Why We Are Opposing A Government Armor Plant

To the People:

Some people say that the very fact that the Bethlehem Steel Company is so aggressively fighting the proposal to build a Government armor plant is conclusive proof that the Company is seeking to assure for itself the "vast profits" derived from private manufacture.

The fact is that armor making is the least profitable feature of steel manufacture.

The reason we oppose a Government plant is very simple. It is this:

Even though there is but little profit in the making of armor, we have invested over \$7,000,000 in our armor plant;

That plant is useless for any other purpose; if a Government plant is built the usefulness of our plant is destroyed.

It would be good business for us to make armor for the Government at any price over and above the actual shop cost, RATHER THAN SACRIFICE OUR ENTIRE INVESTMENT.

We do not seek to save big profits; our purpose is very frankly to save our armor plant—itsself built solely for the use of the Government—from going to the scrap heap.

To do that, we are prepared to agree for any period to any terms of manufacture which the Federal Trade Commission shall say absolutely protects the Government of the United States.

CHAS. M. SCHWAB, Chairman EUGENE G. GRACE, President

Bethlehem Steel Company
