

FINED \$50 AND COSTS

B. H. Ward of Fairmont Found Guilty of Shipping Cow Moose Meat.

CASE WILL BE APPEALED TO DISTRICT COURT.

Result of the Trial is Regarded as Victory for Game and Fish Commission.

B. H. Ward of Fairmont, Minn., formerly a member of the state game and fish commission, was Friday found guilty at Northome of shipping by Northern Pacific express from Northome to Fairmont a quarter of moose meat together with the hide, the same being a portion of the carcass of a female moose. Ward was sentenced to pay a fine of \$50 and costs, which amount to \$217, in default of the payment of which he must serve 90 days in the Itasca county jail.

The case is interesting to residents of the north country as well as to those of southern Minnesota, where Ward is well known. The defense in the case started with the contention that Ward killed a bull moose and that the case was the result of a conspiracy on the part of Samuel F. Fullerton, executive agent of the game and fish commission, to even up an old score. Evidence by the state established the fact that the complaint against Ward had been made by settlers living near Northome and that Fullerton did not know of the suspicion against Ward until after a companion of Ward's who hunted with him near Northome last fall had been arrested.

The defense then claimed that the meat and hide shipped to Fairmont had been given to Ward by a young man named Emil Dybdahl and that Ward did not know whether it was a part of the carcass of a male or female moose. The state then produced as evidence the heads of three moose killed by the party to which Ward belonged when he hunted near Northome last fall and the hides of two moose killed by members of the party, according to testimony by B. P. Boyd, who was convicted of killing a cow moose and fined \$50 and costs.

The register of a hotel at Mizpah was introduced as evidence by the state and it was shown that while stopping at the hotel Ward had registered the names of the members of his party and written on the register "Big moose hunters: killed three moose and two deer." Evidence was also produced by the state showing that the members signed their names on the door jamb of a log cabin to a statement as follows: "Killed one moose today."

One witness testified that Ward had offered him the shoulder of a moose that had been left in the woods when the animal had been dressed but that when he went there with a wagon to haul it away Ward objected to his carrying it off, saying it ought to be worth \$15.

Sibley Lost Decision.

An important land decision has just been handed down by the secretary of the interior in a contest case involving a valuable quarter section near Mallard lake in Beltrami county, upon which Wm. Johnson of Lowell township, Polk county, instituted a contest of the rights of F. O. Sibley to same, finally winning the contest. Sibley had filed up on the land under the timber and stone act while Johnson squatted upon the land and contended that it was more valuable for agricultural purposes, and succeeded in convincing the department that he was entitled to the quarter, valued at \$5,000. DEER RIVER IS TAKEN IN

Defeated by Decisive Score of 8 to 1 in Game Yesterday Afternoon.

Bemidji yesterday afternoon defeated Deer River in a base ball game played on the local diamond by the decisive score of 8 to 1. The game was an excellent exhibition, and had Cook, the Deer River pitcher, been accorded the support to which he was entitled the score would have been much closer. Neither side scored until the fourth inning, when Hazen went to first base on an error of the Deer River first baseman. Hazen stole second and third and went home on a caught fly. The fifth, sixth, seventh and eighth innings netted Bemidji seven more runs, while Deer River succeeded in getting only one man across the home bag. The pitching of LeGore for Bemidji and Cook for Deer River was the feature of the game. Each struck out 13 men and allowed only four hits apiece.

What the Minot Optic says about "The Banker's Child."

Last night a large audience witnessed the play, "The Banker's Child" at the opera house and every one present left at the close of the play with the highest praise for Harry Shannon's play. It has been a long time since a play has come to Minot as elevating in its tone and as prettily staged and costumed as "The Banker's Child." The elegant costumes are seldom equalled on the stage and the play from beginning to end is intensely interesting. Little Stella, known as the Banker's Child, is a marvel. She played her part in a manner which captured the entire audience. The specialties were very fine last night. It is hoped by many who saw the play last night that this company will play a return date in Minot.

TO INVESTIGATE WOLD AFFAIR

Henry Funkley Goes to Grand Forks to Look Into Dead Man's Grave.

Attorney Henry Funkley, who is employed by the relatives of Magnus E. Wold, the missing Buzzle homesteader who it is thought was murdered at Grand Forks and afterwards thrown into the Red river, left yesterday afternoon for Grand Forks to make an investigation of the circumstances surrounding the death of the man found in the river last November and to attempt to secure permission to reopen the grave of the dead man for the purpose of viewing the remains. Providing the resemblance between the man buried at Grand Forks and Wold is strong, a woman who claims that she can positively identify the body of Wold will go to Grand Forks to look at the body.

If it is found that Wold is the man found in the river his claim in Buzzle township, which was taken from him in a contest case heard at Cass Lake some time ago, will revert back to his heirs.

ITCHING ECZEMA

In July, 1883, I began to break out with Eczema on my head, legs and arms, and began treatment with local doctors, but did not get much relief. They said the disease had become chronic. I then quit them and tried various ointments and soaps for another two years, but as soon as cold weather came I was as bad off as ever, so I finally decided to let medicine alone, and for twelve or thirteen years did nothing towards curing the Eczema, except bathing. This seemed to do about as much good as anything I had tried.

During the time I lost about one-half of my hair. I began S. S. S. doubtful of a cure, because the disease had run so long, but soon discovered your medicine was doing me good, and continued to take it. I used seven bottles, when I was completely cured, not having a single spot on my body, which before was almost completely covered.

The head, feet and hands are usually the parts affected, though the disease appears on other parts of the body. While external applications allay the itching and burning temporarily, it is the acids thrown off by the blood that cause the irritation and eruptions upon the skin. The acids must be neutralized and the system cleansed of all humors and poisons before the cure is permanent. S. S. S. is guaranteed entirely free of Potash, Arsenic and other minerals. Book on the skin and its diseases sent free. Medical advice furnished free.
