

**DR. F. E. BRINKMAN,**  
CHIROPRACTOR.

OFFICE HOURS: 10 a. m. to Noon, and 1 to 5:30 p. m.

I realize that it is sometimes very embarrassing for a lady to tell a physician about her troubles. For that reason I keep in attendance a lady at my office from 1 to 5:30 p. m. She assists (if desired) all ladies in getting ready for examinations; is present (if desired) while I am giving adjustments. The cause of all female diseases is in the spinal column (small of the back) and I find it is unnecessary to adjust other than the cause; for the removal of the cause always allows the diseased organs to resume their natural positions and functions. Hence I never require local examination and never give local treatment, and even so, there is no line of diseases with which I have more complete success than those which afflict womankind.

**UNCLE SAM'S WONDERS**

All Executive Departments Send Treasures to the World's Fair.

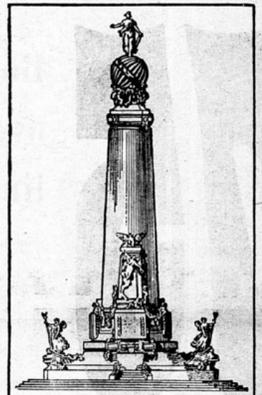

Display Installed in the Largest Governmental Exposition Building Ever Constructed—Precious Documents—Relics of Famous Statesmen and Soldiers. Working Postal Exhibit.

The United States Government building at the World's Fair occupies an elevated site just south of the main picture of the Exposition. The great central dome of the Government building is visible from the very center of the Fair, looking across the picturesque sunken garden that lies between the Palaces of Mines and Metallurgy and Liberal Arts.

The hill slope in front of the Government building is terraced with broad stairways almost completely covering the slope. The building is 800 feet long by 250 feet wide and is the largest structure ever provided at an exposition by the federal government. It is distinguished from all the other large buildings at the Exposition by the steel truss construction, the entire roof being supported by steel arches, forming a splendid domed ceiling.

In this building are installed the exhibits of all the executive departments of the government. The building is a vast storehouse of an endless variety of treasures dear to the heart of every true American. Precious documents are to be seen here, and the autographs of our great men of the past are on display. Relics of famous statesmen and soldiers, carefully preserved through generations, are exhibited. Each governmental department has installed an exhibit showing its official character and mode of operation.

Entering the Government building from the eastern end, the visitor sees at his left a railroad postoffice car. This is not a mere coach standing idle,

LOUISIANA PURCHASE MONUMENT, WORLD'S FAIR.

but is one of the most improved mail cars, in which men attached to the United States railway mail service are actively engaged in "throwing" the mails. Here you will see the postal clerks at work, just as they work while speeding along a railroad track.

A curious collection of old time relics from the postoffice museum at Washington illustrates as no verbal description can do the crude beginnings of the postal system. One of these relics is an old fashioned stagecoach that once carried United States mails through a portion of the Louisiana purchase territory. President Roosevelt, who once inspected it, examined with a rough rider's interest the bullet holes which stage robbers and mountain brigands shot through its stiff leathern curtains. Generals Sherman and Sheridan and President Garfield rode in this old coach during the strenuous days of frontier life.

Among the collection of documents showing the primitive postal methods in vogue in the early days is to be seen the old book of accounts kept by the first postmaster general, Benjamin Franklin, all written by hand. There is a rare collection of stamps, including ancient Filipino, Porto Rican and Cuban stamps. The postoffice department's exhibit occupies 12,469 square feet.

Across the aisle, at the right, is the exhibit of the new Department of Commerce and Labor, occupying 1,968 square feet. This exhibit shows what the new executive department stands for and what it is accomplishing. Mr. Carroll D. Wright, United States Commissioner of Labor, had charge of the preparation of the exhibit. Charts arranged by him, showing the rapid growth of the nation in agriculture, arts, manufacture, population, etc., are of special interest to sociologists and all students of the labor problem. The Census Bureau exhibit is made in this section. It shows the tabulating machines used in compiling the census reports. The Lighthouse Board, also operating under this department, shows the great revolving lenses in light-houses, with other interesting appliances.

The space in the projecting north-west corner of the building is devoted to the Library of Congress. The office which houses this library at Washington is held by many architects to be the most beautiful building in the

**Chamberlain's Colic, Cholera and Diarrhoea Remedy.**

This remedy is certainly to be needed in almost every home before the summer is over. It can always be depended upon even in the most severe and dangerous cases. It is especially valuable for summer disorders in children. It is pleasant to take and never fails to give prompt relief. Why not buy it now? It may save life. For sale by Barker's Drug store.

world. Its interior decorations, by Elmer Ellsworth Garnsey, furnish one of the chief delights of a visit to the national capital. A large model of this splendid building is a feature of the exhibit. The decorative features of the interior are reproduced in their original colors.

The next exhibit on the right hand side of the central aisle is that of the Interior Department, occupying 11,792 square feet. In this large space the visitor finds so many things of compelling interest that he is loath to leave. The Patent Office exhibit belongs to this section. There are models of many machines that have borne an important part in the development of the nation's industries. The earliest form of every device of human invention, so far as possible, is shown here. For instance, you may see the actual sewing machine that was the first contrivance of its kind ever constructed; it was patented in 1846 by Elias Howe. The first typewriter, patented by C. Thurber in 1842; the model of the first cast iron plow, patented by Charles Newbold in 1797; the first screw propeller, invented by Robert Hook in 1680; and many other "first" things are to be seen. The model of Abraham Lincoln's celebrated device for lifting steamboats off shoals is shown here. The first harvesting machine, made in the year 180 B. C., is one of the most ancient exhibits at the Exposition. There is also a model of the first steam engine, made in Egypt in the same year.

Every foot of the 200,000 feet of floor space in Uncle Sam's World's Fair building is occupied by exhibits of surpassing interest, and every phase of the people's welfare is shown.

**CURIOUS THINGS FROM CHINA**

The Most Magnificent Beds Ever Seen Are Part of the Celestial Empire's World's Fair Exhibit.

The Chinese exhibit at the World's Fair is filled with pleasing surprises. Some of the most magnificent articles of furniture are a part of this wonderful display. The carving and inlaying of ivory, bone and wood illustrate the marvelous skill of the Chinese.

Models included in this interesting exhibit show the homes and home life of the Chinese, their weddings and funerals, Chinese tea house, restaurant and shop, Chinese weaving and some of the beautiful silks and wearing apparel of the Chinese and their methods of manufacturing them.

One feature of the exhibit is two magnificent Chinese beds, each of which has the appearance of being a small house of great beauty. One is a summer bed, the other for winter. The summer bed is hand carved and inlaid with ivory and bone figures and landscapes exquisitely carved and so skillfully joined as to appear a part of the wood. The bed and furniture are of carved bamboo. The bed consists of an anteroom, with tables, chairs and tea stands, and in an inner room, which is the sleeping apartment, there is a couch with coverings of gauzy silks.

The winter bed is still more elaborate. It consists of three compartments. The first contains four chairs, a tea tray and a chest of drawers. This is the sitting apartment. The second is the dressing room, and the third is the sleeping apartment, or the couch itself. The furniture is of rosewood inlaid with ivory carving of birds, flowers and trees. The couch is covered with silks of the finest texture and in gaudy colors. The sleeping compartments are lighted with Chinese lanterns of silk hung at the outer entrance, while the light enters through gauze panels, hand painted and in forms of rosewood inlaid with ivory figures.

A table and dish made of highly polished ash, with exquisitely carved bamboo figures inlaid, are shown. The work is so artistically done that each article seems to have been made of one piece of wood.

There is also a large display of Chinese lanterns made of silk, gauze and other light material and some made of beads artistically arranged with glass centers. The silk and gauze are beautifully hand painted.

There are models of some of the great Chinese temples, theaters and arches, showing elaborate carving in wood and ivory and two large elephant tusks exquisitely carved.

**WHARFAGE FREE AT ST. LOUIS**

Twenty Miles of River Front For Water Craft at World's Fair City.

Free wharfage will be given to all boats landing at St. Louis during the World's Fair. Traffic Manager Hilary of the Exposition and Joseph P. Whyte, harbor and wharf commissioner of St. Louis, have decided on the locations assigned to the various kinds of boats. Yachts, steam launches and all boats propelled by their own power have been assigned wharf space between Choteau avenue and Middle street. These streets, running east and west, form the boundary lines for the central business district of the city. House boats have been assigned wharf space north of Middle street and south of Choteau avenue.

St. Louis has a river front of twenty miles. The Broadway line of the Transit company parallels the river from the city limits on the north to Jefferson Barracks on the south. At no point are the cars more than five blocks from the Mississippi river. The World's Fair may be reached for one fare by transferring to any of the eight lines that cross Broadway and reach the Exposition grounds.

No charge will be made for wharfage. Application for space should be made to the harbor and wharf commissioner at the City Hall, on Twelfth street, between Market street and Clark avenue.

**ALL THE STATES AT THE WORLD'S FAIR.**

Many Beautiful Pavilions and Pretentious Buildings Show Forth the Enterprise of American Commonwealths.

A beautiful city has grown up among the trees on the World's Fair grounds at St. Louis. It has nothing to do with the immense exhibit palaces, but is a thing apart. The houses in this new city are of various styles of architec-

ture. Some are palatial in size and appearance, while others look merely cozy and inviting. Never before have so many national and historic buildings been constructed in one group. This new city might be called the City of the States, for the houses included in it are the state buildings at the Fair.

The city is not compact, but somewhat straggling, as befits the picturesque view. Yet there is nothing suggestive of a Stringtown-on-the-Pike about this city, for the grounds surrounding each of the houses are beautified with gardens typical of the state represented.

All the states are to be represented at the World's Fair. This means a great deal, a shining triumph for the Louisiana Purchase Exposition, and furnishes another illustration of the fact that this Exposition's completeness is the marvel of the age.

Fifty-one states, territories and possessions of the United States have taken the steps necessary to participate in the World's Fair on an important scale. But two states were still outside the fold at the last report, and in each of these was a well defined movement in favor of being represented at the Fair with buildings and exhibits. New Hampshire, the old home state, and Delaware are the states referred to. In New Hampshire a fund for participation is being raised privately by patriotic citizens, so that in the event of legislative inaction this commonwealth may be represented.

The states and territories are expending over \$7,000,000 in their efforts to show off to best advantage at the Exposition. This is a million and a third more than was expended at the Chicago exposition by the states. In addition to this, large cities in many states will have municipal exhibits, the funds for which are not included in these figures. The municipal exhibit idea is entirely novel. From a number of the states there will be prominent county exhibits provided by special appropriation of county funds.

This City of the States presents a picture of surpassing beauty. Nature has done much to aid in the creation of the picture. Never before has any exposition been able to grant such advantageous sites for state buildings. The buildings are situated on a plateau about seventy-five feet higher than the level ground to the north upon which stand the main exhibit palaces. There are hills and ravines here and there, enabling the landscapists to lay out a most delightful pattern of roads and terraces and lawns.

The smallest of the state buildings is that of Arizona, which stands near the southeastern entrance to the grounds. One of the largest is that of Missouri, from the dome of which it is said that perhaps the very finest view of the Exposition may be enjoyed. This building is a palace in the Italian renaissance architecture, built at a cost of \$105,000. Near by is the reproduction of the Cabildo at New Orleans, in which the Louisiana Purchase transfer ceremonies took place—Louisiana's state building. Ohio has a clubhouse of highly ornate design, in the architecture of the French renaissance. Illinois is prominent with a most pretentious structure, with wide verandas and a commanding cupola.

A description of each of the state buildings, with any detail, would more than fill a newspaper page. It is only possible here to hint at some of the interesting structures. California, for instance, has reproduced in exact size the famous old La Rabida Mission. Connecticut presents a replica of the Sigourney residence at Hartford, home of the poetess Lydia Huntley Sigourney in her teens. This building is said to be the finest specimen of purely colonial architecture now standing. The New Kentucky Home, from the Blue Grass State, is a handsome clubhouse that would make some of the mansions along Fifth avenue, New York city, look insignificant. Beauvoir, the quaint old house which Jefferson Davis owned and occupied for many years, is reproduced by Mississippi. Its wide verandas or galleries give it a most inviting appearance. Washington's headquarters at Morris-town, N. J., are reproduced by New Jersey. Virginia contributes Monticello, the home of Thomas Jefferson.

The state of Washington contributes a structure of unique design. It is called the Wigwam, five stories high, built of wood from Washington forests. The building is octagonal, with gigantic diagonal timbers rising from the ground and meeting in an apex ninety feet in the air, above which is built an observatory, from which a splendid view of the Exposition may be had. An elevator will carry visitors to the observatory.

New York, Pennsylvania, Ohio, Arkansas, Colorado, West Virginia, Indiana, Wisconsin, Texas and many other states are represented by buildings which cannot fail to arouse admiration. The Texas building is in the shape of a five pointed star, an appropriate idea for the big Lone Star State. It has a magnificent mansion, with classic porticoes and a central tower containing an observatory chamber. Kansas, Indian Territory and Oklahoma each uphold the growing reputation of the southwest for enterprise and fertility of resources.

Cost of Seeing the World's Fair. From any point within 300 miles of St. Louis a person may travel to the World's Fair this year, view the wonders of the Exposition for three days and expend the same money he would pay in any other year for train fare alone. This is an absolute fact.

The Western Passenger Association has agreed on a ten day excursion rate, 250 miles or more from St. Louis, for one and one-half fare for the round trip.

A Most Wonderful Cure. Joseph D. Underhill, of Doland, S. Dakota, says:—I have received great benefit from your White Wine of Tar Syrup. I had a deep seated cough and the doctors gave up all hopes of my recovery and pronounced it consumption. I tried everything that we could hear of. Finally one of my friends prevailed upon me to use your White Wine of Tar Syrup. I took one and one-half bottles and am entirely cured. Such medicine I can recommend to those who are afflicted as I was.
