

BASIC PRINCIPLE IS FAITH

Whole Child Character Built on It, According to Writer in Mother's Magazine.

A man never marries the woman he jokes about, and never jokes about the woman he marries. If women followed the same rule, marriage would be the gain. And if wives worried less about the unborn and used more reason about the children that are born, a single generation would revolutionize society.

The boys of today are fathers in the making. The kind of fathers they turn out to be will depend entirely upon the influences that form their characters as children.

I have said the man's faith in woman is stronger than woman's faith in man. Do not forget that truth. But, even when faith flies out of the window, love may remain.

Keep this distinction between love and faith clearly before you, because the foundation of the home, and the basis upon which child character is built, is faith.

First, there is the faith of the husband and wife, each in the other.

Second, there is the faith of the child in the mother.

Third, the faith of the child in the father.

Fourth, the faith of parents in the child.

Fifth, the faith of the child in the true principles of life, and its own

duties and rights as a human being. These five elementary influences determine the character, and in the absence of and other force greater, usually remain the moving impulses of the individual all through life.—John Horace Lockwood, in Mother's Magazine.

Aviators Count Herds of Canadian Caribou

Ottawa.—Aviators who have flown over the barren lands of Canada say that there are at least 20,000,000 caribou there. The information comes from more than one flyer.

In the spring the herds migrate to the north, returning south in the winter. The country over which the herds range is a wild, desolate region, without timber, and the climate is very severe.

A Question.

"After all, there is no place like Peeweeuddyhump!" appreciatively said the landlord of the tavern, who was distended with local pride.

"Probably not," replied a disgruntled guest. "But why don't your people go to work to improve it—have clean streets, a decent lighting system, and acquire other luxuries and necessities—until it resembles a modern and progressive town?"—Kansas City Star.

Magazine Syringe.

Among the war inventions that probably will prove valuable in peace time is a magazine hypodermic syringe that may be used 20 times without refilling. Obviously its chief merit is that of convenience when physicians and surgeons are working under fire and in dark dugouts where continual recharging of syringes entails difficulty and retards operations.

The instrument is supplied with a platinum needle which permits sterilization in a flame. The cap that protects it, when not in use, is kept filled with iodine or alcohol. When large numbers of persons are being inoculated with typhoid serum, for instance, an instrument such as the magazine syringe evidently saves much time.

All Wind.

Henry Watterson, the famous editor, was talking about politicians. "Take the wind, the guff, out of a politician," he said, "and what remains?"

"A noted politician's wife was listening to her husband over the telephone. Five, ten, fifteen minutes she listened patiently. Then she said:

"Excuse me, Charles. Just a moment. I want to change the receiver to the other ear. This one's so tired."

ATTENTION

To The Experience of Abe Grossman for the Last Few Days

I happened to look over some of the mail order catalogs and I find that the working shirts that I sell for 85c is marked in the catalog at 98c, and I doubt if they are as good. Now I will make this short. If you want any thing in the line of clothing, shoes or furnishings bring your catalog to the Hub Clothing Co. and we will under sell them or any other concern that is trying to give the public a lot of HOT AIR.

Some of these concerns are trying to make the people believe that they are buying the goods cheaper than any one else can. I can prove to any man with 100 different facts that they can not do it, as every buyer buys the goods on an open market. Now if it costs the manufacturer \$4.00 to produce a pair of shoes, how can anyone buy them for less than \$4.00.

Another fact is, that the big concerns figure that it costs them 20 to 25 per cent to do business while the average merchant can do business on 8 to 10 per cent.

I would like to have an argument with any smart man on this subject.

Now if you need anything in the line of clothing, shoes or gent's furnishings, go to honest Abe Grossman at the—

**Small Homes Can Be Beautiful**

FOR the average home-builder wood is still the most economical building material. It gives you more house for the money and just as beautiful a house as you can build of any other material.

The beauty of a house lies in its design—and a small house, carefully designed, can be as attractive as one that costs several times as much.

If you are thinking of building you can get valuable suggestions from our booklet "White Pine in Home-Building". In it you will find a number of attractive homes and floor plans, designed by architects of national reputation.

Come in and talk over your plans with us, or send for the booklet.

For the outside of the house we recommend White Pine because it holds its place better than any other wood. It does not warp, split, twist or rot even after years of exposure to the weather.

We have other woods for other uses and always recommend the best wood for your particular requirements.

JEWETTS GARAGE

Commercial Club Luncheons

The Wednesday noon luncheons served by the Commercial Club are becoming very popular. There is never a day that many things of vital interest to Bemidji and the community do not come up. Every man who is proud of Bemidji, and its achievements should come to these luncheons and help Bemidji to achieve even more in the future. Every farmer that is in Bemidji Wednesday noon is more than welcome at the Club, and we have made arrangements with the Secretary of the club for the next month to see that every farmer who comes to the luncheon is our guest. Someone from the bank is always there, and we will be more than glad to welcome you.

Northern National Bank**CHIROPRACTIC (KI-RO-PRAK-TIC) CHIROPRACTOR (KI-RO-PRAK-TOR)**

BEAR there two words in mind. Become acquainted with them. In them lies the hope of relief and restoration to the ill and suffering.

It is not many years since Chiropractic was discovered. Yet today thousands who were sick and ailing are restored to health and are happy witnesses to the merits of this, the modern drugless way to health. The handful of pioneers, of fifteen to twenty years ago, has grown until there are now approximately 10,000 Chiropractors successfully practicing in the face of the bitterest criticism and strongest opposition that ever hindered a new and worthy idea. Chiropractic lives and advances because it is right; because the results it obtains are the best arguments in its favor.

Chiropractic demonstrates that there is a cause for all diseases, and invariably it is found in the spine. By scientific adjustments, without the aid of drugs or surgery, the Chiropractor corrects these defects and Nature effects the cure. Through

CHIROPRACTIC THE BETTER WAY TO HEALTH

the percentage of restorations is so large that the necessity for the employment of all other health methods becomes insignificant. It is equally effective for men, women and children. It is the HOPE for all suffering humanity. Information gladly given.
