

THE BEMIDJI DAILY PIONEER

Published and Proprietors. Telephone 191

Entered at the post office at Bemidji, Minn., as second-class matter under Act of Congress of March 3, 1879.

Published every afternoon except Sunday

No attention paid to anonymous contributions. Writer's name must be known to the editor...

Subscription Rates. One month by carrier \$1.00. One year by carrier \$10.00.

The Weekly Pioneer. Eight pages, containing a summary of the news of the week.

THIS PAPER REPRESENTS FOREIGN ADVERTISING BY THE

GENERAL OFFICES NEW YORK AND CHICAGO BRANCHES IN ALL THE PRINCIPAL CITIES

The weatherman is keeping up a 500 these days, but nobody has been mean enough to suggest that the evangelistic campaign has anything to do with it.

He met three women, two men and two children. That was the experience of Evangelist I. E. Honeywell.

The Chicago waiter who has fallen heir to \$100,000 dollars must feel deeply impressed with the truth of the old maxim, "everything comes to him who waits."

The street car conductor who found greenbacks to the extent of \$5,000 received a reward of twenty-five cents from the owner.

Someone has been kind enough to investigate into the Bible conditions of Bemidji homes, and reports that the dust had all been removed from them before the evangelistic party arrived.

J. J. Opsahl announces that he is in "dead earnest" about landing the position of state immigration commissioner.

Why Is a Newspaper?

A newspaper is a town's way of letting outside people know that it is alive—a guide post whereby they can tell the city and the cemetery apart.

Farming For Convicts.

Arkansas has abandoned, under an act recently passed, the long-existing custom of selling its convict labor to the highest bidder.

McQUAIG

Save your money! Regularly and systematically. If you receive your pay weekly, say some aside each week.

THAT'S NATURAL

But we strive harder to please. That's service. Courtesy attention has won over many jewelry customers to us.

and, at the rate our prison population is increasing, there will be no lack of help to do the work of reclamation.

STRONG, BUT OLD IN YEARS

History Replete With Records of Men Who Have Done Great Things Beyond Their Allotted Space.

There are some old men who are not to be despised. Some are apt to think that none but young men can do much.

Cromwell was only a captain when he was forty-one, and his greatest deeds were performed between forty-eight and fifty-six when he died.

Young was an old man when he wrote some of his best poetry, and he was sixty when he began his "Night Thoughts."

Talleyrand at the age of eighty stood at the head of affairs in France under Napoleon, and then under the Bourbons.

When the Russians were determined to make a stand and fight the French before the walls of Moscow, they put old Kutusof at the head of the army in place of Barclay de Tolly.

General Blucher was seventy when he was defeated at Ligny and fell under his horse, and the French cavalry rode over him; yet a day or two after he led on his Prussians against Napoleon at Waterloo.

When the Russians were determined to make a stand and fight the French before the walls of Moscow, they put old Kutusof at the head of the army in place of Barclay de Tolly.

General Blucher was seventy when he was defeated at Ligny and fell under his horse, and the French cavalry rode over him; yet a day or two after he led on his Prussians against Napoleon at Waterloo.

COULD ONE DOUBT HIS LOVE?

Devotion Almost Sublime Exhibited by Harold After a Test That Was Really Severe.

She knew how to bake biscuits. But that was all for she had only spent two years at a cooking school before her recent marriage.

"O, goody!" she cried. "I'll give Harold a surprise. We'll have a biscuit supper."

Harold came home early as he had every day since they started house-keeping. He kissed her as they met in the vestibule, then in the hall, the ante-room and so on into the dining room.

"First course, biscuits!" she twittered, as they sat down to dinner. Harold devoured her with his eyes, devoured the biscuits with his teeth and avidity.

"Second course, biscuits!" she cried. "How novel!" exclaimed Harold, and devoured seven more.

The third course was biscuits, and as for the fourth, biscuits. It was a four-course dinner, and Harold did justice to each course. For dessert there were biscuits.

The next day after Harold had been pronounced out of danger and the doctor had assured him that the acute indigestion would not return if he was careful about what he ate, the young husband called his wife to his bedside.

"Dearest," began Harold, "I think I must have eaten something"—she was clinging to the bedpost for support—"I think I must have eaten something that did not agree with me at the club for lunch yesterday."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

NEW EMPIRE FOR THE TURK

Driven From Europe, There Are Vast Stretches of Fertile Land Awaiting Him in Asia.

With the impending curtailing of the power and extent of the Turkish empire comes the hope of a new Mohammedan empire, the empire of Arabia, the natural boundaries of which would extend from the valleys of the Tigris and Euphrates to the isthmus of Suez, and from the Mediterranean sea to the Sea of Oman.

The present viceroy of the Hejaz, with the territory of Medina, would probably form an independent state of which the sovereign would be a religious caliph, the father of all Mohammedans.

This Arabian empire should include the valleys of the Tigris and Euphrates, Syria, the valley of Orontes and Lebanon, Palestine, central Arabia, with its five territorial divisions, the Djof, the Djebel-Sheher, the Kheybar, the Kasab, the Yemen, Nedjed, Oman, Hadramaut, Te-ma and Hedjaz.

It is hardly possible that the new empire should include Palestine. When the power of the Turk is broken there is a sentiment that will result in taking the Holy Land from the hands of the infidel, and after many centuries the impassioned but fruitless hope of the Crusaders will be realized.

"Dearest," began Harold, "I think I must have eaten something"—she was clinging to the bedpost for support—"I think I must have eaten something that did not agree with me at the club for lunch yesterday."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

"I don't know," she said, "but I'll try to find out what it was."

Health a Factor in Success

The largest factor contributing to a man's success is undoubtedly health. It has been observed that a man is seldom sick when his bowels are regular—he is never well when they are constipated.

For constipation you will find nothing quite so good as Chamberlain's Tablets. They not only move the bowels but improve the appetite and strengthen the digestion. They are sold by Barker's Drug Store.—Adv.

Outward and Inward Change.

Time was when the half-angering, half-battering "altee samee Melican man" would have been the instinctive comment upon China's adoption of any of the ways and laws of the western world.

Little Clara has a habit of sticking her feet out of the bed covers. One hot night on being told not to do so, she obeyed in silence for a little while and then suddenly said, "Oh, mamma, let me put my feet out! They're choking."

Doing Their Sums.

"De wunt thing about 'rithmetic," said Uncle Eben, "is dat a whole lot of folks git de idea dat any kin' of figgerin' is all right if de kin finish wif a numbuh dat has a dollah ma'k in front of it."

Most Prompt and Effectual Cure for Bad Colds.

When you have a bad cold you want a remedy that will not only give relief, but effect a prompt and permanent cure, a remedy that is pleasant to take, a remedy that contains nothing injurious.

Chamberlain's Cough Remedy meets all these requirements. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and restores the system to a healthy condition.

"A Philadelphia scientist on his way to the Hawaiian Islands spent three months studying the habits, evolution and variations of tree snails."

Mayon volcano, in Albay province, southern Luzon, is one of the most beautiful active volcanoes in the world. Viewed from certain points, it is a perfect cone, resembling an inverted letter V.

Spiders Used as Charms. Spiders, like worms and snakes, were formerly much used in charm cures, and only a year or two since an English shopkeeper was startled by a request for "a nut to put a spider in to cure baby's whooping cough."

Gambler's Superstitions.

Gamblers are generally superstitious with regard to numbers. At Monte Carlo many players lay their stake on the number of their cloak room tickets.

When one has botanized seats, sag, sponge, both sides of the cane with hot soapuds in which a handful of salt has been dissolved, then stand the chair in the open air. Treated like this, the seats will become as firm as when new, shrinking into place.

For Car Seats.

When one has botanized seats, sag, sponge, both sides of the cane with hot soapuds in which a handful of salt has been dissolved, then stand the chair in the open air. Treated like this, the seats will become as firm as when new, shrinking into place.

1000 Lives, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in its entirety.

Address P. J. Cheney & Co., Toledo, Ohio.
