

DEMANGE IN FINE FORM

He Opened the Speech for the Defense in the Dreyfus Trial.

LABORI MAY NOT SPEAK

Max Regis a Notorious Jew Baiter, Arrives at Rennes.

RENNES, September 8.—The Lycee was crowded this morning at the opening of the Dreyfus trial. Standing room at the back of the court commands 15 and 20 francs.

Maitre Demange opened the speech for the defense. In eloquent terms and with an impressive delivery he brought out the strong evidence against Esterhazy.

Do you think, if Dreyfus and Esterhazy had been before the court martial in 1894, the court would have condemned Captain Dreyfus?

Council pointed to the prisoner sitting by him and added: "No."

He filled the room with his stentorian tones as he thundered with indignation at the charges against Dreyfus and the shameful weakness of the prosecution and in denunciation of Esterhazy.

Dreyfus was calm and cheerful. At 11 o'clock Demange announced that he would need two hours and a half to finish, so the court adjourned until 7:30 tomorrow.

A verdict is not expected before Monday. There was a rumor after the adjournment of court that Labori had decided not to speak in view of the irritating effect his every utterance has on the court.

It was generally noticed today that the two lawyers for the defense are apparently at loggerheads.

Great interest has been aroused by the arrival of Max Regis, a former mayor of Algiers and a notorious Jew baiter, which is considered a bad omen for the peace of the town.

INDIA FOR GOLD

The Yellow Standard to be Adopted Without Delay.

SIMLA, Sept. 8.—At yesterday's session of the Indian Council, the Honorable Baron Curzon of Kedleston, concurring in the statement of Clinton Dawkins, financial member, who introduced the currency bill, said that in the absence of a mini proclamation from England it has been decided to make gold the legal tender immediately in the conviction that no other measure would save India from disastrous embarrassment and fresh taxation.

Great interest has been aroused by the adoption of the gold standard, he said, would enable India to embark in a discussion with foreign powers and enter the field on equal terms.

Wool in Boston.

BOSTON, Sept. 8.—The American Wool and Cotton Reporter says: The trade as a whole reports a quiet market during the past week, but a few houses have consummated some good sized deals and as a result the total sales of the week aggregate a large total, one house alone disposing of about 2,500,000 pounds of wool, comprising 1,800,000 pounds of Montana. Most houses report a small business, but there is no diminution in the strength previously shown and wool continues to be still held, generally at top figures.

Manufacturers, it appears, have been testing the market for all it is worth and are doubtless satisfied that they have had a strong market to build against. All cheap wools are practically eliminated and old motley wools have been pretty well cleaned and gone into consumption, so that the markets present a clean stock and a price which is low today compared with that of other countries, particularly on fine wools.

There has been considerable looking around on the part of manufacturers and lots of sample bags have been taken with it is believed, will lead to a good business in the course of a week or two. Manufacturers are buying only such wools as they need, however, and little speculative, tendency is noticeable in the market today.

The sales of the week in Boston amounted to 190,500 pounds domestic and 440,000 pounds foreign, making a total of 630,500 against a total of 3,955,000 for the previous week and a total of 1,805,800 for the corresponding week last year. Sales since January 1, 1898, amounted to 191,377,500 pounds as against 79,894,010 pounds last year at this time.

A Steamship Ashore.

DETROIT, Sept. 8.—The passenger steamer State of Michigan is ashore at Colchester. The wrecking tug Saginaw has gone to her relief. The State of Michigan runs from Lake Erie ports and Detroit to Mackinaw. She was bound down.

Convict Burns Down.

OTTAWA, Ill., Sept. 8.—St. Xavier's Academy and the Sisters of Mercy convent was destroyed by fire early this morning. The inmates, sixty sisters and their pupils, escaped in night clothes without injury. Loss amounts to \$75,000.

Arrived at New York.

NEW YORK, Sept. 8.—Among the passengers who arrived on the Ward Line steamer Segurana from Havana and Mexican ports were General Canton and staff of the Mexican army. The general is governor of Yucatan.

Rear Admiral Pickling Dies.

WASHINGTON, Sept. 8.—A telegram received at the navy department announces the sudden death this morning of Rear Admiral Henry F. Pickling, commandant of the Boston navy yard. Heart disease was the cause.

WANT PROTECTION.

People of Santo Domingo Tired of Tyrants and Insecurity.

KINGSTON, Jamaica, Sept. 8.—Dominican mass advices just received here say an apparently enthusiastic and ostensibly national demonstration prepared in Santo Domingo for Juan Isidro Jimenez, leader of the successful revolution in that country, by General Imber and the leader of the successful mediate political faction, is not altogether representative of the real popular sentiment.

It is now beginning to appear that while the whole nation accepted the revolution on a tacit understanding that the intolerable incubus of party politics would be permanently removed by securing an American protectorate, Jimenez's party was working for his personal interests, to establish what they now propose to utilize the victory, if they can, to compass his constitutional election, in spite of the growing popularity of General Hacerio Vasquez, provisional vice president, who was the real leader of the revolution and is the real hero of the hour.

Advice add that unless the person selected either adopts the popular aspirations or as alternative succeeds in giving his country immediately an administration combining sovereign independence with that of financial stability, industrial progress and complete internal political freedom, to which she has long been a stranger and which the people are fully determined to secure at any cost of bloodshed or even partial surrender of sovereignty, another revolution will surely follow.

In conclusion, the advices say the foreign interests in Santo Domingo are watching developments with the keenest anxiety.

No News From Venezuela.

WASHINGTON, Sept. 8.—Neither the state department nor the navy department had further advices today from any official source regarding the impending revolution in Venezuela.

Closed Today.

PHILADELPHIA, Sept. 8.—Festivities attending the national encampment of the Grand Army of the Republic closed today with a naval pageant on the Delaware river.

Communicated.

Section 094 of the compiled laws of 1897 says: "The board of county commissioners shall cause to be published once, within fifteen days after the close of every regular or special meeting, an abstract of the proceedings had, and an itemized statement of all sums of money allowed, and for what purpose and to whom allowed, in some paper of general circulation in their county."

Instead of publishing the proceedings in fifteen days' time, according to law, the commissioners or the clerk or whoever is responsible allows himself a full four months or eight times the period required by law. Section 095 of the revised statutes prescribes a heavy penalty for this evasion of the law as follows:

"Any county commissioner or clerk of any board of county commissioners who shall willfully fail or refuse to perform the duties prescribed in the two preceding sections, or shall violate the provisions thereof, shall be deemed guilty of a misdemeanor and upon conviction thereof before the district court of the proper county shall be punished by a fine of not less than fifty nor more than five hundred dollars for each offense."

Now, what does the board propose to do about this matter? Certainly if the writer was a member of that body, or even the county clerk, he would endeavor to obey the law.

TRANSVAAL TROUBLE

Ministerial Meeting in London Attended With Much Interest.

WAR PREPARATIONS CONTINUE

It is Possible, However, That Trouble May Be Averted by the Ministers.

LONDON, Sept. 8.—The cabinet council today attracted greater public attention than any meeting of the ministers in years past. A well dressed crowd thronged the precincts of the foreign office throughout the session. The ministers came out, arm in arm, laughing and chatting, greatly contrasting with the manner in which they went in. Lord Salisbury received an ovation. Although the foreign office has not given out a statement, the general impression was that no ultimatum would be sent the Transvaal at present and a time limit will be placed for a conference at Cape Town. The short duration of the council and the early departure of the military men summoned were taken as indications that the situation is more pacific, though, of course, this is only a surmise.

FEW TROOPS IN THE NATAL.

LONDON, Sept. 8.—The correspondent of the Times at New Castle, Natal, says: There would be little surprise here if the Boers assumed the aggressive immediately. It is a matter of astonishment that so few British troops are in the country, especially on the western border.

MORE ORDERS TO LEAVE.

BOMBAY, Sept. 8.—The Nineteenth Hussars and Twenty-first field battery of artillery have been ordered to leave Secunderabad for Transvaal.

GETTING OUT OF BOERLAND.

JANNEZBURG, Sept. 8.—Anxiety here in regard to the crisis has been intensified by the tone of the debate in the Natal. The railroad offices continue to be besieged by those waiting to get out of the country.

ARMED BOERS ON THE BORDER.

LONDON, Sept. 8.—A special dispatch received today from Lady Smith of the Natal says the British troops there are actively engaged in manœuvres. The Natal says the British troops there are actively engaged in manœuvres. The Natal says the British troops there are actively engaged in manœuvres.

OFFERING TRANSPORTS.

LONDON, Sept.—Many ship owners have called at the offices of the admiralty and offered vessels for transports. They were told, however, that nothing will be done in this direction until the cabinet council has decided on action taken in regard to the crisis. The Evening Standard to day says: "A general feeling is prevailing in all the public departments and clubs that hostilities is inevitable."

TO BE OR NOT TO BE.

Miles' Going to the Philippines Subject of Debate.

CHICAGO, Sept. 8.—A special to the Record, from Washington, says: General Miles will go to the Philippines to direct military operations during the approaching campaign. This statement is made upon the authority of one of the highest officials of the department.

NEW YORK, Sept. 8.—A special to the Journal-Advertiser, from Washington, says: After forty-eight hours of almost constant discussion between the president, Secretary Root, Professor Schurman, Senator Beveridge, General Miles and Adjutant General Corbin, it may be stated positively that General Merritt will go to the Philippines.

STUDIED CLIFF DWELLERS.

The Work Recently Performed by the Normal University Scientific Party.

The principal work of the scientific expedition recently organized by President Edgar L. Hewitt of the University Normal school was upon the cliff dwelling region lying west of the Rio Grande, extending to the Jemez mountains on the west, to Santa Clara canon on the north and to the Pajarito on the south. This section was quite thoroughly explored and mapped. It comprises a district approximately ten miles wide by twenty miles long. It includes twelve canons of considerable extent and many canons. The principal large canons are the Shufone, the Puye, Ojo de Aguis, Chupaderos, Juégo, Los Alamós, Sandia and the Pajarito. All these canons contain more or less dwellings in their walls, the Puye, Chupaderos and the Pajarito having been densely populated, each canon containing dwellings sufficient to accommodate a population of not less than 5,000 persons. The entire region explored contains not less than 10,000 cliff dwellings, and on the adjoining mesas the ruins of about twenty stone-forts and pueblos were located. A number of these were carefully mapped and plans drawn therefrom.

The Puye was the especial object of study. Here the entire cliff was mapped in detail, every dwelling in it (about 800), being explored and located. This cliff varies from 100 to 200 feet in height and comprises two ledges, each ledge being full of dwellings, there being in places as many as six levels or stories of dwellings.

The Puye presents especially interesting problems for study because of the evidences of re-occupation by the Pueblo Indians, notably within the century preceding the coming of Spaniards, the original occupation of the cliff dwellings doubtless antedating this many centuries.

Among the problems studied it length were the development of architecture from the natural cave to the terraced pueblo, the development of the useful arts as shown by the various petroglyphs on the face of the canon. In the latter study, every character found on the cliffs of the Puye was photographed, so as to be preserved and made accessible for future study. This systematic working out of the various problems of prehistoric civilization in New Mexico has not heretofore been attempted. Further rooms in the old stone fort upon the Puye were excavated and yielded a considerable amount of interesting material for the museum of the normal university in this city, including implements of war, pottery, the various domestic utensils of stone and bone, and one stone idol of especial interest because of being worked out entirely in bas relief.

A preliminary paper concerning the work of the expedition will be issued in the near future, and a number of bulletins will be issued later in the year upon the various phases of the work that has been inaugurated. It is the opinion of President Hewitt and all members of the party that a most interesting and profitable field for research has been opened up.

Mexico—An Ideal Resort for the Tourist in Summer or Winter.

Although not generally understood by the traveling public, there is a vast section of Mexico—the section traversed by the main line of the Mexican Central Railway from the United States border to the Mexican Capital—which enjoys during the heated term in the United States, a much more comfortable climate than the American summer resorts. This is due to the altitude of the table-land on which the road is located—from 3,000 to 5,000 feet above the level.

The average temperature of this section, according to government statistics for a number of years, has been between 60 and 70 degrees Fahrenheit.

Along the line of the road are to be found the chief cities and principal points of interest in our sister Republic, while on its branches there is scenery of marvelous grandeur.

Special tickets of greatly reduced rates are on sale at principal ticket offices in the United States and Canada, all the year round, to Mexico City and principal points on the Mexican Central railway.

The Mexican Central is the only standard gauge with Pullman buffet sleeping cars from the United States to the City of Mexico without change.

For rates, reservations in sleeping cars, printed matter and general information, apply to Com' Agent, H. J. KENNEDY, 112 Broadway, New York, N. Y.
