 BEMIDJI, MINN.

Ever, as a boy, tie a can to a dog's tail and see him scoot? Sure you did—we did! And how about that lot, or house or piece of furniture, or auto you wish to get rid of? Tie a Daily Pioneer Want Ad to it friend—do it now!

Phone 31.

For Men Behind the Pen
 You signers of checks, writers of letters, keepers of books and makers of records—here is a new ink—in fact, two inks in one. We were one of the first to add to our stock the newest member of the Carter's Ink family.

Carter's Pencraft
 Combined Office and Fountain Pen Ink

We feel sure there's a call among our friends for one ink usable in either fountain pens or inkwells. A wonderful new flow-controller is part of the equipment of quills, pens and ball-pens of Pencraft. A slight pressure of the finger controls the flow. Come in and let us fill your pen with this new ink, and show you the flow-controller.

Mr. and Mrs. F. R. Davies of Plummer spent Christmas with Dr. and Mrs. E. H. Marcum of this city. Mr. Davies is editor of the Plummer Pioneer.

A. C. Wheaton returned to his home in Cass Lake today after spending several days as the guest of his sister, Mrs. E. E. Kenfield.

Albert and Ruby Wheaton of Cass Lake are spending their vacation with Kenneth and Anzonetta Kenfield of this city.

POTASH IN CORNSTALKS.
 While the government is searching earth and sea for potash let us look into our own cornfield. The New Jersey experiment station shows that most of the potash in the corn plant is in the stalks. With an average yield an acre of stalks will give about forty pounds. Counting upon forty pounds, which is a reasonable estimate, this quantity would be equivalent to eighty pounds of muriate of potash, or to the potash in 400 pounds of 4-8-10 potato fertilizer. That from the stover, however, might not be so readily available as the muriate of potash. Every little helps in a time like this, and we should all realize that potash comes largely in the straw and stalks of plants and in the liquid manures. We can do something to save these things. Let us do what we can to find potash on our own farms before we blame the government for being too slow.—Rural New Yorker.

HOME FOODSTUFFS.

Oklahoma Woman Demonstrates Value of Canning Fruits and Vegetables. [Prepared by Oklahoma station.] "In the spring of 1915 we made up our minds to raise less cotton, as we had learned that six cent cotton would not clothe and feed a family and leave us a cent to apply on indebtedness," writes a Bryan county (Okla.) woman. "We made up our minds," she continues, "to produce our foodstuffs if possible." In carrying out this plan she went to a woman agent in Bryan county, who advised her to get a home canning outfit and several hundred tin cans. At a cost of less than \$10 this woman obtained her canning outfit and enough cans to contain all the fruit and vegetables that the family could use. As she puts it herself, "We are now prepared to live at home and board at the same place. For we have on hand the following:

- Pickles and ketchup Quarts. 48
- Chili sauce 56
- Snap beans 48
- Tomatoes and ostra 123
- Garden peas 15
- Corn 68
- Squash 19
- Beets 12
- Corn salad 11
- Tomato relish 2
- Dicid relish 2
- Peaches 148
- Apples 28
- Pears 48
- Blackberries 30
- Plums, preserves, jellies 17

"In addition to the above I raised 2,000 pounds of cabbage and made fifty-two gallons of kraut, raised two wagon loads of pumpkins and squashes, ten bushels of Irish potatoes, forty-five bushels of sweet potatoes, ten bushels of onions, one and a half bushels of navy beans, two and a half bushels of lady peas. We had an abundance of okra and early vegetables of all kinds. I raised a little patch of Japanese sugar cane, which netted me fifty-five gallons of fine sirup, and after paying expenses of making with molasses I will also have seed to sell. We also raised 150 bushels of tomatoes on half an acre, 100 bushels of peanuts, 100 chickens and have six hogs fattening for meat. I bought rhubarb plants for 25 cents and made pies of it all summer. It yielded immensely."

Handy Wagon or Buggy Jack.
 Take a twenty-four inch length of 1 by 4 board for a base and nail a thirty inch 1 by 4 upright on each side, writes F. N. Vuger, Cold Springs, N. M., in the Missouri Valley Farmer. Bore half inch holes through these uprights every three inches the full length of both

boards. Fit a thirty inch piece of 1 by 4 between them for a lever, with several half inch holes through it so it can be adjusted to any position and with grooves in the upper edge. A length of common hay wire will hold the adjustment for heavy wagons, etc. If a stronger jack is needed the 1 by 4's may be replaced by lumber of 2 by 4 dimensions.

You can get a big, fat pencil tablet for a nickel at the Pioneer office, and an extra big, fat ink paper composition book for a dime. All the "kids" will want one when they see 'em.

 No. 412 Mahogany for Single Desk. 6.00

SENGBUSCH INKSTAND CO., Milwaukee, Wis. Call at Pioneer Office-- for display.

IF YOU WANT A GOOD FARM

The price I will ask for this will mean a big sacrifice on my part and rather than publish it in this advertisement it will be kept a secret between myself and the prospective buyer. I have been a resident on this same property for 22 years and feel certain that any one seeking a real bargain will buy a tract of this property on sight. All I ask is that you look at it before you buy elsewhere. The fact of the matter is I have more land than I feel able to look after, and anxious to sell parts of it in order to improve the balance. If you buy you can depend on one thing and that is that I will continue to be your neighbor, together with others living in this vicinity.

Why Not Buy It Direct From the Owner

There is some satisfaction in knowing that only one man can get a "rakeoff" if you deal with the man who owns the land he wants to sell. You will spend less time, that is wasted time, by being taken direct to the property he has for sale. I have 240 acres of the best land in the county, located on the "Divide", three miles east of Hines and four miles from Blackduck. Twenty-five acres in hay and crops and sixty acres seeded to clover and timothy grasses. I Will Sell It in 40, 80, 120 or 240 acre tracts. Terms easy. See this before you buy. I must sell. Find out why.

Red Lake. Three forties are still timbered. There is a fine consolidated school at Hines, Minn. The bus calls daily for the children. Interested parties are requested to write or call at the BEMIDJI DAILY PIONEER OFFICE for references or further information. We might add also that in no other locality will you find a finer lot of neighbors and a more pleasant place to live than right in this particular section.

W. M. VAIL
Owner
