KANSAS CITY TIMES: We alluded recently to the immense lauded estate of Dr. Glenn, the Democratic candidate for Governor of California. It consists of 50,000 acres, and produces this year one million bushels of wheat. But we read now of the Dalrymple farm, in the region of the Red River of the North, which throws Dr. Glenn's estate in the shade. It consists of 75,000 acres, a larger tract than is owned by any other individual either on this continent or in Europe. The product this year is 500,000 bushels of wheat, or one-half the product of the Glenn, but its possibilities are a third greater. A correspondent describing the harvest says that 600 men are employed in the season and 115 reapers, which are followed by self-binding machines and these again by threshing machines. The wheat is not housed at all, but as soon as winnowed put into cars and forwarded East for shipment to Europe. The yield of wheat is from 25 to 30 bushels per acre.
