MAN OPERATES BOTH TRACTOR AND IMPLEMENT

One Man Discs 27 Acres a Day with the New

**MOLINE UNIVERSAL TRACTOR**

*It Solves The Farm Help Problem*

Discing is rapidly and economically done with the new Moline-Universal Tractor, Model D, equipped with an 8-foot tandem disc harrow covering 27 acres in ten hours. With a 10-foot disc harrow he covers 33 acres, and with a 20-foot peg-tooth harrow 73 acres.

The light weight of the Moline-Universal Tractor, 3,350 pounds, makes it especially adapted for discing and similar work, as it does not pack the soil and uses but little fuel, running on less than half throttle most of the time. It is light, but more than enough power to pull two 14-inch plows at high speed, all its weight being traction weight.

The Moline-Universal Tractor attaches directly to the implement and forms a single, compact unit with it that is controlled by the operator from the seat of the implement, where he must sit to do good work. One man with the Moline-Universal does as good work as two men with the average tractor.

The Moline-Universal is adapted for all classes of farm work. Its high clearance, 29 1/2 inches, makes it ideal for cultivating, and it is equally well fitted for planting and harvesting. In addition, it has ample power for belt work, pulling a 24-inch grain separator or 16-inch ensilage cutter with ease.

There is work on the farm every day in the year for the Moline-Universal Tractor. It will do every field operation that can be done with horses and do it better, faster, and cheaper. This is why the Moline-Universal really replaces horses, and, at the same time, by enabling one man to do much more work than ever before possible, solves the farm help problem.

The detailed construction of the new Moline-Universal, Model D, is the best it is possible to manufacture. Perfected 4-cylinder overhead-valve engine, electric starting and lighting system, complete enclosure of all working parts, and fifteen Hyatt roller bearings, are a few of the main features.

We invite you to examine this machine at your earliest opportunity.
