The contest now raging in The Herald and News is spreading like wild fire in a dry straw field. The way in which the people all over the county are taking hold is agreeably surprising to those of us in the office who had no idea it would develop into such stupendous proportions, and in so short time.

Martin, Harrington street, at whose home a fine 11-pounder arrived last week. Martin sells Fords.

In climbing the hill of difficult ascent in the journey of life, it comes like the sun-burst upon the deep darkness to have a number of sweet ladies all at once present to the tired traveler bouquets of beautiful flowers in the shape of kind words. Seven boys were fined \$2 each by the recorder Monday for shooting craps in the city park on Sunday. They all paid. The boys saw Policeman E. H. SURE CURE FOR HYDROPHOBIA EASY TREATMENT AT HOME

While The Herald and News reporter (then on the Observer) was spending a brief vacation at the home of his brother-in-law, Wm. F. Wright, in Laurens county, the past summer, he saw a negro woman who, when she was a child, had been cured of hydrophobia. Mr. Wright said he knew of several persons who had been cured by the same treatment. We have taken the pains to copy the article in the possession of Mr. Wright, which is as follows:

"Judge Robert J. Breckinridge, of Danville, Ky., one of the most learned jurists of the South, gave the following sure cure for hydrophobia:

"One ounce and a half of Elecampane root, bruised; put into a pint of new milk and reduced one-half by boiling. Take it all at once in the morning, fasting until afternoon, or at least not eating until several hours have passed. The second dose should be the same as the first, except two ounces of the root are needed. The third dose should be the same as the second. Three doses are all that is needed for the cure. This medicine can be given at any time before the spasms come upon the bitten person. A dose for a horse or cow should be three or four times as large as that for a person."

Will Cut Glass lose its transparency when exposed to heat and light? Unless it is cut from Genuine Hand Blown Hand Shaped Blanks all glass will lose more or less of its brilliancy when exposed to heat and light, and will look dingy or light smoky in appearance.

A good way to judge the Quality of Cut Glass is to look at the whole stock of the place you intend to make your purchase and if you find that there are pieces scattered through the stock that have lost their transparency and brilliancy you will do well to make your purchase elsewhere as you might buy a piece that looks well while new but will soon lose its brilliancy as the pieces did that had been in stock for some time.
