Chamberlain's Cough Remedy.

The great benefit derived from the use of Chamberlain's Cough Remedy has been gratefully acknowledged by many. Mrs. Benjamin F. Blakeney, Decatur, Ill., writes, "Chamberlain's Cough Remedy is by far the best medicine for colds and coughs we have ever used in our family. I gave it to my children when small for croup and have taken it myself."

Mr. and Mrs. William Shacklett spent Sunday in Kansas City.

Ed Barron of Kansas City, spent Sunday here with home-folks.

How Diphtheria is Contracted.

One often hears the expression, "My child caught a severe cold which developed into diphtheria," when the truth was that the cold had simply left the little one particularly susceptible to the wandering diphtheria germ. If your child has a cold when diphtheria is prevalent you should take him out of school and keep him off the street until fully recovered, as there is a hundred times more danger of his taking diphtheria when he has a cold. When Chamberlain's Cough Remedy is given it quickly cures the cold and lessens the danger of diphtheria or any other germ disease being contracted. Adv.

STARS AND STRIPES MUST SHINE AGAIN ON SEVEN SEAS

SHIPPING IS OF VITAL IMPORTANCE TO THOSE OF US WHO NEVER SEE SHIPS.

TO CARRY OUR PRODUCTS

Government Requires Funds to Complete Program of Future Prosperity.

There was a time when the Stars and Stripes shone on every sea. In the days of the clipper-built ships the Yankee skipper helped in doing the world's sea hauling. This was true up until the days of the Civil War. Thereafter American ships began disappearing from the seas. The Seven Seas that had known the flag knew it no more. There were great world ports where the only American vessels ever seen were warships or some American millionaire's private yacht.

That is to be changed. We have come back to sea and we propose to have our share in its profits and its dangers. We are building a great merchant marine so that the cotton of Arkansas and the corn of Iowa and the wheat of Kansas and the pork of Illinois may find a free outlet to the world. The great American liner will no longer be a curiosity. We propose to take the place that German ships so long held. We will divide the carrying trade of the world with others.

The clay tile of Kansas City and St. Louis, the steel of the valley plants, the agricultural implements and shoes that are made in the Mississippi Valley, are to find their way to the sea by river and thence on American vessels to the consumer.

If this world you never get something for nothing. Americans cannot have a deep sea fleet without paying for it. The government is building that fleet now. It started to build it for war and it will continue it for peace. Much of the money of the first Liberty Loans went into it. It will take more money to carry it to completion, to make it ready for us and our use. The Victory Liberty Loan will have its part in sending these ships to sea.

We don't want to lose any of the hard won advantages that have come to us out of the war. We want to keep the flag on the seas now that it has come back. To fail in furnishing the funds that are needed would be a step backward and would injure the prosperity of America now and for generations.

The dollars that pile up in the Victory Liberty Loan will make for national prosperity through the creation of shipping and the production of goods that are to go into that shipping. The farmer will profit, as will the workman and the plant owner. We are all in this thing together and support of the nation financially will work to our own good.

Better let Uncle Sam pay you interest than give up all your cash for taxes.

STEP ON THESE SNAKES.

From lips that one would hesitate to suspect come words which indicate that the Hun propaganda is not extinct—words that are to be heard in Germany and that are to be heard in our own land. We hear from them—"Now that the war is over, there is no need for the Victory Loan." We hear the expression that this is a "Bankers' Loan," and that the common people will not rally to it. We hear words that are calculated to create sympathy for that Germany that has outraged all civilization. They praise on the greatness of the German people and the necessity to forget and forgive. They speak of the government waste and extravagance. They have kind words for the Bolshevik government movement that was made in Germany, that was planted in Russia, and that now, like Frankenstein, threatens to destroy its maker with others.

But the Victory Loan will succeed. With the proceeds will be paid the nation's debt of honor. America is made up of the common people. The common people of America pledge themselves to purge the world for all time of that Germanism that all but destroyed the world. Victory has done much to bring this about. The balance must be done by peace-time patriotism. The debt that has been contracted must be paid. It will be paid in full. Every American in khaki will be brought back home. Every bill contracted for will be paid, and by the time the Victory Liberty Loan campaign is in full swing, the pro-German propaganda will remain silent in the presence of true-blooded, patriotic Americans.

We Can Pay Our Debt On the Installment Plan

The American casualty list showed more than 50,000 killed before the Hun advance was stopped at the Marne and the invaders started backward toward the Rhine. Before peace was even a remote possibility.

These men made the supreme sacrifice. Put our puny efforts to shame. They paid in full their debt to the government as it only can be paid.

For as long as an American lives his obligation to his country is a debt that is irreducible.

No matter how much he does, how greatly he sacrifices, how deeply he suffers in his country's service, the obligation to do still more remains.

And no matter how much you have given to the various war aids, how many Liberty Bonds you may have bought, you are still in debt to Uncle Sam.

Your country is still protecting your rights, your liberties, your welfare. Still making it possible for you to live as an American.

Still standing for the ideals in government for which our forefathers fought.

And looking ahead to choose the surest, safest path to future prosperity, greater than we have ever enjoyed in the past.

But Uncle Sam right now needs billions of dollars to make this possible. Must have them.

And you and I and our fellow citizens must loyally supply them.

Must prove to the world at large through his Victory Loan that Americans recognize their responsibilities and pay their debts.

We will never pay as those 50,000 did along the French front. Ours will be on the installment plan. And we can never pay out. Our debt is irreducible.

BACKING UP WAR INSURANCE.

This is One of Our Solemn Obligations to Be Met Soon.

When America went to war she not only raised the pay of her fighting men, the man in the ranks from \$15 to \$39 a month, but she made it possible for him to insure his life and his ability to support himself and his family. The amount of this war insurance written ran into hundreds of millions. The man she stood in a muddy trench knew that no matter what happened to him that his dependents would be cared for from this insurance money. He paid the premiums, it is true, but these payments were smaller than were asked by any insurance organization owned by private individuals.

Back of this insurance policy that the soldierman and the sailor-boy sent home to his folks stood the resources of the whole country. Every American dollar was back of that policy. The Liberty Loans that were subscribed were backing the policies. The taxation schemes of the nation were pledged to make them good. When the war ends it does not stop short off. The expenses of war drag along after the last big gun has been fired. The war risk insurance will be an example of this. In our other wars the pension roll has remained for generations as a reminder. This war was started on a different basis so far as the wounded, injured and disabled men are concerned. We made arrangements from the beginning to look after them in issuing the insurance. Those arrangements must be carried out even though it should require more and more bond issues to meet this and other of our solemn obligations.

McADOO IS AGAIN CONFIDENT.

Former Secretary of the Treasury Predicts Big Success For the Victory Loan.

"I believe that the Victory Loan will be oversubscribed, just as the Liberty Loans before—if I know anything about my countrymen and my country," said W. G. McAdoo, former secretary of the treasury, in Portland, Oregon, a few days ago.

"It was easy to be patriotic when the big war was on; when patriotism meant security, self-interest and safety, but the real test comes now when the expenditure of actual war is subsiding, and I feel that the American people are going to meet that test in a manner that will vindicate our confidence in American patriotism."

Mr. McAdoo went from Portland to Chicago in his private car. He is on his way to New York after a vacation in California.

More than five per cent. State Chairman Hughes always has more or less trouble in getting his reports in from rural Missouri. And while he knows that sales are being made, they are reported only semi-officially, and cannot be taken into consideration in the official figures.

Cole County sends in \$400,000 sales today, and will go over the top soon. St. Louis and St. Louis county are making maverick reports, but the workers are active and the outlook bright. Kentucky is working, but not reporting much. Louisville has made no report at all yet. She has a quota of more than \$11,000,000, almost half of the state's quota. And Louisville will be over in a day or two, and Kentucky will be up among the leaders.

INDIANA AGAIN IN HER USUAL PLACE LEADING DISTRICT

TENNESSEE JUMPS INTO SECOND POSITION WITH MISSISSIPPI A CLOSE THIRD IN RACE.

MORE THAN 15 PER CENT OF QUOTA SUBSCRIBED

Second Day Brings Total of \$29,867,850 Sold Toward \$195,000,000 Quota.

Table with 3 columns: State, Subscription, Per Cent. Total: \$29,867,825 153

St. Louis, April 24—More than 15 per cent of the Victory Liberty Loan quota for the Eighth Federal Reserve District had been officially subscribed at the close of business on the second day of the drive.

With a quota of \$195,000,000 the sales officially reported totaled \$29,867,850. Unofficially it is known that the sales are very much larger, but in the compilation only the actual official sales are reported.

While Liberty Loan officials regard the opening of the present campaign the most auspicious of all the five of the great series of Liberty Loans, a note of warning is sounded for the public and especially the workers to guard against being overconfident. The only safe way to accomplish this is to roll up a large oversubscription.

Indiana, that has a habit of going over the top first in Liberty Loan campaigns, has again jumped into the lead, and now has a percentage of 415, and with sales aggregating \$5,821,000.

Marcus S. Sonntag, State Chairman for the Hoosier state, reached headquarters yesterday and found that his state had only a percentage of 15. Before noon yesterday he had official reports that advanced him to the head of the column, and he says they will stay there until the finish.

Evansville, he says, will complete her quota and shove Vanderburgh county over the top before the end of the present week, and he feels confident the state will complete its quota next week.

Reversal in Tennessee.

Tennessee is showing a strange reversal of form. In former campaigns this state was much joked at because of her slow filling of her quota, a thing she always achieved before the close of the campaign.

But today Tennessee is basking in second place with a percentage of a trifle more than 32, and is riding easy. State Chairman R. L. Jordan said that Memphis is responsible for the splendid showing. Shelby county, of which Memphis is the principal city, has already reported sales aggregating \$4,336,250 of a quota of \$9,090,500. This city will fill its quota early next week, according to advices received by Jordan.

The rural communities are slow about reporting, reports being in from only four Tennessee counties. The chairman has sent telegrams requesting quick reports and he hopes that his state will be all in by the close of next week.

Mississippi, which jumped into first place on the opening day, lapsed into third place today. Chairman Kretschmar said that but few additional counties had reported, but unofficial reports showed that the Mississippians were all at work and that there was more confidence than in any previous loan. There is no fear of Mississippi being backward.

Arkansas is also backward about reporting, though the unofficial reports that reach Chairman Hemingway and Vice Chairman Pettie are most encouraging. The entire state of Arkansas is in the Eighth District, and there are few large cities. It is essentially a rural state, and the returns are slow in being recorded.

It will be remembered, however, that Arkansas was the leader in the Fourth Loan, and the workers are determined to keep that position in the Victory Loan.

Others Coming Along.

Illinois is one of the states that has always been reckoned as among the reliable ones. Never a good starter, Illinois is the state that keeps the leaders guessing, and there is never any telling what State Chairman Crabtree has up his sleeve, and how soon his state will take a spurt and go over the hurdles to the commanding position.

Crabtree has a bundle of telegrams from all over the state. Here is a specimen, from Henry C. Sifford, of Anna: "Union county going strong. One hundred and twenty-five thousand, two hundred and fifty dollars subscribed." The quota of Union county is \$174,250.

Missouri is another state that need give no alarm, despite the fact that it ranks low with a percentage of but
