

Under the Constitution as it now stands the people of every State have full power to regulate the manufacture and sale of all alcoholic liquors. They can license it, they can restrict it, they may prohibit it as they please. That is how it should be. That is how it must be if the fundamental principles of the Government of the United States are not to be overthrown and the Federal authority made the dictator of the personal habits of every man, woman and child in the United States.

Nation-wide Prohibition could never be enacted by the votes of the American people themselves. Its only chance lies in the acquiescence of thirty-six State Legislatures which actually represent a minority of the population of the country. In the adoption of a constitutional amendment, Nevada, with a population of 108,000, counts as much as New York, with a population of 10,000,000, and Wyoming, with a population of 182,000, counts for as much as Pennsylvania, with 8,500,000.

The evils of drink, the iniquities of the saloon, have nothing to do with this question. We are dealing with a fundamental issue of government, and no government that the world has hitherto known has been strong enough even in time of war to impose its absolute will upon the people subject to it in respect to what they shall eat and what they shall drink and their ordinary manner of life. Nor can it be done in the United States by the fiat of thirty-six State Legislatures acting under the whip of a Prohibition.—The New York World.
