The First Complete Novel by the Author of "Uncle Remus."

Nine persons out of ten would probably, if asked, place Joel Chandler Harris among the novelists. The fact is, however, that the famous creator of Uncle Remus has never published a novel, the nearest approach to it being "The Making of a Statesman," which might be ranked in the category with much of Bret Harte's work, either as a long story or as a novelette. All his other work has been juvenile books, verses or short stories. Probably no other living author has established so wide a fame without having written a novel. This fall Mr. Harris will make his bow to the public as a novelist in "Gabriel Tolliver," which will be published by McClure, Phillips & Co. The scene is laid in Georgia, and the time is the reconstruction period just after the civil war. So far as the story has a purpose, it will show the evils and injustice caused by the carpet-baggers from the North to organize the negroes and influence them against the whites. It is written, however, entirely without bitterness, and even in the fanatical Massachusetts "Yankee," whose indictment of race hatred among the blacks leads to his tragic end, the author's kindly eye sees the high and fine qualities of the martyr to a mistaken cause. A number of the characters of Mr. Harris' short stories reappear in this novel. The book will be published the first week in October.
