DR. SPILMAN TELLS OF CAMP

OTTUMWA PHYSICIAN IN MERCEDES, TEXAS, WRITES PARAGRAPHS OF HIS WORK.

A letter from Dr. Harold A. Spilman, who is doing hospital duty on the Mexican border, written recently to his parents, Dr. and Mrs. S. A. Spilman, 125 East Maple avenue, is given below, and is an interesting resume of his work in the south. A clever pen drawing of their home in Mercedes, and another of the lay of land in the center of town activities, accompany the letter and give a very clear idea of the meagerness of comforts in camp, and the location of the hospital. Excerpts from the letter follow:

Mercedes, Tex., Nov. 3, 1916. Dear Father and Mother: Enjoyed your letters from Philadelphia and Ottumwa - also the papers you sent. I don't know whether I can answer all the questions you asked or not, but will try to remember them.

I have surely been kept busy, frequently having charge of one full ward in addition to my own, which means sixty-four patients. I will probably turn my ward over to some one else for a time this next week as I have been appointed camp recruiting officer for the regulars and there will be 800 or 1,000 men who will apply for discharge from their respective militia organizations to enlist in the regular army. I am to have my own office and a sergeant first class and a private first class to attend to the clerical work.

The order permitting men to be transferred to the regular army went into effect November 1 and I expect to start on the work Monday. I don't know just how rapidly they will start in but understand that there are twenty or thirty already on the waiting list on file in the camp adjutant's office, which means about one and a half or two days work for me. We are getting along fine down here, have two army cots, one camp chair, one old rocker (nearly defunct), a pine table made by the carpenter, one bench to match (and will have one more), a work table and shelves (kitchen), and a refrigerator. Also a closet space two feet by about five and a few shelves in it. Our plan is providing quite popular - there is one other nearing completion just to the north of us, and several others, three I think, already rented (yet to be started). I go out every morning at 7 o'clock in the ambulance, which comes in for the nurses and comes back in the evening at about 5 o'clock, except when I am officer of the day. I like the work very much and feel that I am benefiting by it.

I am having one of the laboratory assistants collect some good stained malarial slides which I will send you. While the locality leaves much to be desired, I really am better satisfied with the type of work I am doing than I ever have been. Of course it is very similar to a large hospital practice in civil life except that I have a lot of paper work to do in addition to the medical end of it. We are very happy here and meet quite a number of charming people, but would certainly like to see you all mightily. I will try to get time to write a sort of combination paper and letter some time this winter, but have too much on hand just at present to be able to get away with it satisfactorily. I'm too sleepy to write more. Love to all.

Harold A. Spilman.

PEOPLE'S PULPIT

Do not submit manuscripts with requests that they be returned if not used. The Courier will not return them.

Editor The Courier: We are told that we must be more thrifty in the future because the cost of living is increasing twice as fast as wages. This is equal to saying that the wages of the American workers, the real wages, the purchasing power of our wages, is decreasing.

Then we are informed that thrift doesn't mean to save but to get more for our money. (Imagine telling the grocer that you expect, hereafter, to get more flour or meat for your money than heretofore.)

The whole thing amounts to this. That as our real wages are becoming less we must adjust ourselves to them by living on a cheaper scale. Most investigators today agree with the "iron law of wages" first formulated by Ricardo, that wages in all countries tend to correspond with the cost of living.

In countries where wages are low, living is cheap and where wages are higher the cost of living is higher. This is the living wage we hear so much about.

Under our present system of industry with the control of prices in the hands of our great combinations of capital, it matters little whether the average wage is high or low because if we are able to force wages up they can simply raise the prices of the necessities of life and get it all back anyway.

Wages are simply money loaned to the workers Saturday night with the expectation that it will be back in the bank by Monday morning and if it doesn't up go prices till it does come back.

Of course as our real wages become less we will need to practice more thrift out of necessity, but the idea that by thrift and saving the condition of the working class will be permanently improved is illogical and founded upon a misunderstanding of the wage question.

Thrift or no thrift there is no relief in sight for the workers as long as those who operate the industries do so for the benefit of the owning class - for wages. The only hope of relief is in the collective ownership and management of the means of producing the means of life and all become producers so that no class will be able to live by the toil and sweat of another class.

How do you like the outlook, you working men who voted for Wilson or Hughes? Both the parties which these men represent believe that it is right and just that society should be organized as it is. Both believe in a living wage - and thrift.
