SURGICAL MAGNETS.

Paris, May 27.—In the hospitals of France magnets have been developed that will draw fragments of shrapnel to the surface from a depth in the flesh of even six inches, and steel jacketed bullets have been drawn out from a depth of more than two inches.

At the Invalids' Hotel in Buffalo, N. Y., are many as wonderful electric machines, high frequency currents, X-ray, violet rays. Then Dr. Pierce has equipped the Sanatorium with very known device to aid the sick and in the Surgical Department every instrument and appliance approved by the modern operator. The permanent cure of rupture is accomplished here without pain with local anaesthesia. Stone in the Bladder and Gravel are removed in many cases without pain and the patient can return home cured in a few days.

Dr. R. V. Pierce, nearly half a century ago, devised and used two prescriptions which were almost unailing. They were made without alcohol or narcotics, extracted from roots and herbs by using pure glycerine and the ingredients are made of public.

Dr. Pierce's Golden Medical Discovery is a tonic and blood purifier that cures pimples, blotches, sores, humors, eruptions and diseases of the skin.

Nothing stands as high today in the estimation of the masses of women as Dr. Pierce's Favorite Prescription—this is a soothing nerve which cures the functional derangements and painful disorders of women. For girls about to enter womanhood, women about to become mothers and for the changing days of middle age Dr. Pierce's Favorite Prescription should always be on hand. In liquid or tablet form. Write Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., for free 126-page book on woman's diseases. Every woman should have one.

Dr. Pierce's Medical Adviser, cloth-bound, sent free to you on receipt of 3 dimes (or stamps) to pay expense of mailing only.—Adv.

THE "FORLORN HOPE."

Real Meaning of a Misused Term in the Vocabulary of War.

In the tales of every war one hears a great deal about "forlorn hopes." The term is one of the most misused in the vocabulary of war. It is commonly understood to mean a desperate venture. It really means "lost troop"—that is, "detached troop."

The word "hope" in the phrase is not an English but a Dutch word, "hoop" meaning literally "heap" and secondarily body of troops. The word "forlorn" represents the Dutch "verloren"—lost. A "verloren hoop" was a detached body of troops thrown out in front of the main line of battle to find the enemy and engage them first. This was the regular sixteenth and seventeenth century practice, and, though it was one of the more dangerous kinds of service, it was not desperate or, in the English sense, forlorn.

Nowadays much the same work is done by the detached bodies of cavalry which are thrown out before the main line of battle without communications or supplies to find the enemy. "Capitulation" is another term of war which is very loosely used. It does not mean surrender, but surrender on terms. In fact, it means the terms, not the surrender. It is from the Latin "captivum," or "hostage" (from which is derived our word "chapter"), and a capitulation is a formal treaty of surrender drawn up under a series of headings or chapters embodying the terms on each point.—Manchester Guardian.

Teakwood.

The fact that teakwood is coarse grained, greasy to the touch and possesses an offensive odor kept it in disrepute with English shipbuilders until 1897, when British shipbuilding and railway interests began to recognize the value of Indian teak. During the next seven years all the shipbuilding countries in the world joined in an ever increasing demand for this timber until its prices were forced up to a figure much beyond their normal rates. It has practically become the staple of the local wood industry for the greater part of the entire Indian continent. Teak is being freely planted by the Indian forestry service in the important civil stations all over India, even as far north as Saharanpur, Dehra Dun and Lahore.—Argo naut.

Paid the Fine.

A policeman in a country village where "cases" were rare one day came across his landlord in an incapable state. The chance was too good to be missed, so the landlord was summoned and fined to the amount of 14s. 6d. The fine was paid, but the policeman's feelings can be better imagined than described when, on reaching home, he found his rent had been raised sixpence per week, and so it continued for twenty-nine weeks, when the landlord coolly informed him that he had paid the fine and could have his house at the former rent.—London Answers.

Issuance of game hunting licenses in London have fallen off fifty per cent during the past six months. Enlistments to hunt Germans, however, has increased several thousand per cent.
