THE BEST MEDICINE FOR COUGHS AND COLDS

relieve that racking cough. It will often prevent the most serious throat and chest ailments, 25 cents.

AND ENDS.

a law which provides agents may be sent misrepresent the brand sell, but probably no effort is made to enforce the law, else the jails would be bursting open.—The Farm World.

It's always impossible to tell where an orderly woman will put things.

Mark the perfect man, and behold the upright.—Psalm xxxvi, 37.

The best way to make time fly is to borrow money for ninety days.

Why most of us really wish to visit, is to have some one listen while we talk.

One way to keep boys on the farm is to hire more pretty dairy maids.

Men often swear to keep from crying, and women often cry to keep from swearing.

There's one advantage about tight shoes. They make you forget all your other trouble.

A cyclone cellar won't protect you from domestic tempests.

The farmer who is well able to buy a motor-car certainly auto.

The best way to ascend steadily in the world is to keep on the level.

Some people's generosity consists in giving away everything you tell them.

It is true that we all want a square deal? Honestly now, isn't it a fact that most of us want just a little the best of it? So, 8-10.

THE STORY OF THE PEANUT SHELLS.

As everyone knows, C. W. Post, of Battle Creek, Michigan, is not only a maker of breakfast foods, but he is a strong individualist, who believes that the trades-unions are a menace to the liberty of the country.

Believing this, and being a "natural-born" scrapper for the right, as he sees it, Post, for several years past, has been engaged in a ceaseless warfare against "the Labor Trust," as he likes to call it.

Not being able to secure free and untrammelled expression of his opinions on this subject through the regular reading pages of the newspapers he has bought advertising space for this purpose, just as he is accustomed to for the telling of his Postum "story," and he has thus spent hundreds of thousands of dollars in denouncing trades-unionism.

As a result of Post's activities the people now know a whole lot about these organizations: how they are honeycombed with graft, how they obstruct the development of legitimate business, curtail labor's output, hold up manufacturers, graft upon their own membership, and rob the public. Naturally Post is hated by the trades-unionists, and intensely.

He employs no union labor, so they can not call out his men, and he defies their efforts at boycotting his products. The latest means of "getting" Post is the widespread publication of the story that a car which was recently wrecked in transmission was found to be loaded with empty peanut shells, which were being shipped from the South to Post's establishment at Battle Creek.

This canard probably originated with President John Fitzgerald, of the Chicago Federation of Labor, who, it is said, stated it publicly, as truth.

Post comes back and gives Fitzgerald the lie direct. He denounces Fitzgerald's statement as a deliberate falsehood, and underhanded and cowardly attempt to injure his business, having not the slightest basis in fact. As such an effort it must be regarded. It is significant that this statement about "the peanut shells" is being given wide newspaper publicity. In the "patent inside" of an Eastern country paper I find it, and this is not naturally is that labor-unionists are insidiously spreading this lie.

An institution (or a man) which will resort to moral intimidation and to physical force, that will destroy machinery and burn buildings, that will make no effort to kill if necessary to effect its ends, naturally would not hesitate to spread falsehood for the same purposes.

We advise Post. While we have no enmity toward labor unions, so long as they are conducted in an honest, "live-and-let-live" kind of a way, we have had enough of the tarred end of the stick to sympathize thoroughly with what he is trying to do. He deserves support. A man like that can not be killed, even with lies. They are a honking every time. Again we know for hasn't this weapon, every weapon that could be thought of, been used (and not simply by labor unions) to put us out of business too?

I am going to drink two cups of Postum every morning from this time on, and put myself on a diet of Grape-Nuts. Daily for Post.—Editorial in The American Journal of Clinical Medicine.

Southern Agricultural Topics.

Modern Methods That Are Helpful to Farmer, Fruit Grower and Stockman.

Gumption on the Farm.

If you hoe your own row with diligence, you will have little leisure to note how your neighbor is hoeing his. Better have patches on your pants, than a lot of unpaid bills and threatening creditors.

How can any man sleep well at night when he has scolded and whipped his horses all day?

Enough dry wood and chips to last a week ahead is riches; fire out and the last stick gone is poverty.

If you tell a boy, day after day, that he isn't earning his salt, he will soon be likely to work down to that estimate.

If the soil needs underdraining, now is an excellent time to lay the tiles. They should be at least two and a half feet deep.

Don't give the cats and dogs stags, dirty or soapy water to drink. See that it is clean and fresh. You know how it is yourself.

It pays better to be behind everybody else in getting fall grain sowed, and thus have the ground well stirred, than to hog it over and have it half done.

Money spent on booze is wasted, spent on clothes is vanity, spent on food is gone, and fooled away is wicked; but money spent for seed or a fruit tree is wisely invested.

The patrons along a rural route are apt to expect too much from the carrier. It would be a great help to the farmer to apply to the Government for a copy of the postal laws in reference to the regulation of rural carriers.

Are you planning to build a new house? Don't make it too large. Many houses are so large that the women folks are kept scrubbing a good share of the time. Large enough for all practical purposes, but no larger, should be the rule.

In an address on the subject of corn, Professor Beal remarked that the topmost ear was the best for seed; of two fields, one planted with seed taken at random and the other selected in the field, the latter yielded as much again as the former.—Farm Journal.

Dairy Thoughts.

No cow can supply blood for unlimited numbers of ticks and give lots of milk at the same time and keep it up.

If one cannot buy cows of the recognized dairy breeds, one can at least select cows of the breeds he can get that have a peculiar fitness for dairy work.

This is particularly the time of year that a separator has a decided advantage over skimming milk, and a separator is a good thing all the time.

Do your cows wade in dirty water? Their udders cannot be clean if they do, and need cleaning before milking. A lot of bother? Yes, and profitable.

Germs multiply much faster in warm weather, and especial attention is necessary at this time to keep filth from carrying germs into the milk and doing it harm.

There is no section of the country where dairying is carried on extensively and intelligently that fails to prosper. Neither are there men who do dairying intelligently who fail to prosper at it.

Suppose you were so disregardful of your cows' comfort that you did not care whether ticks ate them half up, it would still pay to paint them occasionally with cottonseed oil to kill the ticks and keep up the milk flow.

Sometimes we hear so much about using only dairy breeds for milk production that it is likely to discourage the man who can use only a plain "cow." No one should be discouraged by any such means. He can do the best with the cows he can get, and later do better by the use of better cows. All should encourage the man who is making a start in life or in dairying, so he will develop. Later he will make a good patron of breeders of well bred milkers.

Combination Clover Cover Crop.

A. G. P., Jeffersonian, writes: How would it do to sow rye with crimson clover for hay or green manure? Would the rye overshadow the clover too much? Would both crops be ready for hay at the same time? What do you think of sowing rye and sapling clover, and mowing the rye early for hay, and later either mow or plow under the clover?

Answer: It will be good practice to sow crimson clover in your orchard about the middle of July to the first of August. Crimson clover makes an excellent clover crop, and as a rule does very well in this State if put in early enough to make a strong growth before cold weather. Rye and crimson clover do very well together if a light seeding of rye is used. You should not use over three pecks to one bushel of rye, and at least fifteen

USE FOR GLASS CANS.

The wide, covered glass cans in which many household commodities come should be saved for leftovers. Small quantities of vegetables, fruits, cereals or soups keep in excellent condition, as there is not so much surface exposed in them as in a flat dish, while they take but little space in cupboard or refrigerator.

Expect little, but do your everlasting best to land a whole lot.

pounds of good, clean germinable clover seed. This combination has done very well on one or two occasions in the writer's experience. There is little advantage, however, in sowing the rye, and the clover will not make as strong and vigorous growth as when seeded by itself. Rye and sapling clover could be grown together fairly well. The rye could be cut for hay and the sapling clover allowed to mature. A light seeding of rye should be used, and the plan is practicable, of course, if you secure a stand of sapling clover.—Andrew M. Soule.

Steppage at the Point of Teat.

A very common trouble in the ordinary dairy is to find an animal with the point of the teat closed, either due to a bruise of the teat itself or to infection of the milk duct, which causes a little scab to form over the point of the teat and unless this is properly handled with care and cleanliness, the infection is apt to cause a loss of the entire quarter.

The proper manner in which to handle and treat such cases is to thoroughly wash the teat in an antiseptic solution, then dip a teat plug into a healing ointment and insert it into the point of the teat, allowing same to remain from one milking to another. In this manner closure of the point of the teats can be overcome in a very simple and satisfactory way.

Never use a milking tube if it can be possibly avoided, as there is much danger of infecting the entire quarter by the use of the tube.—Dr. David Roberts.

Blanching Celery.

Blanch it in accordance with circumstances. If you grow the self-blanching sorts, and especially if you want them early and must blanch them in hot weather, then use boards eight to twelve inches wide and of any length. Also, if you have only a small spot of ground available for celery, and must plant close, the board-blanching method is what you want.

Any kind of inch boards will answer the purpose. Set two boards up on long edge, one on each side of the row of plants, slanting toward the plants, and fasten them there by little stakes driven into the ground outside and inside. The space left between the upper edges of the two boards need not be more than two or three inches. This gives room enough for the stalks to come through. Sometimes we just lean the boards against the row of plants, one from each side.

Tomato Black Rot.

This is a very prevalent rot of the tomato, and attacks the fruit most frequently. It is a wound parasite, the spores readily lodging and germinating in the style, the point of insertion of the stem or any other crack or wound in the plant or fruit.

When infected, a dark colored mycelium penetrates the tissue, forming a rotten spot within the tomato, and in consequence of the rotting of the tissues a sunken region appears on the surface. Later on, blackish olive colored spores are produced on these spots. The spores are many-celled and germinate quickly under damp conditions.

Through spraying with potassium sulphide at frequent intervals will control the disease. All infected parts should be cut off and burned. Fresh stable manure is said to be harmful in that it aids the fungus to spread.

New Blood.

The mistaken ideas about introducing new blood into a flock of poultry are something truly wonderful. The popular notion is that one must every year get a new rooster, no matter of what breed, to keep the stock from "running out," when this is the very thing to make it run out. Proper mating and selection for vigor in the same line and breed is what builds up a strain. It gives fewer conflicts of hereditary traits; fewer introductions of undesirable tendencies, and a greater percentage of good ones.—T. C. K., in the Industrious Hen.

Caponing.

It takes from seven to nine months for a capon to develop into excellence. Those weighing six pounds command earliest sale, but nine to ten pound birds bring best prices. Caponizing is performed when the birds are about two or three months old—before the comb develops.

Farmers Who Don't Worry.

The farmer who raises his own bread and meat and fruit and vegetables, and makes cotton his surplus money crop, is in a position to hold his cotton until the price suits him. He is the farmer who isn't worried by debts and mortgages.

INVENTOR DEAD.

Worcester, Mass., Special.—Thomas H. Dodge, a philanthropist and inventor of the cylinder printing press, died at his home here last Saturday, aged 87.

To be a philosopher all you have to do is to preach what you don't practice.

At Americus, Ga., ten horses valued at \$5,000, were burned to death.

A Good Complexion.
You will get rid of all skin blemishes and pimples if you thoroughly purify the blood by taking Rheumacide. Rheumacide is put up in liquid and tablet form, and is sold in 25c and 50c bottles by your druggist. Or, we will mail you a 25c bottle of tablets on receipt of price, 25c. (Coin or stamps.) Booklet free. Bobbitt Chemical Co., 114 timore, Md.

Much of the "art" and "culture" you hear so much about is simply loafing.

To Cure a Cold in One Day
Take Laxative Bromo Quinine Tablets. Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25c.

If you keep right, other things will keep right.

Have you a cough or cold? If so, take at once Allen's Lung Balm and watch results. Simple, safe, effective. All dealers.

Knowledge and timber shouldn't be much used till they are seasoned.

Nothing More Dangeous
Than a neglected cough," is what Dr. J. T. Hammond, professor in the Eclectic Medical College says, "and as a preventative remedy and a curative agent, I cheerfully recommend Taylor's Cherokee Remedy of Sweet Gum and Mullein. Tested 50 years. Nothing better for whooping cough, croup or consumption. At druggists, 25c, and 50c.

According as the man is, so must you humor him.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Progress is the law of life; man is not man as yet.—Browning.

FOR COLDS AND GRIP
Hick's CAPSICUM is the best remedy—relieves the aching and feverishness—cures the cold and restores normal conditions. It's liquid—effects immediately. 10c, 25c, and 50c, at drug stores.

The greater the fear the nearer the danger.—Danish.

In Winter Use Allen's Foot-Ease.
The antiseptic powder. Your feet feel uncomfortable, nervous and often cold and damp. If you have sweating, sore feet or tight shoes, try Allen's Foot-Ease. Sold by all druggists and shoe stores, 25 cents. Sample sent free. Address Allen S. Olmsted, Le Roy, N. Y.

Our life is what our thoughts make it.—Marcus Aurelius.

Rheumatism Cured in a Day.
Dr. Detchon's Relief for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action is remarkable. Removes the cause and disease quickly disappears. First dose greatly benefits. 75c and \$1. All druggists.

Children are the anchors that hold another to life. So, 8-10.

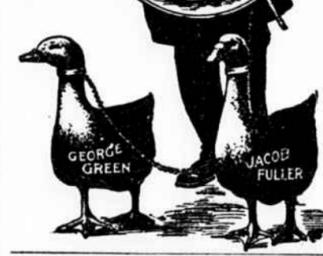

Constipation causes and seriously aggravates many diseases. It is thoroughly cured by Dr. Pierce's Peppermint. Tiny sugar-coated granules.

A favor becomes old sooner than any other thing.—Modern Greek.

AGENTS WANTED—To sell our Famous "Magic Cleaning Fluid" Removes All Grease, Dirt from Ladies' and Gents' Clothing. Big profits. Southern Supply Company Box 357 Pine Bluff, Ark.

This is Cyrus O. Bates, the man who advertises Mother's Joy and Goose Grease Liniment, two of the greatest things known to humanity.

Mother's Joy is a Premium Cure and Never Fails

BROWN'S BRONCHIAL TROCHES
Save the voice in all kinds of weather. Singers and public speakers find them invaluable for clearing the voice. There is nothing so effective for Sore Throat, Hoarseness and Coughs. Fifty years' reputation. Price, 25 cents, 50 cents and \$1.00 per box. Samples mailed on request. JOHN I. BROWN & SON, Boston, Mass.

SHIP FURS

To Richmond, Virginia, CLARENCE COSBY. Pays Market Prices and Deals Fair
