**STATE HIGH SCHOOLS  
WILL SEE ART WORK**

**University of Missouri is Preparing Exhibit of Paintings, Drawings, and Designing.**

The Department of Art of the University of Missouri wants the High School students, grade pupils and the townspeople in Missouri to see some of its paintings, drawings and design work.

An exhibit is being prepared to be loaned to the high schools and everything possible will be done to allow as many towns as possible to have the display. The only expense will be the transportation from one school to another. The maximum cost would not be over \$2. The collection will remain in each high school building about ten days.

The exhibition illustrates the best methods of conducting a course in art, besides a large amount of art work.

The department of art believes that the exhibit will be of considerable benefit to the students of the various high schools and that it will be appreciated by the grade pupils and townspeople.

The exhibit is being handled by the extension division of the University.

**Routed by Figures.**

Republican prophets are without honor even in their own home now. We were told that a Democratic victory would mean 40 cent wheat and the mills here are today offering \$1.65 a bushel. Then the people of this section were told that zinc ore would not be worth digging out of the ground if there was a Democratic president.

Zinc ore is selling at \$65 a ton, the highest price in its history, which discredits the Republican oracles and also those other wise men who declared that the whole zinc and lead situation in southwest Missouri is under the control of a trust and that we could not be happy until the trust was a law again' it and the trust busted.

Possibly now it will be in order to drop the probe against the smelters and look into the doings of the mine owners who seem to be making money too fast in these Democratic times.—Springfield Leader.
