\*\*\*\*\* SPUR \*\*\*\*\*

There is a great deal of sickness in this community and there is some talk of closing the school for a week or longer, to check the spread of it among the children. It seems to be the "flu" in a mild form. Mrs. William Gerlinger is looking for a residence and store property in Bemidji. Postmistress Carnegie, has just recovered from an attack of the "flu," and two of the children are still in bed with it. J. C. Souder is quite ill with the "flu," and his family is just recovering from it. Mrs. William Blakely's mother is spending the winter with her. The proposed dance has been postponed for the present.

\*\*\*\*\* HONOR MAY GO TO AFRICA \*\*\*\*\*

Ancient Egypt, sharing with ancient Babylonia and Crete the distinction in the world's thought of being, one or the other of them, the first seat of a flourishing civilization, may yet yield the distinction to some spot in Africa, perhaps the city of Benin, or perhaps some ruin yet undiscovered. Benin, whose great stone buildings surprised Portuguese explorers in 1482, has of later years given archeologists a vivid interest in this part of British West Africa. Objects found there show a method of casting bronze that was practiced by the early Egyptians, and evidence accumulates that the civilization of Benin may have forerun Egypt or Babylon, to say nothing of Crete.

\*\*\*\*\* TANIAC \*\*\*\*\*

and system builder Tanlac is without an equal. This is a statement of fact, and is fully supported by recognized authorities. According to all accepted reference works, including the U. S. Dispensatory, Encyclopedia Britannica, and the leading text-books used in the schools of medicine, the principal ingredients of Tanlac possess the most powerful re-constructive properties known to science. This statement is further proven by the fact that millions of persons who have actually taken Tanlac have testified to its extraordinary powers as a medicine. Tanlac restores health and strength to the weak and run-down system by enabling every organ of the body to perform its proper function in the way nature intended. It creates a good, healthy appetite for wholesome, nourishing food, and is an ideal strengthening tonic for persons who are in a run-down condition and who are suffering from the after-effects of hard winter colds, gripe, or bronchial troubles. Irrefutable evidence of the re-constructive powers of Tanlac is shown by the fact that it was used by tens of thousands during last year's epidemic with splendid results. One well-known Texas physician stated that he had never found anything to equal Tanlac for building up his patients who had had influenza, and that he had treated over fourteen hundred cases in one month. In connection with the Tanlac treatment, keep the bowels open by taking Tanlac Laxative Tablets, samples of which are enclosed with every bottle of Tanlac. Tanlac is sold in Bemidji by the City Drug Store, in Kelliher by Mrs. R. Sterling, in Blackduck by French & Moon, in Baudette by J. Williams, in Thorhult by P. M. Swanson and in Spooner by J. Weeks Hardware Co.

# WARD OFF INFLUENZA BY KEEPING IN BEST PHYSICAL CONDITION

Persons Who Catch Cold Easily and Who Are Weak and Run Down Are Earliest Victims.

DANGER IS TOO GREAT TO TAKE ANY CHANCES

Build Up Your Bodily Powers or Resistance by Taking Tanlac and Fortify Against Attack.

Much of the difficulty experienced by health authorities in checking the spread of influenza lies in the fact that it spreads with almost lightning rapidity. Although state and city authorities have succeeded in keeping it under control in some sections, the disease has gotten entirely beyond control in others. It is universally agreed by all well-informed persons that the surest preventive is to get the system into the best possible physical condition, in order to be able to throw off the infection. It has been stated that it is possible to perfect the powers of human resistance so that it can throw off almost any infection, not excepting Spanish Influenza, which is generally supposed to be one of the most contagious diseases known. Medical authorities agree that people who are weak and run-down are the earliest victims of the influenza epidemic. If you find yourself weak and losing flesh, or if you are in a generally run-down condition you are really in danger if you should come in contact with the influenza germ. As a powerful re-constructive tonic

The Velvet tin is twice as big as shown here

## There's a World of Solid Comfort In the Rich, Red Tin

YES, sir, we mean that same warm red and gold tin that smiles a welcoming "Howdy" to you in every tobacco store. Know what those colors mean?

The red is for the friendly warmth, the mellow cheeriness, that Velvet puts into your old pipe. And the gold is where the Kentucky sunshine, that ripens good old Velvet, has just sort of soaked through.

Remember what Velvet Joe said about it?

"You've met canned meat and canned music. Ever see any tinned sunshine? Well, look into any Velvet tin."

And think this over:

We don't have to hide Velvet's taste or smell with a lot of this, that and the other thing. Because Velvet has naturally what pipe smokers want—real simon-pure tobacco taste and fragrance. It's just good, honest Kentucky leaf, made still more friendly and mellow by two years' ageing in wooden hogsheads. Just good tobacco. That's all. But it's mighty near enough for the man who wants a pipeful of tobacco and not a box of bon bons.

The picture of a pipe on the tin needn't keep you from rolling a jim-dandy cigarette with Velvet.

How's the Velvet holding out in your old red tin?

*Liggett & Myers Tobacco Co.*
