Fountain, Ind.—Mrs. My. Marshall, R. R. 44.  
Cambridge, Neb.—Mrs. Nellie Moslander.

These women are only a few of thousands of living witnesses of the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases. Not one of these women ever received compensation in any form for the use of their names in this advertisement—but are willing that we should refer to them because of the good they may do other suffering women to prove that Lydia E. Pinkham's Vegetable Compound is a reliable and honest medicine, and that the statements made in our advertisements regarding its merit are the truth and nothing but the truth.

**ITCH CURED** By One Application in 30 Minutes.  
**DR. DAVID'S SANATIVE WASH** is guaranteed to cure any case of Itch in half hour if used according to directions. Show this to persons having Itch. If your dog has scratches or mange David's Sanative Wash will cure him. Delivered at your nearest express office free upon receipt of 25 cents.  
Wells Medicine Co., Lafayette, Ind.

DO YOU WANT SOFT FEATHERS AND POCKET

# FOR THE FARMER AND STOCKMAN

## Housing Tools.

The way some people house their tools in winter is enough to give harrows and rakes the toothache. Farms need more tools than in former years, but not one farm in a dozen has buildings to match.—**American Cultivator.**

## Dairy Cows.

Too close confinement of dairy cows is greatly detrimental to their health. All animals require exercise to develop properly and have normal health, and good health and vitality are necessary to the production of good milk.—**Indianapolis News.**

## Concerning Wire Fences.

Wire fences lend themselves readily to beautifying schemes, for they furnish good support for vines of every description. If you crave annual change, try climbing nasturtiums, morning glories, sweet peas, wild cucumber, gourds, Madeira vine or cobaea. If a permanent effect is desired, plant clematis, crimson Rambler rose, honeysuckle, trumpet creeper or woodbine; and during the first year while they are getting a firm foothold, you can use any of the annuals for temporary and immediate results.—**Washington Star.**

## Small Fruit.

There are three essentials in the selection of a location for small fruits: First, that the soil and lay of the land be suitable—good ground, well-drained—ordinary good garden ground is all right, but not in an old orchard or so near to other large trees that they will absorb the moisture and nutriment from the soil. Second, the plot for small fruits must be convenient to the house, and this is an important consideration with all garden products. Third, the small fruit garden must be so arranged in fairly long rows as to be cultivated with horse power and

A SUPPORT FOR BLACK RASPBERRIES.

otherwise cared for with a minimum amount of labor.

The small fruits to be planted on the farm will depend on individual circumstances and the likes and dislikes of the family to be provided for, but almost any one will want currants, gooseberries, blackberries, red and black raspberries, and of course, strawberries, as well as grapes, which, while not classed as small fruits, still come in as part of the fruit garden. The rows of can and bush fruits should be made eight feet apart, but where there are a number of rows occasional provision should be made for a wider space for the passage of a wagon in spraying, getting out brush, etc. Ten feet is wide enough for this purpose. In large plantations every fourth space should be a wide one. Currants and gooseberries should be planted four feet apart in the rows, raspberries and blackberries three feet and grapes eight feet. The quantity of each to be planted must be decided entirely by the size of the family and its preferences. If the planting space in a row is 144 feet this will accommodate twelve gooseberries and twenty-four currants. Of raspberries and blackberries, forty-eight can be placed in a row. A row of gooseberries and currants and one each of red raspberries, black raspberries, blackberries and grapes, well taken care of, should give a very fair supply to an ordinary family for use both for fresh and for canning, and be more than the average farmer's family uses. Yet there are some families that would use the product of twice this quantity. It should be impressed on the mind of the intending planter that a small plantation, well cared for, will furnish more fruit than a larger one, neglected.—**Prairie Farmer.**

## Breeding Hogs.

Several things may be said just now in favor of buying breeding hogs, and not the least is the price for which they can be obtained. On this account now is the time both to found and add to herds, because good blood can be bought at such low prices, mainly because the price of corn is so high. Another reason is that because of high priced corn hogs are selling off faster than for some years, and this is sure to make a short hog crop next season, and therefore insure high prices for fat hogs. One can found or add to the swine herd excellently well bred hogs at nearly pork prices, and such a time is the one in which to make ready for a good hog crop next season, especially when it is true that so much of the breeding stock is going to the pork market to save the corn. The reader will call to mind similar conditions as now exist when during one year fat hogs sold at \$4 to \$5 per hundred pounds, and the next season's crop sold at \$6 to \$7. It

tacked by dogs as sheep, as they flock together and do not run.

The greatest objection that has been made to the Angora is that they are hard to fence against. I have had some trouble in fencing with rail fences, but are as easy to control as any other stock with woven wire or picket fence. I have had Angoras on my farm for four years, beginning with a very small flock. They are equally or more hardy than sheep, eating all kinds of browse. After the brush and sprouts are killed the stumps soon rot and blue grass will soon set.—**W. T. Ellis, in the Indiana Farmer.**

## Regarding Large Eggs.

It is desirable that the hens lay large eggs, and while same breeds lay larger eggs than the average, yet there are individual hens of all breeds that excel in that respect if the conditions are favorable. What is meant by large eggs is not such as may be of abnormal size, or approaching those which contain double yolks, as only the hens that are overtly lay double yolk eggs, but eggs of an average size and uniform in appearance. When the eggs are uniform they present a more attractive appearance in market and bring better prices. When pullets are just beginning to lay, it is more usual for the eggs to be small than of average size, and the same thing happens to both hens and pullets when they are near the end of their laying period, especially as it has been noticed that hens which are well fed and receive a liberal allowance of corn lay larger eggs than do those which receive a less quantity of grain, but there is no uniformity in the size of eggs from a whole flock, as the hens differ. Even two sisters may lay eggs entirely unlike in every respect.

It should be the case that the large breeds should lay larger eggs than the small breeds, but this does not always happen, for the larger eggs are produced by the Minorcas, Black Spanish and the French breeds—Houdans, Crevecoeurs and La Fleches—and yet they are not as large fowls as the Brahmas, Cochins or Plymouth Rocks. Large eggs, however, are really produced at greater cost of food, as they require more material in their composition, and the hen that lays large eggs may not lay as many as a hen laying small ones. For that reason they are really worth more, and a higher price should be demanded for them, which customers will willingly pay if they can get them. The breeds mentioned as laying large eggs are all non-sisters, and their eggs are white, but that is no objection, as buyers will always prefer extra large eggs to those that are small and lack uniformity, whether dark or light in color.—**Weekly Witness.**

# THE NEWS IN BRIEF

## Items of Interest Gathered By Wire and Cable

### GLEANINGS FROM DAY TO DAY

**Live Items Covering Events of More or Less Interest at Home and Abroad.**

New York suffered a fire Friday in an apartment store with a loss of \$500,000 and 21 persons hurt. It is believed that a million dollars worth of jewels are in the ruins.

The Kernersville Woolen Mills, Kernersville, N. C., were burned Friday with products and raw material. The loss is estimated at \$20,000.

John B. Sharp was acquitted Friday, of the charge of conspiracy in the slaying of E. W. Carmack at Nashville, Tenn., and Judge Hart sent the disagreeing jury back to further consider the case of the Coopers.

It is announced that President and Mrs. Taft and ex-President and Mrs. Roosevelt walked to church last Sunday.

Arrangements have been completed to raise the first torpedo boat of the Confederacy from the bottom of Lake Ponchartrain. The boat is lying near Spanish Fort, where it went down. It is proposed to place this vessel on the lawn of the Confederate Soldiers' Home in New Orleans.

1,500 horses have been quarantined in Philadelphia on account of a peculiar mange.

Jack Johnson the world champion pugilist is threatened with prosecution if he returns to his former home, Galveston, Texas, for violating the law in having a white wife, besides the fact that a colored woman there says she is his lawful wife.

An aeroplane was christened in New York city last Saturday in ceremony like that of a ship, including the breaking of a bottle of champagne.

The Seattle exposition will open on June 1st and news direct from there assures the public that 90 per cent of the work was complete on the 1st of March, making it safe to say it will open in completeness.

More than 100 cases of illness occurred at Vinsenes, Ind., last week at a centennial feast of Masonry.

The New Haven, Conn., railroad has forbidden any of its employees to smoke while on duty.

A Burglars' Trust has been discovered in which the light fingers of Chicago and Cleveland, O., exchange their liftings for easier disposal.

One Bernard Solomon, of Mantecello, N. Y., slashed himself a dozen gashes and set his house on fire, all with suicidal intent Monday. Being rescued and expecting to live he charged a neighbor with the deed, but finding he would die he confessed the truth.

Mrs. Bull, the widow of the late Dr. Bull, of New York, who died of tuberculosis at Savannah, Ga., announced that she will build and endow a hospital for the treatment of the dread disease.

Muskrat pelts have been introduced on the headgear of the aristocratic fair sex of New Orleans, and the demand has made muskrat hunting an industry which inures to the safety of towns along the levees of the Mississippi.

### Washington Affairs.

Hon. Joseph Cannon was elected Speaker of the House of Representatives again last Monday.

The amended rules of the House takes away some of the powers of the presiding officer.

It is estimated that the Payne tariff bill, while reducing duties will increase the revenue as compared with the Dingley bill.

The armored cruisers West Virginia, Colorado, Maryland, Pennsylvania, Tennessee, California, South Dakota and Washington, eight of the finest of our sea fighters are designated to take part in the Seattle Exposition.

Assistant Secretary of the Treasury Coolidge says the receipts for the first 15 days of March have been 27 per cent better than for the same period a year ago, while the difference in expenditures has been 65 per cent in the treasury's favor.

Lieut. Commander H. J. Cone has been made the head of the bureau of navy engineering, with the rank and pay of a rear-admiral. He distinguished himself in the round-the-world trip.

### Foreign Notes.

The insurrection started in Cuba last Monday came to an end Thursday night when the entire band surrendered to the civil authorities.

The Cuban vice president, Alfredo Zayas, left Havana last Saturday for the United States, taking with him his son whom he will place at Annapolis prior to entering Cornell.

# PREVENTING PAINT TROUBLES.

It's easy enough to recognize the symptoms of poor paint, after it has been on awhile—after its inherent tendency to crack and peel and scale and blister, etc., has developed into trouble. You know these paint "diseases" usually indicate adulteration or substitution in the paint materials. And you know the only remedy is re-painting.

A little knowledge of paint and painting requirements, and how to make sure of the purity and quality of materials, would prevent all trouble, and save the big extra expense of re-painting; just as a proper knowledge of simple health-laws, and observance of them, prevents sickness.

A complete painting guide, including a book of color schemes, specifications for all kinds of painting work, and an instrument for detecting adulteration in paint materials, and free directions for using it, can be had free by writing National Lead Co., 1902 Trinity Bldg., New York, and asking for Houseowner's Painting Outfit No. 49.

A very simple guide in the purchase of white lead (the only sure and safe paint material) is the famous "Dutch Boy Painter" trademark; that trademark is an absolute guarantee of purity and quality.

### Here and There.

The Legislature of Texas has extended a most cordial invitation to President Taft to visit the State. If, during the process of enlarging the White House, the President's quarters should be at all cramped, he will find plenty of room in Texas.—**Louisville Courier-Journal.**

The poor food men say that benzoate of soda is not harmful if taken in small doses. All right, just to be on the safe side we'll have a physician prescribe ours.—**Philadelphia North American.**

### A CURE FOR FITS.

The Treatment Is to Accomplish What Science Has Been Struggling to Attain for Centuries.

The intense interest that has been manifested throughout the country by the wonderful cures that are being accomplished daily by epileptics still continues. It is really surprising the vast number of people who have already been cured of fits and nervousness. In order that everybody may have a chance to test the medicine, large trial bottles, valuable literature, History of Epilepsy and testimonials, will be sent by mail absolutely free to all who write to the Dr. May Laboratory, 548 Pearl Street, New York City.

The epileptic cure is creating great public interest, as well as among Doctors, Students, Hospitals and visiting Physicians.

It's almost as difficult to live down a bad reputation as it is to live down a good one.

**Mrs. Winslow's Soothing Syrup for Children** teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Ingratitude is the world's reward.—**French.**

**Red, Weak, Watery Eyes** Relieved by Murine Eye Remedy. Compounded by Experienced Physicians. Conforms to Pure Food and Drug Laws. Murine Doesn't Smart; Soothes Eye Pain.

Gifts persuade even the gods.—**Greek.**

Your working power depends upon your health! Gardfield Tonic corrects disorders of liver, kidneys, stomach and bowels; overcomes constipation, purifies the blood—brings good health.

How forcibly are right words.—**Job**

Rheumatism, Neuralgia and Sore Throat will not live under the same roof with Hamlin's Wizard Oil, the best of all remedies for the relief of all pain.

Come, gentle spring—ethereal mildness, come.—**Thompson.**

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At druggists.

Loan oft loses both itself and friend.—**Shakespeare.**

**Many Children Are Sickly.** Mother Gray's Sweet Powders for Children, compounded by Mother Gray, nurse in Children's Home, N. Y., cure Feverishness, Constipation, Stomach Troubles, Teething Disorders, Destroy Worms. All Druggists, 25c. Sample FREE. A. S. Olmsted, Le Roy, N. Y.

Opinions are a good deal like old shoes—a coat of polish makes considerable difference in them.

### COVERED WITH HIVES.

**Child a Mass of Dreadful Sores, Itching, Irritating Humor for 2 Months—In Terrible Plight—Disease Cured by Cuticura.**

"My six year old daughter had the dreadful disease called hives for two months. She became afflicted by playing with children who had it. By scratching she caused large sores which were irritating. Her body was a complete sore but it was worse on her arms and back. We employed a physician who left medicine but it did not help her and I tried several remedies without avail. Seeing the Cuticura Remedies advertised, I thought I would try them. I gave her a hot bath daily with Cuticura Soap and anointed her body with Cuticura Ointment. The first treatment relieved the itching and in a short time the disease disappeared. Mrs. G. L. Fridhoff, Warren, Mich., June 30 and July 13, '08."

Potter Drug & Chem. Corp., Sole Proprietors of Cuticura Remedies, Boston, Mass.

To commonplace people the extraordinary seems impossible.—**Cardinal de Retz.**

**FOR HEADACHE—HICK'S CAPSULES** Whether from Colds, Heat, Stomach or Nervous Troubles, Capsules will relieve you. It's pleasant to take—acts immediately. Try it, 10c., 25c. and 50c. at drug stores.

**DO YOU WANT SOFT FEATHERS AND POCKET** We place our soft feathers in our pocket...  
DO YOU WANT SOFT FEATHERS AND POCKET
