

Eat What

You want of the food you need
Kodol will digest it.

You need a sufficient amount of good wholesome food and more than this you need to fully digest it. Else you can't gain strength, nor can you strengthen your stomach if it is weak.

You must eat in order to live and maintain strength. You must not diet, because the body requires that you eat a sufficient amount of food regularly.

But this food must be digested, and it must be digested thoroughly. When the stomach can't do it, you must take something that will help the stomach. The proper way to do is to eat what you want, and let Kodol digest the food.

Nothing else can do this. When the stomach is weak it needs help; you must help it by giving it rest, and Kodol will do that.

Our Guarantee

Go to your druggist today, and purchase a dollar bottle, and if you can honestly say, that you did not receive any benefits from it, after using the entire bottle, the druggist will refund your money to you without question or delay.

We will pay the druggist the price of the bottle purchased by you. This offer applies to the large bottle only and to but one in a family.

We could not afford to make such an offer, unless we positively knew what Kodol will do for you. It would bankrupt us. The dollar bottle contains 2 1/2 times as much as the fifty cent bottle.

Kodol is made at the laboratories of E. C. DeWitt & Co., Chicago.

Womanly Wisdom.

If you would be farsighted you must learn to live on the heights.

Happiness consists often in just forgetting.

Quit worrying over things you can not help.

Any old magazines lying around out of use? Lend them to a neighbor who has none.

Fried ham is improved in flavor by sprinkling it slightly with sugar on both sides before frying.

Have a pair of canvas gloves near the wood-box, with which to handle the wood, take out the ash pan, etc.

Woman, what, downhearted? Then go outdoors and stay a few hours a day. Nature is a wonderful healer of weary nerves.

A glazier's knife will be found an excellent thing in the kitchen with which to scrape and clean the bottoms of pans and kettles.

She didn't think how it would sound: A widow erected a monument for her husband, with the inscription, "Rest in peace until we meet again."

When baking cookies or any small cakes, invert the pan and place them on the bottom. They are not so easily scorched and are more readily removed.

"I suppose you might say, look-in' at it one way, that liquor's great stuff to sort of even up things. Of course it takes shingles off a man's barn, but then it puts patches on his pants."

When pressing men's trousers, in order to take the bagginess out of the knees, press them first perfectly flat with the seams on the edges; then put the seams together and iron the crease down the front.

Ask the good man of the house to look at the supports of your swinging shelves in the cellar, before they come down under the load of canned things. Such a smash would be grievous, indeed. Don't risk it.

Many stores, even in rather small towns, have a "rest room" for those who come to trade. Perhaps you have not discovered this. Ask, next time you are in town and see how it is. And if enough people ask and ask earnestly enough, the stores which now do not have such places will soon get them.

Never buy spectacles of men who come along offering you great bargains. The chances are that you will not get a fit and you will pay more than the glasses are worth. The eyes are too precious to be tampered with in any such way. Go to some reliable man and have your eyes really fitted. That's the way to do it.

May I presume to give a hint as to how to boil an egg? I know it seems out of place for a mere man to offer such advice, but really to cook an egg, have some boiling water in a saucepan, put in the egg, cover it, and let it stand on the stove for five minutes. Then if you examine it you will find the white creamy, but not hard, and the yoke as well cooked as the white. Most things cook better slowly than fast, and it is a great mistake to think that an enormous fire and very fast boiling water are necessary to cook a dinner.

To keep sausage and sparerib fresh till summer: Fry and pack in jars, then pour over all melted lard. Be sure to use pure lard and not the grease in which the sausage or meat has been fried, for such grease will contain some water which will cause the meat to become strong as soon as warm weather comes. The lard used will be good for cooking purposes for being poured over after the sausage is fried it will have none or very little of the flavor from it. After trying several ways this has proved the only satisfactory one of keeping either sausage or sparerib through the warm weather of summer.—From March Farm Journal.

How to Prevent Peaches from Rotting.

At last we have a remedy for preventing the peach rot which so often sweeps away the crop just as it is ripening. This is a solution known as self-boiled lime sulphur.

Heretofore nothing could be done to prevent the spread of the rot because the usual spraying materials caused too much injury to leaves of the trees.

An insect known as *curculio* helps to spread the rot by gouging holes in the peaches. Sometimes this bug punches holes in the fruit for the purpose of depositing its eggs but more often it seems to do so out of pure deviltry. The rot generally starts from these wounds.

Paris green would poison the *curculio* but it injures the foliage of the tree. Likewise Bordeaux mixture would control the rot but it is even more disastrous to the leaves than Paris green. As a substitute for Paris green a poison known as lead arsenate is used and it has lately been found by the U. S. Department of Agriculture that it can be combined with the newly discovered self-boiled lime sulphur solution and both sprayed on the trees at the same time, thus controlling both the insect and the disease.

Self-boiled lime sulphur is prepared as follows for 100 gallons: Place 16 lbs. of fresh lime in a barrel and almost cover with water. Weigh out 16 lbs. of sulphur and run through a sieve to break up the lumps. As the lime begins to slake add the sulphur stirring it in. Continue stirring and add more water as needed to form a thick paste at first and then gradually a thin paste. The lime will supply enough heat to boil the mixture several minutes. As soon as the lime is well slaked, enough cold water must be added to cool down the whole mixture or it will be ruined. Use enough water to bring the entire quantity of the mass up to 100 gallons.

Use 4 lbs. of arsenate of lead to 100 gallons of water, if used alone, or to 100 gallons of the lime-sulphur if both are to be used at the same time.

Spray as follows: First with the lead arsenate alone (4 lbs. to 100 of water,) when the shucks are shedding. The second spraying should come from two to three weeks later or about a month after the petals drop, using the lime sulphur and poison combined. The last application should be about one month before the fruit ripens, using the self-boiled lime-sulphur alone.

The cost of materials, labor and everything for three sprayings as advertised above, will amount to less than five cents per tree.

A pamphlet treating the above subject in full is being published and will be sent free upon application to W. L. Howard, Secretary State Board of Horticulture, Columbia, Mo.

Maturity, Place of Storage and Time of Husking as Factors Affecting the Viability of Corn.

A few weeks ago the Experiment Station called attention to the fact that the dry weather in the fall was unfavorable to proper maturing of the corn crop and that the early freezes had undoubtedly killed the germs of large quantities of it. As a consequence good seed corn will be hard to obtain in the spring. It was advised that every man begin at once and test his own corn and if it proved unfit to plant to take steps to secure seed from a reliable breeder.

To more accurately prove that corn is in a bad condition the Station sent a man out among the farmers near Columbia to get samples of their corn. It was taken from various places ranging from a good crib in the barn to lying in the field. Ten kernels were taken from twenty ears of

each variety that every man grew, who was visited. According to the statements of the farmers some of this corn was husked early, some late. Note was taken where it was found stored.

The corn was brought in and germinated, the results being classified under the following heads:

Average per cent of germination, early husked corn 94.4.

Average per cent of germination, late husked corn 85.6.

Average per cent of germination, corn stored in dry places 93.0.

Average per cent of germination, in field or open crib 67.1.

Average per cent of germination, matured and dry 96.8.

Average per cent of germination corn matured but frozen 67.1.

From the foregoing it can readily be seen that there are at least three factors that influence the growing power of corn; they are, 1. maturity, 2. husking before badly frozen and 3. storing in a good dry place. Farmers not having corn husked early nor stored in a dry place are again strongly advised to test their corn.

Free Child's Remedy

What mother is not looking for something that will help her children in the little ills of life, something for the stomach trouble and the bowel trouble? Long ago she probably has become convinced that a child cannot readily swallow a pill or a tablet, and that to "break them in half and crush them" is an annoyance; that usually they work too drastically, and are nauseating and too powerful for the little one's stomach.

Any mother who will take the trouble of sending her name and address can obtain a free sample bottle of a remedy that thousands of other mothers are using and now paying for. This remedy is Dr. Caldwell's Syrup Pepsin, and the offer of a free trial bottle is open to any mother who has not yet used it. Having used it and convinced yourself that it is what you want, you can obtain it in the future for a few cents at any drug store, or one dollar a bottle, just as so many others are doing, the free sample being simply to convince you of its merits. If the best way to begin on it, Mrs. L. Davis of 187 W. Harrison street, Chicago, and Mrs. Mary Belford, 1710 Coke street, Louisville, Ky., both started with a free sample and now they write that they have never been without a bottle in the house since.

It is undoubtedly a great family remedy, as it is adapted to all ages, being mild and pleasant to take and yet thoroughly effective. It is especially the ideal remedy for children and women and old folks, who need something pure, mild and natural. It has the advantage of being a thorough laxative and yet contains tonic properties. Use it for the most stubborn constipation, indigestion, liver trouble, sick headache, sour stomach and such complaints with a guarantee that it will cure.

Dr. Caldwell personally will be pleased to give you any medical advice you may desire for yourself or family pertaining to the stomach, liver or bowels absolutely free of charge. I explain your case in a letter and he will reply to you in detail. For the free sample simply send your name and address on a postal card or otherwise. For either request the doctor's address is Dr. W. B. Caldwell, R. 590 Caldwell building, Monticello, Ill.
