Operations Should Be Last Resort

Gall stones and appendicitis can be cured without an operation. Nature did not create organs in the human body to be removed by man. Years ago Dr. Strickler found that eight out of every ten operations performed were unnecessary and now continues to be so. These conditions and results caused him to enter the field against the knife. For many years and to the present time he advises a careful examination by some specialist who could be relied upon, before submitting to the surgeon's knife. In his practice as a specialist he has found that a great many cases that have been operated upon for appendicitis, which gave no relief and afterwards turned out to be Gallstones, Bowel Troubles, Liver or Stomach Troubles, could have been avoided. This is a useless expenditure of time and money, to say nothing of the suffering they had to endure, and the risk they run of not living through the operation. Dr. Strickler has cured many cases of this kind by his modern treatment, without the use of the knife. Medicines and full directions for cure sent direct to his patients. Consult Dr. Strickler before you submit to an operation. Write him today, or call on him. He does not treat incurable cases. Consultation and examination free. References given of cured cases.

MAKES LONG TRIP IN MOTOR CAR

FORMER IOWAN TRAVELING FROM CALIFORNIA TO ATLANTIC COAST.

Sioux City, June 16.—Dr. Wm. M. Roads, a former Sioux City man and large land owner in Woodbury county was in the city on his way to the Atlantic coast to spend the heated term. Mrs. Rhoads and their daughter are now at their old home in Cincinnati and will join the doctor for the summer. They preceded him from California. He is traveling in his motor car and has had an unique experience. Two weeks ago last Wednesday, May 24, he started from the junction of California and Mexico on the Pacific ocean and arrived in Sioux City yesterday morning.

"I've had a world of experience on this trip," said the doctor. "They had a rain in Nevada last winter some time and I had to drive my machine through cacti as high as the top of it. In a good many places it was tender enough to break off in some places, but in others for short distances we had to get out and clear a road through. We had to ford the Humboldt river, but we came through from the start in the same car and with no serious accidents. I expect to take the same car clear through to Long Island. But I have a real automobile machinist with me and he makes the stich in time that no doubt has made the long journey possible.

"Everywhere," said the doctor, "land speculation is the whole theme of conversation and everywhere it seems to me prices are pushed up beyond the safety point. It is all right back here in Iowa where you can raise corn and wheat and hogs worth \$9 a hundred or so, but it looks different to the west. And yet the fever there is rather higher than about here.
