Law And Rules Regulating Use Of Autos On Highways

The number of automobile cases at the present term of the district court has suggested to the Pioneer the advisability of printing a somewhat brief abstract of the laws and rules governing the operation of cars on the highways and streets. The Pioneer hopes that what it has done may help to avoid accident and prevent litigation.

Every owner of a motor vehicle driven upon the public highways of this state, except fire apparatus, etc., must register his motor vehicle and receive from the secretary of state a tag or plate containing the number of his registration. This tag or number is issued in duplicate and one must be conspicuously displayed on the rear and one on the front of such vehicle and so fastened as to prevent the same from swinging, and the person driving the vehicle must keep this tag or plate free from grease, dust or other blurring material so as to be plainly visible at all times. This provision does not apply to non-residents, unless such non-resident remains continuously within the state for more than thirty days, in which event he is obliged to register his vehicle and secure the plate in the same manner as if he were a resident owner.

Every motor vehicle operated upon the public highway shall be provided with adequate brakes sufficient to control the vehicle at all times and a suitable, adequate bell, horn or other device for signaling, and shall, during the period from one hour after sunset to one hour before sunrise display at least two lighted lamps visible from the front and a red light in the rear shedding white rays which shall shine upon the number plate carried on the rear of such vehicle.

No motor vehicle shall be permitted to remain standing on any public street or highway or in the public street or highway unattended at any time with the motor running.

Every motor vehicle using gasoline as a motive power shall use a muffler and the same shall not be cut out or disconnected within the limits of any city or village, or at the time of passing any horse or animal being lead, driven or ridden.

All vehicles, other than motor vehicles, shall carry while driven on any public highway between one hour after sunset and one hour before sunrise a white light visible from both front and the rear.

A person driving a motor vehicle shall, on signal by raising the hand

or by request from a person riding, leading or driving a horse or horses bring such motor vehicle immediately to a stop, and if driving in the opposite direction remain stationary so long as may be reasonable to allow such horse or animals to pass, and if driving in the same direction use reasonable caution thereafter passing such horse or animals. In case such horse or animals appear badly frightened, or the person operating such motor vehicle is so signaled or requested to, such person shall cause the motor of such vehicle to cease running so long as shall be reasonably necessary to prevent accident and insure the safety of others.

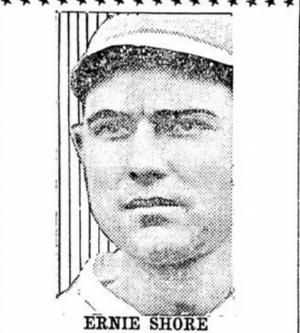

Upon approaching a pedestrian who is upon the traveled part of any highway and not upon a sidewalk, and upon approaching an intersecting highway or a curve or corner in the highway where the operator's view is obstructed, every person operating a motor vehicle shall slow down and give due signal with his bell or horn or other device for signaling; provided, however, that no person shall unreasonably obstruct or impede the right of travel upon the public highway of the driver of a motor vehicle or of a horse, and anyone so doing shall be guilty of a misdemeanor.

Upon approaching a crossroad outside the limits of the city or incorporated village, the operator must slow down the speed of his machine and sound his horn in such a manner as to give notice and warning of his approach.

A person driving with a horse or team or motor vehicle shall meet another person driving with a horse, team or motor vehicle, moving in opposite direction, each person shall slacken his pace if necessary and reasonably turn to the right so as to timely give half of the traveled road if practicable and a fair and equal opportunity to the other to pass. If they are moving in the same direction, the person overtaking shall pass on the left side of the other and the person overtaken shall, as soon as practicable, turn to the right so

\*\*\*\*\* STATEMENTS FROM RIVAL MANAGERS \*\*\*\*\*

Manager Carrigan, Boston—"I have faith in the ability of my men. I have been through this fire and experience will help me in critical times. The pitching and fielding ability will carry us through the day."

Manager Robinson, Brooklyn—"I will not make any prediction on the outcome. My boys have never taken a part in the world's series as a team but Marquard, Merkle, Coombs and Meyers are veterans and are steady players. Their out-pitching will offset their hitting."

The finely drawn finish of the races in the two leagues has aroused unprecedented interest in the series games. Not until the last week of the campaign in each league did the winners of the pennants feel sure they would go into the title clashes.

Fans in Line. As usual in a world's series, this morning found the long line of waiting fans at the baseball park. Newspapers, crumpled and mused in the streets, soap boxes turned on end, and the remains of "hot dog" sandwiches gave evidence of the long night watch of some.

Long before noon streets leading to the baseball park were filled with autos headed for the ball park and traction lines were loaded with persons wending their way to the scene of the conflict.

Seats in the grandstand and boxes were sold out several days ago and only general admission tickets, and only enough of these to fill the seats in that section, are on sale.
