

YOU'LL LOOK NIFFY

When you buy one of our good looking, well wearing, up-to-date, Suits

Look as Well as Your Friends

There is no reason why you cannot appear as elegantly attired and properly economic as the best of them.

Ladies, put your thinking cap on and then come and buy your Winter Outfit to fit it.

Satisfactory Clothing !

Society Brand Clothes

No Money to Waste--No Time to Waste

Which exactly describes the condition of the most men in these days of hurry and high prices.

We Meet These Conditions.

Our immense Stock of Men's Clothing was assembled with a view to quickly satisfying the the busy man and the man with a limited purse. We have goods to suit all, and, considering the prevailing high prices in all lines, you will be astonished at the cheapness.

And you'll get what you call for without delay and without Substitution

THE NEW IDEA COMPANY,
MORRIS NESS, Manager.

SAVE SEED FOR TWO YEARS FROM THIS CROP OF CORN

Less Time Required to Save It Now Than to Scour the Country for It at Planting Time in the Spring of 1921—And There Are Other Advantages.

The 1919 corn crop is a wonderful crop from which to select seed corn. Over most of the country it is well developed, fully matured, hard and sound—just the sort of corn that a fellow can bank on for a good stand and big yields.

But it takes time to select seed corn. You are busy. Some other job is calling you before you finish one you are at. You guess you will not take the time to select any seed corn to speak of.

All right—it's your business. But think ahead a little. Imagine that it is the spring of 1921. The year 1920, say, was a poor corn year. Frost came early and nearly all of the corn was soft. You haven't any that is fit to plant. The busy spring season is at its busiest. A score of things are calling to be done at once. You have to hitch up the horse or crank the car and start scouring the country for some man who has a crib of old corn. Probably you fail to find him and have to wait while the county agent or somebody "sends down South" and gets you some hard corn to plant. Some waste of time connected with that process, isn't there? After you get it, perhaps it is unadapted to your locality and yields a poor crop of immature corn.

Save for Two or More Years.

That is one of the reasons why the corn experts of the United States Department of Agriculture urge farmers to select out of this year's crop enough seed corn to meet their needs for two or three years. No farmer, particularly in the northern portion of the United States, has time not to do it.

Still, the mere saving of time is not the only reason. By getting two or three years' supply of seed corn out of a crop like this, the farmer takes out an insurance policy that he can continue raising a variety of corn that has proved its merits. If he neglects this opportunity of providing himself with a good supply of the right kind of seed, he may have to start over with a variety that he knows nothing about, that may not be adapted to his locality or his land,

COULD HARDLY STAND ALONE

Terrible Suffering From Headache, Sideache, Backache, and Weakness, Relieved by Cardui, Says This Texas Lady.

Gonzales, Tex.—Mrs. Minnie Philpot, of this place, writes: "Five years ago I was taken with a pain in my left side. It was right under my left rib. It would commence with an aching and extend up into my left shoulder and on down into my back. By that time the pain would be so severe I would have to take to bed, and suffered usually about three days... I suffered this way for three years, and got to be a mere skeleton and was so weak I could hardly stand alone. Was not able to go anywhere and had to let my house work go... I suffered awful with a pain in my back and I had the headache all the time. I just was unable to do a thing. My life was a misery, my stomach got in an awful condition, caused from taking so much medicine. I suffered so much pain. I had just about given up all hopes of our getting anything to help me.

One day a Birthday Almanac was thrown in my yard. After reading its testimonials I decided to try Cardui, and am so thankful that I did, for I began to improve when on the second bottle... I am now a well woman and feeling fine and the cure has been permanent for it has been two years since my awful bad health. I will always praise and recommend Cardui." Try Cardui today. B 78

that may bring with it some disease or insect pest, and that, in any event, he will have to experiment with for several seasons before he knows what it will do for him and what he must do with it.

Where Every Day Counts

The saving of seed corn from a crop of the right kind is a matter of importance everywhere, but more particularly so in the northern portion of the country. That is where the vicissitudes of the season are most likely to bring about a soft crop. There, also, low vitality means the heaviest handicap. The South, with its long-growing season, might sometimes afford a corn crop that gets away to a slow start, but in the North every day counts, from the time the corn is put in the ground until the crop is safely harvested. Anywhere, however, the saving of the right kind of seed has a

direct and important bearing on production.

The Department of Agriculture believes that every farmer can better afford to take the time, however much his labor may seem to be needed elsewhere, to select at least two years' supply of seed corn from this year's crop, than to run the risk of being caught, spring after next, with no suitable corn to plant, with the resultant delay, annoyance, and actual reduction of yield. The day or so that the farmer puts in selecting his seed corn will probably be the most profitable day's work he does in the whole year.

STORE COTTON AID STOP LOSSES

Clemson College, October 7.—It is estimated that cotton growers in America are losing every year about \$30,000,000 from weather damage to cotton left unstored and unsheltered. The estimate is conservative, for every bale left in the open loses enough "picking" to represent \$2.50. Greater losses are frequent.

An instance that is not far from typical concerns a bale that was left exposed to wind and weather for six months. The bale lost 76 pounds, which at 23 cents is \$17.48. Southern farmers are urged to store their cotton and stop this unnecessary and inexcusable waste.

There are now licensed and bonded warehouses under the United States Warehouse Act, in which cotton can be stored and receipts taken, these receipts being good for cash at banks. Such storing of cotton carries cheap insurance and good service.

But, whether stored in government warehouses or not, cotton should be protected. There are commercial warehouses available, and it is possible for farmers individually or cooperatively to have privately owned storage facilities at reasonable cost. Store your cotton now.

ADVERTISE IN THE TIMES

NOTICE OF DISCHARGE

I, will apply to the Judge of Probate for Clarendon County on the 13th day of October 1919 at 11 o'clock a. m. for Letters of Discharge as Administrator of the estate of Samuel E. Johnson, deceased.

Oscar P. Johnson,
Administrator.
New Zion, S. C. Sept. 11, 1919.

NOTICE

Why Throw Away Your Old Tires?

When a few dollars spent on First-Class Vulcanizing will probably give you 1,000 more miles.

The Haley Vulcanizing Co. will be located at Harvin Motor Co., and we can care for your tires properly. 11 years experience, and we guarantee all of our work. We are installing an electric, modern and up-to-the minute plant, and with this equipment it is impossible to burn or injure your tires by having them vulcanized. We are prepared to give 5 minute Tube Service and 24 hour Casing Service.

OPEN OCT. 15, 1919

H. A. HALEY, Proprietor.
