

Malt of all foods, is one of the most quickly turned by digestion into nourishment. The best of malt is used in making Budweiser—hence its food value. Immaculate cleanliness in process and surroundings and perfect pasteurization of product and bottles make Budweiser a pure beverage. So—there's pure food and drink in

# Budweiser

Bottled at the Brewery  
ANHEUSER-BUSCH, St. Louis.

Will be pleased to supply name of nearest dealer on application.

The express charges on the cheapest beer are just as high as on the best.

### Dry Weather Cultivation.

Samuel M. Jordon of the State Board of Agriculture says that the two important things in dry weather cultivation of corn are to prevent evaporation of the water in the soil and to retain what may fall as rain.

To leave a slightly corrugated surface is best, since a flat surface of dust will get hotter than one with slight corrugations similar to the surface as it is left following a corrugated roller. Since on the flat surface the sun's rays strike more nearly perpendicular to the surface, hence evaporation by the wind and heat will be less than on a flat surface.

Again, if the surface of dust is left flat and a heavy rain should fall, this flat surface will "puddle" more quickly than the cor-

### Farm Loans

We will place loans on improved farms in Lafayette County in amounts not exceeding \$5000.00 to one person.

rugated surface, hence the water will begin to run more quickly from the flat surface, while on the corrugated surface more rain gets into the soil, which is very desirable in a dry time.

Again, after the rain has ceased the flat surface will dry more rapidly, and crack open worse than will the corrugated surface.

In view of these facts, any tool such as a drag, mower, or corn planter wheel, should have some harrow teeth so placed as that they will leave the surface slightly rough. Where shovel tools are used, the plowing should not be deep, nor very close to the corn roots, especially toward time for "laying by."

It would appear that corn roots finish their growth early, and do not grow much after the corn is large as can be plowed with a two-horse cultivator. Cutting off the roots when they have made their full growth does a damage that cannot be repaired.

Cultivation should be frequent enough to keep down weeds and to prevent the crusting and cracking of the surface.

### Livery and Feed Stables.

(Schaberg Bros, Successors to J. C. Young, Sr.)

We are prepared to furnish the public with carriages at reasonable prices from churches and other public gatherings, and also buggies and other accommodations pertaining to the livery business.

### Peach Trees Cut Back Need Summer Pruning.

In many parts of Missouri fruit buds of the peach were killed by late frosts. As a result of this the trees were usually and properly pruned back severely to renew this year's growth of wood lower down.

As a result of this heading back and the moist season, the trees are making an unusually vigorous dense growth of new branches. In order to secure the best form of tree according to the experience of the Missouri Agricultural Experiment Station this dense growth of new limbs should now be thinned. If all these branches are left crowding each other, they will fill the center of the tree which will result in their being shaded and weakened. This will prevent the proper fruit bud formation in the body of the tree.

Enough thinning of the dense branches in cut back peach trees should be done to open up the center of the trees to admit sunlight and air. Space the branches so each one will have room to make full development and mature its fruit buds for the coming season. Pruning should be most abundant in the center of the tree in order to form a rather open center and to encourage the formation of a low, wide spreading head. The tendency of much of this new growth is directly upwards. In many cases strong inner branches growing straight up may be tipped back to outward growing side branches to secure lateral spreading form of the tree.

Give this strong new growth plenty of room and light and a fine crop of fruit buds will result next year, but if they are too densely shaded, the fruit buds cannot develop and mature to best condition.

### The August American Magazine.

In the August American Magazine there is an unusual amount of good fiction and a number of special articles and features. Among the short stories are "Zose Bluff" by Sophie Kerr which is another Victor story, "The Nut From Pecan University" by Hugh S. Fullerton, "The Bird-Cage" by Marjorie Benton Cooke, "The Weapon that Cut" an interesting story concerning our Japanese problem by Mabel Abbott, "As a Boy Thinks" by Jack Lait, "Your True Friend, Melissa M." by Dana Gatlin, "The Swedish Reporter's Encounter with Sarah Bernhardt" by A. P. Johnson, and a generous installment of the serial "Between Two Worlds" by Philip Curtiss.

Among the special articles is one entitled "38,571 Jobs With a Poor Future" by James Hay, Jr., which deals with work in the government service, and shows its many bad points.

"How I laid the Foundation for a Big Salary" was told to Dale Carnegie by a prominent business man. This man thinks ideas are the biggest business assets in the world.

"Give Me the Good Old Middle West?" was written by a man who was never in New York. He thinks the Middle West is the greatest place anywhere and he is proud of it.

Walter Pritchard Eaton writes about "Great Authors with Wonderful Personalities" and discusses Doris Keane, Mrs. Fiske and others. Some of the other articles are "A Tip to Men in Middle Life" by Thomas Kane who broke down at forty-eight and is now seventy-nine and healthy; and Pennsylvania" by Agnes Repplier.

The department on Interesting People includes a sketch on William H. Osborn, the man who sees that your income tax is collected; Thomas H. Ince, the moving picture director, and other unusual persons. The results of the contest "Why I Think it Pays to be Courteous" are published as well as several articles

of interest to the investor and saver.

Mrs. J. T. Pace and little daughter, Leona, went to Jefferson City Sunday morning for a visit.

C. B. Harrison spent Sunday in Higginsville.

Mrs. Richard F. Johnson accompanied by her mother, Mrs. E. G. Loomis, left Tuesday for San Francisco, Calif.

Rev. J. C. Bierbaum left Monday for North Illinois, Wis., for a three weeks' stay.
