

THE TWENTIETH CENTURY LIMITED

Are You in Favor of This?

Now that they have had drives for nearly everything imaginable, and to raise money for all the other unfortunate, why not stage a drive to raise money to buy automobiles for the poor pedestrians?

Internationally Fair

President Clark of the Fair association has stated that he would like to make the fair here an international fair, so that exhibits might be entered from Canada. If that means bringing to Bemidji many articles which have been frequently termed in our courts as "Exhibit A" it might prove to be an attendance-getter.

—Would Be a Prize—

Generous Youth

Dear Twentieth Century—Since The Pioneer does not run any "Hints to the Lovelorn" department or anything similar, I have finally decided to ask your opinion on this all-important question.

After taking my best girl to dinner, theatre, supper and taking her home in a taxi, should I kiss her good night?—I wonder.

No, poor boy, you have done enough for her already.

—Good Night!

A Cut-Up Joint

A curious one inquires if a butcher shop has any other name.

Our opinion is that it might be called a meeting place. But, at that, a butcher shop does not possess the variety of names that has been given to some butchers.

—Impossible—

Pa Ought to Know

The mother of one of Bemidji's largest families thinks that she ought to get a nurse for the baby. Father's opinion does not correspond. He thinks what they need is a night watchman.

—Ain't It a Fact?—

Live Stock

Calves are said to be getting more attention in the city than they are in the country. But this is not due to the greater activity of the S. P. C. A. in the city, we are informed.

—Have You Noticed?—

Isidor Vas Rite

your subscriptions will be from the credit standpoint. And that's what you are after—credits—or you should be after them if you expect to be one of the prize winners. The Pioneer gifts are to be distributed to those who deserve them and who make the best records in the credit column. The club members with the highest scores will be given the Buick four.

The big majority of club members have decided that from now on this campaign will receive more serious consideration than in the past. This can only mean that such an avalanche of credits will pour forth that this drive will become famous. There will be "lots doing" when the big wave of credits will pour forth that the participants get into real action toward the big goal—the \$120 Buick four. And it is for this, seemingly, that everything is measured.

Credits will be counted at 8 o'clock Wednesday night, and the standing published Thursday.

AARDAHL YOUNG PEOPLE HOLD INTERESTING MEET

The Aardahl Free Lutheran Young People's society met Sunday evening at the church in regular session with Carl Opsata, president, presiding.

Rev. O. P. Grambo, pastor, was present and, besides giving an interesting and instructive talk, greatly enlivened the meeting with his jolly and witty manner.

Missionary W. S. Cummings of Bemidji was also present and sang and talked to the audience. The end of the session consisted of business matters. Among them the voting to accept the repainting of the interior of the church, which was done by Mr. Thompson. The cost of this work which was \$165 was borne entirely by the Young People's society which is an indication of the spirit and cooperation shown by the young people.

A basket social will be held early in the evening next Saturday at the Langerak farm home.

YANKS AND GIANTS TO OPEN SERIES WEDNESDAY

(Continued From Page 1)

New York, Oct. 3. (By Henry Farrell).—The question on the tongues of New York baseball fans today is "Who is going to win the world series, the Giants or the Yanks?"

There is no distinct faction following each club like there was back in 1906 when the Cubs and White Sox had their own parties and fans in the Windy City. Giant fans are Yank fans, and Yank fans are Giant fans.

It is being left to the series itself to prove which team has the greater hold. Even money prevails in the little betting that is going on as the Manhattan club prepares for the opening clash Wednesday. Professional gamblers offer 10 to 9 bets and are allowing the better to take his own choice of teams.

Lots of freak wagers are being made on individuals. An offer of 8 to 5 that Babe Ruth hits a home run during the series is quite common.

The influx of persons for the series always so apparent in the smaller cities, is not noticeable here. Outside of talk on the street corners and an occasional word in the subways, strangers do not know anything about what is taking place.

Much more interest was shown over the Yank-Indian series due to the fact that all New York was behind the Yanks in the struggle for the pennant. Still there is no lack of interest in the series, but the city is taking it in its characteristic blasé manner. It is expected that at least 40,000 will attend each game. The Giants have sold all of their boxes and reserves and the Yanks have only a few seats left.

This statement definitely confirmed rumors that have been afloat ever since Mrs. McCormick exiled herself in Switzerland about eight years ago.

Mr. and Mrs. McCormick are living apart, the statement said. "It is not known whether divorce proceedings will be taken. No steps have yet been taken toward any legal action," it stated.

"NEW-WOMAN" IDEA IN CHINA

Modern Agitators Work Along Lines That Would Rid Orient of "Clinging Vines."

About the only thing of modern times to which China has not laid claim as being so old in that country that it was outworn and discarded centuries ago, is the new woman with a magazine of her very own, published in the interest of her development. This publication, observes the Pittsburgh Dispatch, called the New Woman, boldly states as its object the reform of the old society to give a more honorable place to women, and the new woman is described as "a joyous being, of honest occupation, complete personality, free, independent and mutually helpful."

Yet the new woman of China comes in for some criticism, for among the things she is exhorted to cultivate are plain living and dressing, which, the writer goes on to say, was the rule in old China, but that now women wish to keep up with the styles and wear jewels. They are reminded that the chief thing about good dressing is to wear clean clothing. Another admonition to the new woman of China which might indicate she is prone to err, just like the new woman of any other land, is that she put far away from her the desire for empty glory of "face."

In other respects the things commended for the new woman seem to be along the same lines as in other lands—the cultivation of strength of will to go outside the home and mingle with others and take part in public affairs, and to discard the clinging habit of looking to the men for everything.

Harassing Wheat Pests.

Plant pests cause the loss of millions of bushels of wheat in the United States, and if all the wheat now destroyed annually by these pests could be saved and made into flour the United States Department of Agriculture says it would add approximately 29,000,000 barrels to the yearly output of the nation. The annual production of wheat in this country for the four-year period 1916 to 1919, inclusive, was 783,949,500 bushels. The annual loss from disease during this period was 147,318,000 bushels. While it is not possible entirely to eliminate wheat disease, it is possible to much reduce the toll. One branch of investigation in the bureau of plant industry is to work out the preventive measures for the diseases of all cereal crops.

Embarrassed.

I longed to tell her, and yet my tongue clove to the roof of my mouth; would she understand, I wondered? I had known her but a scant month, and yet I felt as though I had known her for months, aye for years, and yet. . . How can one tell a woman that she has forgotten to rouge both sides of her face?—California Pelican.

A flat-iron will serve the purpose of a can opener. Simply put the hot iron on the top of the cover of the can, leave it a few minutes and the can will open easily.

Machine Measures Golf Drive.

Golf enthusiasts bent upon developing an ability to make long drives can measure their progress by means of a machine which has been invented to record accurately the length of drives. The machine consists of a steel pole on the top of which is a dial to the end of this cord. When the driver strikes the ball the force of the drive is recorded on the dial and the length of the drive, had the ball not been held by the cord, can be determined.—Pittsburgh Dispatch.
