Miss Ruth Price received on Tuesday a cablegram from Sergeant Malloy McCullough now in France in Co K 118th regiment infantry stating that he was getting on just fine and was quite well.

VARIOUS AND ALL ABOUT

Just think. Sunday will be the first of September. Fall will soon be here, with cotton rolling in at high prices, making money plentiful in beautiful autumn, the best time of the year.

The special feature for Friday will be "Inside the Lines." Marguerite Clayton is to be co-featured in it with Lewis Stone. This is claimed to be the greatest war picture ever released. It is a story of the vast extent of the German spy system, and jammed to the limit with surprises and thrills, intensely exciting from start to finish.

Let us now have peace from politics in Newberry and hope for peace from war at an early day.

Monday will be salesday, September 2. There are no public sales advertised, but it is expected that other business will be lively. For recreation the public can go to the opera house and see Roy Stewart in "By Proxy," with Maud Wayne. This proxy means trying to land a girl for another fellow.

Friday the jurors will be drawn for the next term of the court of common pleas to be convened on the 16th of September.

That will be an important and interesting meeting Thursday and Friday of the Woman's Missionary union at the Newberry Baptist church.

A white man, giving his name as Edward Mooney and claiming to be from Syracuse, N. Y., was arrested in Newberry by Constable Henry D. Havird, Magistrate Douglas' deputy, and turned over to Military Police man Hinson Tuesday to be taken back to Camp Jackson, whence he had deserted.

News has been received in Newberry, in a letter from a nurse at a hospital in France to Mrs. Willie Mayes that her husband, Lt. Mayes, had also lost his right eye from wounds sustained in battle when his leg was injured as reported some time ago.

Rev. T. F. Harper the good old colored Methodist preacher has received a card from his son Sergeant Joseph E. Harper advising him that the boy had arrived safely over seas.

For cursing and using obscene language Elliott Worthy, colored, paid \$5 in the recorder's court Monday, and the said Worthy, for the unworthy act of obtaining money under false presentations, also paid a like amount at the same time, making ten bucks to his credit. The recorder at the same session also succeeded in getting \$10 from Booker T. Neely, who was charged with "using car without consent of owner."

The city schools will reopen on the second Monday, the 9th of September.

There were 67 registrations on the 24th of young men coming under the new law. This number was about equally divided between white and colored.

Tractors for Cultivation of Rice.

The French government of Cochinchina has become interested in the employment of caterpillar tractors for the cultivation of rice. On September 29, 1917, a 45 horse power track machine valued at more than \$5,900 United States currency, was purchased telegraphically. If the experiment is successful, larger orders will follow. Everything depends upon whether the tractor can operate in the soft rice-paddy fields of Cochinchina.

Tokyo Grows in Importance.

The prosperity of Greater Tokyo city is shown by the increased taxes over last year, the average being 37 per cent. In the eight tax-collection districts the total exceeds 99,000,000 yen (\$49,500,000); the rates of increase vary from 9½ per cent in the Yotsuya district to 50 per cent in the Ryogoku and 72 per cent in the Yettai districts, where the offices and residences of the nobility are located.

Why He Was Short.

"This man says you owe him money, Sam," said the judge.
"Dat's right, judge, I does."
"Well, why don't you pay him?"
"Why, I hain't got nothin' t' pay him wiv, judge."

No Wonder.

"I called Smith a hard name just now."
"He doesn't seem to be displeased."
"Why should he be? I told him he was a brick."

"CARDIFF GIANT" PURE FAKE

Had Its Origin in Hoax Which Is Understood to Have Had Its Inception at Chicago.

Andrew D. White gives some of the particulars of the "Cardiff Giant" in a book entitled "The True Story of a Remarkable Deception." The Cardiff giant was the huge stone image of a man which Farmer Powell of Cardiff, N. Y., claimed to have unearthed while digging a well in the autumn of 1890. After it had been sold to a joint-stock company formed to exploit the wonder for show purposes, Barnum tried to buy it for his own museum, but his offer was declined. The showman then had an imitation made, with the result that two Cardiff giants were on exhibition at the same time, the duplicate being shown to the public as "the only and original." Doctor White attributes the exposure of the fake to Professor Marsh of Yale; in another account it was Dr. John Y. Boynton of Syracuse, N. Y., who laid bare the fraud. The original Cardiff giant was carved or chiseled out of a gypsum block in a stoneyard in Chicago and was transported thence by rail and wagon to Cardiff. According to Doctor White, scientists as well as clergymen were much impressed with the colossal figure. Dr. James Hall, state geologist, issuing a statement in which he described the giant as "the most remarkable object brought to light in this country" and as "deserving the attention of archaeologists."

REFUGEES IN RICH ATTIRE

English Writer Describes Grotesque Figures He Saw During the Italian Retreat.

Amid all the chaos of the Italian retreat one kept on meeting utterly incongruous figures, for alongside of others road-worn, shabby and dirty, to be clean and well dressed is to be grotesque.

Amid this multitude of haggard, unwashed, unshaven, dead beat males, I noticed two Italian ladies treading delicately over the rough ballast of the railway track. They had naturally brought with them in that flight the most valuable of their possessions, which were of a kind conveniently carried on their persons. Against this gray background of mud and rubbish and a disbanded army their two figures glittered with a brilliance that would have been conspicuous in the Rue de la Paix.

Heavy sable furs and muffs almost bowed their shoulders; each finger had two or three rings that flashed in the light; round their necks were gold chains hung with pendants, and yet instead of the air of self-satisfied ostentation that might well have gone with a display so lavish, they were only two pathetically little, frightened, perplexed faces, and an uncertain gait that did not promise much further progress along that ankle-wrenching railway line.—G. Ward Price in the Century Magazine.

Cavite Flashes Time Over Pacific.

Since October 1 the radio station at Cavite, co-operating with the Philippine bureau of posts and the Manila observatory, has been sending the time signals of the 120th meridian east of Greenwich at 11 a. m. and 10 p. m. every day, says Science.

For the purpose of sending time signals, the transmitting clock of the Manila observatory is connected with the Cavite wireless station through the bureau of posts. Manila observatory time signals begin at 10:55 a. m. and 9:55 p. m., standard time of the 120th meridian east of Greenwich, and continue for five minutes. During this interval every tick of the clock is transmitted, except the 28th, 29th, 54th 55th, 56th, 57th, 58th and 59th of each minute.

The situation of Manila in the Pacific makes this service of the greatest importance to the mercantile and naval fleets that ply upon that ocean.

Result of Sugar Shortage.

The sugar shortage has encouraged Louisiana planters to broaden the use of pure cane syrup, which is made from cane juice, without taking out any of its sugar. This juice is boiled to a point just below that required to crystallize it into sugar, and can be used not only for griddle cakes and candy making, but it is recommended by the planters, as a sweetening for coffee and tea. It is practically sugar in a liquid form, and on a basis of 8 cents a pound retail for granulated sugar will yield economies of 40 to 50 per cent, at a price of 4½ to 5 cents a pound for syrup.

Aged Tree Is Dying.

The original navel orange tree, planted 44 years ago, producer of the first navel oranges grown in the United States and parent of millions of trees now growing in California, is believed to be dying. Horticultural experts have begun efforts to diagnose the disease that threatens it in the hope of prolonging its life.

This tree, the most noted in the citrus industry of California, came originally from Bahia, Brazil. It was planted in 1878 by Mrs. C. L. Tibbetts, who obtained it from the botanical gardens in Washington, D. C.

Electric Protection.

Many of the devices conjured up for war service, under pressure of deep desires, will be useful for the piping times of peace. The Canadian aviator who has designed a way to keep a flier warm by equipping his suit with electric wires may be painting the dawn of a new day for people who live in apartments where the janitor is careless.—Montreal Star.
