

FIGHT GETS WARM

COMMISSIONER WARD'S ENEMIES ARE AFTER HIS SCALP.

IS UNFRIENDLY TO SALOONS

PENDERGAST CROWD WANTS BOARD FAVORABLE TO SALOONS.

A Caucus That Was Held With St. Louis Politicians Tuesday Night to Secure Their Assistance—Another Quarrel Imminent Locally.

Not satisfied with having secured the passage of the obnoxious police and election bills, the Pendergast faction of the Democratic party has determined to make another change in local political affairs that will be to the advantage of the few who stand in with the Gregory-Pendergast clique. The latest scheme that has been evolved from the minds of the ring politicians is to elect Police Commissioner Hugh Ward. The ire of the Pendergast gang has been aroused by the antipathy for the saloon element that has been manifested by Mr. Ward. Some of the saloon men do not like Mr. Ward's attitude toward them, and Pendergast is not pleased with him because the youngest member of the board does not bow before the boss alderman.

"We don't like Ward because he's 'stuck up' and too much of a dandy," said a Pendergast yesterday. "Gregory mixes with us, and is a good feller, but Ward won't do."

The secret of the whole affair rests with a few men who are working in harmony with the St. Louis brewers. The St. Louis police board is composed of five members, three of whom are friendly to the saloon men.

Dr. Foster and Tony Steuwer are two of the members of the board who are friendly to brewers. Tony Steuwer has gone far out of his way to meddle with Kansas City politics. This is accounted for when it is remembered that Steuwer is friendly to a brewery that is interested in controlling the police board of this city.

Louis Lemp has been in this city frequently, and his pull with Governor Stephens rests upon the warm friendship that exists between young Lemp and Charles Leonard, of St. Louis, who is Stephens' brother-in-law.

Ward was an active worker in the movement to close the Main street saloons. He is anxious to close many Twelfth street places, and his attitude on this question has caused his enemies to lose no time in going after his scalp.

Several local Democrats were in St. Louis a few days ago and held a caucus with the St. Louis men who are anxious to arrange matters so that the Kansas City police board will have a majority that is friendly to the saloon element. A caucus was held Tuesday night.

The Pendergast men claim that the governor was anxious to appoint a board at St. Louis that would be friendly to the saloon element, and that the chief executive will be a party to the scheme to make a similar change here. When the governor will in effect the governor will have the power to appoint new commissioners and Mr. Ward's enemies are working hard in waging war upon his reappointment.

ON THE MARKET.

Fruits and Vegetables Are Plentiful—Strawberry Stocks Confined to the Home Supply.

The housekeeper who goes to market in Kansas City these days is not troubled with a lack of things to buy, rather is the supply so plentiful and varied that it puzzles an old customer to select. Fruits and vegetables of every kind are coming in every day in such quantities that the wonder is what becomes of them. But they disappear each day and the market is kept next with a fresh and even greater supply. And the price is within the reach of all. Strawberries are yet the staple fruit, and are almost wholly confined to the home grown variety, which have almost driven the Arkansas berries out of the market. The ruling price is 10 cents a box, or three for 25 cents for a box, although a very fair berry is sold at 5 cents a box.

The Olden fruit farm has sent in the first shipment of its cherries, which retail at 10 cents a box, the quality being far ahead of the California cherries that have been on the market. The cherries have arrived in sufficient quantity to supply almost any demand and retail at 10 cents a box, and a few related last summer's apples sell for 10 cents a dozen. The first shipment of green cantaloupes has been received and will sell to-day at 15 cents apiece for the largest. Very small ones retail at 10 cents and 10 cents for 2 cents. Radishes and onions, three bunches for 5 cents; asparagus, three bunches for 10 cents; tomatoes, two bunches for 10 cents. New potatoes are coming in in large shipments and the price is gradually being forced down. To-day they will sell at 35 cents a peck.

ANOTHER NEW FACTORY.

Warner Spoke and Handle Plant Will Begin Operations This Morning.

Another new factory will be added to Kansas City's list of industries to-day when the Warner Spoke and Handle Manufacturing Company begins operations. Everything is in readiness, a carload of lumber is at the mill at First and Lydia, and there is nothing to do but to set the machinery in motion and to begin work.

The capacity of the new factory is 3,000 handles a day. The factory will confine itself to making spokes and handles of hickory, and the timber used is hickory and pecan and it comes from Arkansas and the Indian Territory.

W. H. Warner, sole proprietor, and manager of the new factory, said yesterday that he would be able to begin work on the start, but in two or three weeks, if everything went well, he would put twenty-five or thirty men to work.

"There is a great demand for all these articles in Kansas City," said Mr. Warner, "and no local factory is supplying it. I already have large orders from Richards & Coover and the Gilie Hardware Company. These two firms alone will almost keep me busy."

ITCHING HUMORS

Speedily and irritations instantly relieved and cured by our new CUTICURA Soap, to cleanse the skin, gentle application of CUTICURA Ointment, to heal the skin, and mild doses of CUTICURA Resolvent, to cool and cleanse the blood.

GREAT WHOLESALE Millinery Stock

TO BE THRESHED OUT QUICKLY.

A big Wholesale Millinery House on Wabash avenue, Chicago, had a small fire in the stock room and trimming room. The insurance companies took the entire stock, although goods in all other parts of the house were in no way damaged, except by the hurried moving out. Sailors, Trimmed Hats, Hat Shapes, Flowers, Braids and Trimmings are marked at prices to save thousands of dollars to the ladies of Kansas City. The goods are all strictly in style and are of excellent grade throughout. It took two of the largest sized freight cars obtainable to carry the goods to Kansas City. It's all on the Sixth floor and is selling with a rapidity that is startling, even on this floor of many surprises.

WITH SUCH SPLENDID SELLING AS THIS WE OPEN

Our Great Summer Sale

Several hundred assorted hat shapes, slightly soiled, worth regular up to 25c and 35c. In this sale, choice of lot, 10c

Hundreds of assorted hat shapes, in Ladies' and Misses' styles, all this season's goods, in practically perfect condition, choice of lot, each, 10c

No. 12 and 16 All Silk Ribbon, in cream, white and light shades, 35c a bolt, a yard, 5c

MORE KANSAS CITY FACTORIES.

President-elect Brinkman Believes That is the Best Line of Work for the Manufacturers' Association.

George L. Brinkman, the newly elected president of the Manufacturers' Association, became so much against his will. Mr. Brinkman is a modest man and told the directors that there were others more capable but the board, knowing Mr. Brinkman's business record in Kansas City for many years and his energy and progress...

Incidentally, the County Treasury Will Be Replenished and the Sineas of Politics Furnished—Pendergast Will Be the Favored Ones.

COURT'S WAY OUT

President-elect Brinkman Believes That is the Best Line of Work for the Manufacturers' Association.

County Assessor Bower's request for ninety deputies to make the 1900 assessment was granted by the county court yesterday. The deficit in the revenues of the county is largely charged to Assessor Bower's low assessment, which has not provided sufficient funds to pay the horde of clerks and deputies. Mr. Bower says the inequality of the assessment has caused the trouble. Much of the improved property, it is claimed, has never been assessed and this is to be corrected by the deputies who will begin work next Monday morning. They will receive \$100 per month.

In 1897 the county court allowed the assessor thirty men to do the work. He made application for seventy, but the court refused to grant his request. For the year 1898 the assessor was allowed only thirty men. He asked for seventy again, but was turned down. The deficit in the revenues of the county has alarmed the court.

When the assessor had thirty men to make the assessment the claim was made that the men would be killed to death. The assessor, however, followed out the plan of his predecessors and copied the old books. But few of his men went into the county to make a new assessment. The old plan was easier. The understanding is that County Assessor Bower is to go into the field with his deputies and not make copies of the books already in his office. In this way all of the improvements made on property can be accounted for, and the difficulty in discharging deputies will be averted.

Assessor Bower has already made out a slate for appointment, but does not propose to give it out until later. It is understood that the spoils will be equally divided between the Shannon and the Pendergast factions of the Democratic party. The Pendergast will be favored if possible in the makeup of the slate, for the assessor has always leaned in that direction. The present crop of officials are going out anyway, therefore it is counted that the Pendergast have sixty men out of the ninety to be appointed, and that these sixty will assess in Kansas City, while the Shannon will assess in the rural districts.

Under the present plan the assessment of Jackson county will cost three times the amount heretofore and the pay roll will run up into the thousands, and will only be curtailed when it is impossible to secure any more money from the treasury. Many predict that the old books will be recopied in the country districts as very few improvements have been made, and properties in the country are not as susceptible to change as those in small towns and in Kansas City.

The graduating exercises of the Lincoln high school will take place to-morrow night.

TEACHERS ARE EXAMINED.

Ward School Applicants Are Through—Ward Principals and High School Instructors' Ex To-day.

About 100 applicants for positions in the ward schools took the teachers' examination held at the Central high school yesterday and Wednesday. They were examined in grammar, music, civil government, pedagogy, geography, United States history, arithmetic, orthography, drawing and physiology.

The examination for positions as principals in the ward and teachers in the high school will be held to-day. English literature, physics, geometry, general history, chemistry, physical geography and algebra will be subjects of the examination. The names of those who pass will not be determined until next week.

The examining committee consists of Principal G. B. Logan, of the Humboldt school, R. A. Minckwitz, teacher of Latin and Greek at the Central high school, and Miss Gertrude E. Greene, principal of the Irving school.

HOD CARRIERS ARE HAPPY.

Their Trouble With the Boss Plasterers Has Been Adjusted—All at Work Again.

The disagreement between the Hod Carriers' union and the Boss Plasterers' Association was finally wiped out yesterday through the signing by both parties of an agreement for the year, by which the right of the union to exercise a certain control over its members was admitted. A considerable number of boss plasterers, mostly outside the association, had already signed the agreement and but few jobs were tied up and few hod carriers idle.

This morning all the men will be back at their places and every building job goes on as before the trouble.

NATIONAL ORGANIZER IS HERE.

Ed J. Smith, national organizer for the Chalkmasons' union, arrived in Kansas City yesterday afternoon, coming here from Topeka. Since Mr. Smith was here several weeks ago, he has been working all through the cities this side of the Rocky mountains and reports himself highly pleased with the condition of labor in general, and his trade in particular. Mr. Smith will be in Kansas City for a week or more, working mostly on the Kansas side.

Small Pay of Russian Officers.

The pay of a Russian army officer is said to be very small. A general gets from \$1,500 to \$2,000 a year in English money, according to the length of service; a lieutenant general from \$1,175 to \$1,750; a major general from \$750 to \$1,250; and a colonel gets \$500.

Nature makes the cures after all. Now and then she gets into a tight place and needs helping out. Things get started in the wrong direction. Something is needed to check disease and start the system in the right direction toward health.

Scott's Emulsion of Cod-liver Oil with hypophosphites can do just this. It strengthens the nerves, feeds famished tissues, and makes rich blood.

NEW TANNERY PROJECT

He is Trying to Interest Local Capital to Establish a Plant to Use the New La Veolietan Process.

Captain Charles S. Walter, of the City of Mexico, is here to confer with local capitalists regarding a tannery to be located in Kansas City and to employ the La Veolietan method of tanning. Captain Walter organized the Veolietan company, of the City of Mexico, and is the present manager of the factory. The method, known as La Veolietan, employed in the United States, is comparatively new. It originated in France and is much shorter than the old method. A superior quality of leather, it is claimed, is produced by it.

"We have all the necessary kinds of wood in Mexico," said Captain Walter yesterday at the Midland, "and canals root is found in abundance. We do not have to cultivate the plant; it grows wild and the supply convenient to our factory is equal to all present demands."

"La Veolietan Company is one of many factories in a syndicate. I left the Pacific Steamship Company to go into the paper manufacturing business in Mexico, several years ago, and being in the syndicate, I know how to establish a leather factory a year ago. It has proven very successful. The syndicate, with a capitalization of \$75,000,000, was organized by Spanish and French capitalists, among them the well known firm, Roves y Cia, successors to Barreche y Cia.

"It controls all the principal manufacturing industries of Mexico and his concessions from the government in the way of lands, privileges, and exemption from taxes for ten years. The tariff on goods manufactured in Mexico is made prohibitive for the benefit of the enterprises in the syndicate. We have besides our leather factory, the San Rafael paper factory and about 120 cotton mills.

"No country offers such inducements to capital as does Mexico. It is cheap; \$1 a day for an engineer, 25 cents a day for a fireman and 15 cents to 25 cents a day for ordinary workmen. That is in Mexican silver currency. The laborers are Indians, and they work long hours, from 6 a. m. to 8 p. m., and sometimes later.

"There is no labor question where a strike or walkout is unknown. If a man is not kind to work in the morning, a man can be taken from the crowd of 100 or more about the plant and accommodated elsewhere. They become quite prudent and where they fall below the standard of skill in the country, they are made up for it in the longer hours.

"Our products sell for enough money in silver, and depreciated currency, to equal your prices here on similar products. All this has grown up within the last ten years. But would free silver be a good thing for the United States? Most certainly not! This country has always been on a gold basis, and is still on a gold basis. A change to a depreciated currency would be ruinous. It would cheapen labor, double the burden of debt, devalue and national contracts, to be paid in gold, while other obligations would be cut in two. The country would be wrecked financially. In Mexico the basis has been silver and commerce is sustained and accumulated to it. There was little gold mined in Mexico in the early days.

"At one time it did not pay to mine silver that ran \$120 to the ton on account of the expense. It used to be sent to the Denver smelters. Recent improvements in machinery make it profitable to smelt ore at \$10 a ton and to have our own smelters. As a result, vast quantities of the white metal have been put into the currency and

industrial for the past ten years has given us great prosperity.

"The secretary of the treasury said recently in a report that prosperity would continue even though the value of silver should fall 25 per cent more. Some of our silver goes to Central and South America, and to China, but our own circulating medium continues to absorb a great portion each year of the output of the mines."

M. QUINN, 549-551 MAIN ST.

18,000 lbs FINE STANDARD GRANULATED SUGAR at 28 lbs for \$1.00

We bought this Sugar for spot cash at one-half of its actual value. It was stored in a warehouse in the West Bottoms, recently destroyed by fire. Some of this sugar is a little damp, but it does not injure it in the least. It's the biggest snap we ever had on sugar, and THIS OFFER IS ONLY GOOD FOR TO-DAY, positively.
