freedom of working for me or not as you choose. The only condition upon which you may work for me, however, is that you will give me three or four hours of your time absolutely for nothing. If you don't want to work for me you do not have to, but I am sure you will just as soon as you get gone and hungry.' "Every working man is a slave to capital, bound with a ball and chain. There is but one day in the year when he is a free man and that is election day. Upon that day he seizes the key to his freedom, unlocks the door, puts on a heavier ball and chain and locks up the door again.

"The time is at hand when the working man will emancipate himself. Here the public ownership and popular management of public industries. This is the only possible means of emancipation. Every year thousands of workmen and their families starve. Other thousands are starved half the time, others are hungry all the time. "Trades unionism has done great work for the laboring people of the world by drawing the diffused and isolated workmen together and it has taught them that their interests are mutual and that they must stand together. The one great gain has been in shorter hours of labor and more time for self improvement and education. It has given an increase in wages, but capital has at once put up the price of the necessities of life, thereby nullifying the advantage gained in the advance in wages. There is no possible emancipation for the laboring man except by the abolition of capital and the introduction of socialism."

THE CAUSE OF CONSUMPTION

Ninety-five Per Cent Comes from Neglected Catarrh

Catarrh is Curable, Consumption is Not

Dr. Guthrie, the Ear, Nose and Throat Specialist, Permanently Located in the Telephone Building, Guarantees to Cure Every Case of Catarrh by His New Method. Examination Free.

Each week of Dr. Guthrie's residence in Ottumwa adds to his popularity, and he is now receiving cases from all parts of the country. Hundreds of people have visited him and been cured of disease that their home doctors had given up years ago and pronounced them incurable. It is true that Dr. Guthrie has had patients call whom he could not benefit, but in each and every case he promptly told them that he could not, and no charge was made. His examinations are absolutely free, and in no case does he accept a patient whom he knows he cannot benefit.

There is probably not another doctor in this country who has had greater success with catarrh than Dr. Guthrie. During his ten years' experience as a specialist he has never found a case but what he could benefit in a few treatments and cure in time. His method is entirely new and is only known to the most advanced men in medicine.

Ninety-five per cent of all consumption is caused by catarrh. The disease extends down the windpipe into the bronchial tubes, and in a short time attacks the lungs. Remember that catarrh is curable while consumption is not. Don't wait until it is too late, but come and see me at once.

Pause one moment and think whether you are troubled with any of the following, which are sure symptoms of catarrh that causes consumption:

- Have you a cough?
- Are you losing flesh?
- Do you cough at night?
- Have you a pain in side?
- Do you take cold easily?
- Is your appetite variable?
- Have you stitches in your side?
- Do you cough until you gag?
- Are you low spirited at times?
- Do you raise frothy material?
- Do you spit up yellow matter?
- Do you cough on going to bed?
- Do you cough in the mornings?
- Is your cough short and hacking?
- Do you spit up little cheesy lumps?
- Have you a disgust for fatty foods?
- Is there a tickling beneath the palate?
- Have you pain behind the breast bone?
- Do you feel you are growing weaker?
- Is there a burning pain in the throat?
- Do you cough worse at night and morning?
- Do you have to sit up at night to get breath?

DEAFNESS AND EAR TROUBLES

- Is your hearing failing?
- Do your ears discharge?
- Is the wax dry in the ears?
- Do the ears itch and burn?
- Are the ears dry and scaly?
- Have you pain behind the ears?

Is there a throbbing in ears? Is there a buzzing sound heard? Are you gradually getting deaf? Is your hearing bad cloudy days? Are there cracking sounds heard? Do you have ringing in the ears? Do you have earache occasionally? Are these sounds like steam escaping?

Do the noises in the ears keep you awake? Do you constantly hear noises in the ears?

Superior Advantages

I have been able to formulate, develop and perfect a system of treatment based upon true natural and physiological laws which today are recognized as the best the world has ever known.

My treatment is more successful than any known method or system. Why?

There is no guess work, no experiments. A thorough, accurate and complete knowledge of each case is obtained. Special remedies and medicines are prescribed and compounded in my own private laboratory under my direct supervision, to meet the individual requirements of each case.

Each patient is under my immediate watchful care and attention during the entire course of treatment until cured.

My treatment embraces both local and constitutional or internal remedies and medicines, the only plan by which chronic diseases, especially of a catarrhal origin or character, can be effectually cured.

Nervous Debility and Varicocele

My remedies go right to the points and restore and remove all effects of early mistakes, all wear and tear of the body. It acts on the brain and spinal cord and CURES TO STAY CURED. I do not make these claims without having proof to substantiate my assertion. Hundreds of men right here in this city are willing to tell you what I have done for them.

Can you afford to further experiment by using suspensories, electric belts, supporters and developers? You must realize from your own experience that they will fail to cure you, and in the end your money will go for naught not counting the misery you have gone through.

Under no circumstances allow anyone to lead you to believe that you can be cured by the use of mechanical appliances of any description. It is absolutely impossible, and no one knows it better than the man who sells you the appliance.

In curing you of Varicocele, etc., I completely remove all the various nervous conditions which usually attend those diseases, such as neurasthenia, prostration and many other weaknesses.

If you are a critical observer, you will notice the very minute you step into my office that I "know my business," as the saying goes—the examination—the painstaking detail by which it is made, and the manner in which everything is made plain to you will beget the confidence that experts deserve. Your own instinct will instantly tell you that I can make you a man among men.
