SPOT WHEAT WAS IN DEMAND
 JULY CLOSED 1 1/2-CENTS HIGHER—SEPTEMBER AND DECEMBER GAINED.

Higher Liverpool Cables and Unfavorable Corn Weather Started Wheat Higher and Anxiety of Shorts Kept It Up.

CHICAGO, July 28.—A pressing demand for the spot article, together with the advance in corn, strengthened wheat to-day. July closed 1 1/2-cents higher; September rose 3/4-cent and December advanced 1/2-cent. The market was quiet, with a few scattered transactions. The weather was generally favorable, with a few showers.

Higher cables from Liverpool and unfavorable weather for corn started wheat higher.

The reaction theory again seemed to favor some recovery. The drop for the past few days has been such that the trade seemed to come to the conclusion that it was a good time to buy. Shorts were disposed of and a recovery of 1/2-cent was more or less demanded for the long account. Later when numerous crop damage reports about corn were being received and the market for that commodity began to be considerably affected by them, still further interest was imparted to wheat. A considerable shortage and this caused a bullish feeling. July shorts became anxious and covered freely, and this month showed more strength than anything else. Bids on a basis of yesterday's cash prices were in the market here for the first time since the Kansas No. 2 hard, but the wheat could not be secured. Chicago received 130 cars, against 172 last week. The market for the first time since the Kansas No. 2 hard, but the wheat could not be secured. Chicago received 130 cars, against 172 last week.
