Mrs. Woodrow Wilson is having her spring clothes made in Baltimore to keep within the allowance of \$1,000 a year for dresses. When measured it was found to be forty-four inches long, twenty inches around and weighed twenty and three quarter pounds. They claim they saw another by its side even larger.

At a meeting of the board of education held this week at Thief River Falls formal action was taken providing that the commencement gown of no girl of the high school class of 1913 shall cost more than four dollars. There is a further regulation that all of the girls shall wear black shoes unless by unanimous vote the girls decide on some other color. The reason for this action is apparent. Similar action has been taken by school officials in many places and it will not be long until a similar regulation will be one of those governing the commencement events of a public school.

### Look to Your Plumbing.

You know what happens in a house in which the plumbing is in poor condition—everybody in the house is liable to contract typhoid or some other fever. The digestive organs perform the same functions in the human body as the plumbing does for the house, and they should be kept in first class condition all the time. If you have any trouble with your digestion take Chamberlain's Tablets and you are certain to get quick relief. For sale by Barker's Drug Store.—Adv.

Foley.  
Dated April 15, 1913.

### Honest Advertising

A noted educator once said that he knew no genius except "the genius of industry, honesty and common sense." In advertising the fruits of judicious publicity are but the product of industry, honesty and common sense—above all is honesty.

Honest advertising is a wonderful force for good, both to the consumer and producer. As evidence of the direct way fraudulent or dishonest advertising affects the public consumer, take the food products. Through fraud and fake advertising wholly unfit and unhealthy food products are sold and eaten as good goods and the health of every member of the home, including children, is affected. The health of the country is a matter of grave importance and dishonest advertising of food products is criminal. Dishonest advertising of dry goods, clothing, shoes, hardware, etc., is a matter that affects the health less, and is not of so grave a nature.

The producer or merchant is interested in securing a permanent market for his goods. Two forces must work to his advantage to accomplish this result. First, the goods must be meritorious. Second, the goods must be honestly advertised. If goods are not meritorious it is useless to expect a permanent market. Exaggerations and deceptions in advertisements produce only temporary advantage in business, if any at all, and soon brands the merchant as a pirate in business. Dishonest advertising reacts and in reacting affects all merchants more or less, hence all merchants should be directly interested in honest advertising. However, the people are getting wiser every day and more easily detect lies in advertisements, and it is a sad blow to the merchant when people lose faith in his advertisements.

The producer or merchant who adopts the straight-to-the-point, honest advertising policy will ultimately hold the attention and win the confidence of the people, which is an invaluable asset in business.
