

## To the Women of This Community:

In the fine art of purchasing -- of getting a full equivalent for their money -- men must concede the equality if not the superiority of women.

More and more the good judgment of women is helping men to select better-looking, better-fitting, better-wearing clothes. Faults in a garment that men usually would pass unnoticed become fatal blemishes in a woman's eye.

An expert woman examiner passes judgment upon every detail of a Kuppenheimer garment after it has been made. Her unerring eye goes over it inch by inch on the watch for the slightest flaws--pucker in a stitch, a wrinkle in the fit, an imperfection in the buttonhole.

No other clothes makers, so far as we know, do this. And no other makers produce garments so uniformly free of seen or unseen flaws -- garments that look on men as a woman's good judgment knows they ought to look.

This is a store of "equal rights" -- a store where women may shop or help men folks shop without feeling that they have intruded -- a store where they will find every provision for their comfort and convenience.

Folk dances, quint songs, and a lot of good music at the high school entertainment, Friday, March 12.

### GENERAL NEWS NOTES

Guadalajara--General Villa remained here Friday directing the operations for the extermination of the scattered bands of Carrancistas, remnants of the once formidable army of General Miguel Diegues, Carranza's governor of Jalisco.

London--The American note, the contents of which remain a secret but which in general seeks to bring about an understanding regarding the war zone prescribed by Germany and the shipment of food for the civilian population of the belligerent countries, was considered at a meeting of the cabinet Friday but thus far no intimation as to the official attitude towards it can be obtained.

San Francisco--A nation-wide, and ultimately a world-wide, boycott upon the purchase and use of Japanese products is the announced aim of a new Chinese society organized here Monday. The embargo has been started by Chinese-Americans in an attempt to force Japan to recede from her demands on the Chinese government. A propaganda-spreading campaign for the formation of similar societies in all of the larger cities was begun simultaneously with the organization of the parent society.

New York--The discovery of an anarchistic plot involving the assassination of Andrew Carnegie, Cornelius Vanderbilt, John D. Rockefeller and his son, and other wealthy men, and the organization of a reign of terror and looting in this city, was announced by the police Tuesday after they had arrested under dramatic circumstances a man who had just placed two bombs in St. Patrick's cathedral, where several hundred persons were worshipping. The sensational development was the climax of months of work by detectives in uncovering a conspiracy, which, they declare, projected the opening of a campaign of violence and bloodshed without precedent in New York city.

So carefully had the police worked out their plans that the anarchist even was allowed to light the fuse of one of the bombs which he carried into the cathedral despite the fact that the explosives were powerful enough to have damaged the edifice and possibly killed many in it. Scarcely had the bomb-carrier ignited the fuse when one of a half of a hundred disguised detectives who were stationed in and about the church, crushed the sputtering thread under his heel. The plotter was taken into custody just as he was about to light the fuse of the other destructive instrument.

El Paso--Reports from the highest authority which reached the border Tuesday told of the imprisonment since February 13 in the Chihuahua penitentiary of Leonard Worcester, Jr., an American mining man of Chihuahua City. Worcester has been held by the Villa authorities without trial or release on bond.

Berlin--In its reply to the American note concerning the German naval war zone, the German government agrees that under certain conditions, its submarines will halt and investigate merchantmen and will proceed against only such vessels as are found to be carrying contraband or are owned in nations hostile to Germany.

The reply declares Germany's readiness to accept virtually all of the American proposals except the one which would restrict the use of anchored mines to purely defensive purposes. The German government expresses the belief that belligerents cannot afford to abandon entirely the use of anchored mines for offensive operations.

El Paso--Outpost fighting between Gen. Alvaro Obregon's northern advance towards Queretaro and the southern movement of Villa forces from that city is reported in advices received from Carrancistas here. The fighting according to these advices, has resulted in the hasty withdrawal of Gen. Villa and a considerable number of his troops from the Guadalupe section, as it was feared their line to Aguas Calientes would be cut should the Carranza advance extend to Irapuato, the junction point.

Washington--Dispatches to the Carranza agency here, from Vera Cruz Tuesday, announced that the garrison at Mexico City repulsed attacks from three different points by Zapata and Gonzales Garza forces.

Washington--The United States will send a note to Great Britain and France in answer to the one received Monday inquiring what means will be taken in carrying out the policy of holding up supplies being carried to and from Germany.

President Wilson refused to discuss the subject in detail, but said no nation has the right to change the rules of warfare because the methods of war had changed. He indicated that the United States will not change its previously announced position but will continue to make efforts to have the belligerents respect American shipping of a non-contraband character.

London--If the combined fleets of Great Britain and France can prevent it, no commodities of any kind except those now on the seas shall henceforth until the conclusion of the war reach or leave the shores of Germany. This is England's answer to Germany's submarine blockade, and it is to be effective forthwith.

New York--Formal announcement was made here Sunday of the formation of an organization of the first reserves, to be known as the American Legion to be composed of former army, navy and militia men which will better insure the nation's preparedness in case of war.

Captain Gordon Johnston, aide-de-camp to Major General Leonard Wood, commanding the department of the east, made the announcement on behalf of a group of army and navy men, who, in an unofficial capacity, are acting with civilians in promoting the movement. Captain Johnston said that it is planned to establish within a short time a first reserve of between 250,000 and 300,000 former army and navy militia men for instant call in case of emergency.

Washington--Two discoveries, both of vast importance to American industries, and one regarded as a priceless military asset, were announced Sunday by Secretary Lane of the interior department. They are chemical processes, developed after years of research by Dr. Walter F. Rittman, chemical engineer of the bureau of mines. One is expected to enable oil refiners to increase their output of gasoline by 200 per cent; the other makes possible the production from crude petroleum of toluol, and benzol, bases for dyes and high explosives, for which, in the past, the United States and the rest of the world has depended almost exclusively upon Germany.

Dr. Rittman has applied for patents upon his processes to prevent the possibility of a monopoly of their use and will dedicate them to the American people.

## POLLOCK'S APACHE STRAIN SINGLE COMB RHODE ISLAND REDS.

Our flock of Reds are bred definitely for the production of eggs and meat and yet at three state fairs they have won ten out of twelve first prizes competed for. Our flock for the year of 1914 averaged 13 2/3 dozen eggs per hen. At the average price paid by our grocer for fresh yard eggs each hen earned \$6.15. You can do as well with the same quality of poultry. Opportunity is knocking at your door. Will you embrace it? Conditions in Europe make meat out of the question as an adequate food supply. For relief the world must turn to poultry and eggs. Start now to build up your business with this fact uppermost in your mind. We can help you. February and March are the months to hatch if you want eggs in fall and winter. We can sell you eggs or stock. Correspondence solicited.
