How To Make Money

There are plenty of men in Roswell who have gotten rich on real estate, and it is the easiest and only safe way to make money. Just for example, consider that 240 acre block of close in, tilled Hondo Land I have for immediate sale. It will double in value in a few months, as soon as the water is turned on. It is the best thing I have ever offered, and while it is a cash proposition, I can arrange terms if you would like it that way.

ROOM 8—TEXAS BLOCK,
PHONE 375. ROSWELL, N. M.

An Echo From Boston.

Boston, Mass., January 15, 1907.
To the Editor of the "Daily Record"
Roswell, New Mexico.

Dear Sir:—
Your issue of January 2nd, 1907, which lies before me contains the report of a sermon reported as given by the Reverend Edwin Davis.

The evident spirit of journalistic fairness in which you introduce the subject leads me to feel that you will be glad to put a few facts before your readers for their "earnest, thoughtful and deliberate consideration."

The book, "Science and Health," which the Reverend Mr. Davis affects to criticize adversely is recalling Christendom to a duty it has been too long disregarding,—namely, the healing of the sick as well as the reforming of the sinner. A multitude of people have been healed of disease by reading and studying this book. Its beneficent ministrations is going on with an accelerating momentum, and earnest Christians are everywhere expressing profound gratitude to its author, Mrs. Eddy, for the health, happiness and the measure of holiness her work has brought to them. This incontestable fact should bring joy to the heart of every well wisher of the race.

I take it that the Reverend Mr. Davis cannot be familiar with the conclusions reached in regard to the nature of matter by an unbroken chain of philosophers since Plato down to our own time, else he could not afford to throw aside Mrs. Eddy's teaching on this question with such flippancy and abruptness. Careful reading of Spencer, Huxley, Professor Fiske, and other highly respected philosophers of modern times shows that they are practically agreed on this question. Their opinion is in brief that matter itself is unknowable, its phenomena only being capable of apprehension by us. Mrs. Eddy's teaching in regard to matter is radical, but students find it in complete accord with a true understanding of God as Spirit and of His creation as spiritual.

The meaning of the word "real" as applied in metaphysics seems to have escaped the Reverend Mr. Davis. That which is metaphysically real is also eternal and indestructible. This is a question of the use of terms, and more over I take it that our critic would be the last to insist that sickness must of its very nature be eternal and indestructible. It is difficult enough, as

it is, today to get rid of sickness, and any system which combats the theory of its eternal nature is lifting the race out of a condition which is pitiable indeed.

Mrs. Eddy is not the originator of the teaching that death must eventually be overcome. Jesus said, "he that believeth on me shall never see death," and Paul wrote "death is the last enemy that shall be overcome." If Mrs. Eddy's interpretation of angels as "divine messages" seems unsatisfactory to the critic, nevertheless it is affording solace and peace to those who are learning to hear God's messages and obey.

Christian Scientists, as I know them are more conscious of their shortcomings as mortals than most people, and Pharisaical attitude of mind is totally foreign to the teachings of Christian Science, which insists upon repentance and reformation as absolutely essential to any progress whatever. By closely studying Jesus' works, His actual healing of the sick as recorded, the critic will observe that he enforced no supposed hygienic law, nor taught His disciples to do this, but relied upon spiritual means. In the light of these works, Mrs. Eddy's teachings about the sufficiency of spiritual law becomes clear and is seen to be both Christian and truly scientific.

The Reverend gentleman's flippant remarks about the practice of Christian Science are rebuked by the fact that this practice is daily and hourly raising up the sick and dying from beds of pain and despair, and that it is doing its principal work in behalf of those who have tried and tested material methods and found them wanting.

The term "mortal mind" used by Mrs. Eddy may be quite readily understood by turning to Paul's use of the terms "carnal mind" or "fleshy mind." It is obvious that this carnal or mortal mind contains within itself evil of all forms, including the evil laws supposed to govern poison as well as those governing sin.

Certainly Christian Science which is bringing joy into many households once darkened by disease and sin, reuniting the lost, saving little children as well as adults from supposedly incurable diseases, cannot be considered except in the light of a grand fulfillment of Christian duty, and it is earning its way to gratitude in the hearts of the people.

Yours truly,
ALFRED FARLOW.

COUNTY TO BUILD BRIDGE CITY TO PAY FOR IT.

At an adjourned session of the city council Tuesday evening the city accepted the proposition of the county commissioners for the county to build a bridge over North Spring river at the northeast corner of town, provided the city pay for it in July, when the city treasury will be replenished. The work will cost about \$900. It was also ordered that the Pecos avenue bridge over the Hondo be placed in a condition to be used. The council discussed tiggling a drainage ditch from Second street to the Hondo, near the railroad, the property owners being willing to pay half the expense. An estimate was ordered, returnable at the next meeting.

The tiling of irrigation ditches was discussed at length, and Major Mark Howell expressed his opinion that the tiling already made could not be used in the south end ditch, and that the best thing that could be done was to cement all the ditches. All of the councilmen object to the present situation and still hope to do something in the matter. In the meantime, the ditches were ordered cleaned.

Will Robinson, the new councilman from the Third ward, was sworn in, and recess was taken, subject to call.

DALLAS ATTORNEY FOUND SERIOUSLY WOUNDED

Dallas, Jan. 24.—Following a conference with his attorneys relative to a charge of misusing the mails, Joseph H. Cowan, who recently came into prominence because of his efforts to recover a large block of land in the heart of the uptown district of New York City, known as the Hartsfield estate, yesterday retired to an adjoining room and several moments later was found seated behind a bookcase suffering with a serious wound in his left breast. The property Cowan claims is estimated to be worth \$200,000,000. The action brought against him in the federal court was based on correspondence he had had with other claimants.

Lasting impressions for good will be made on your child's mind by witnessing the Passion Play and hearing the lecture on the Life of Christ. Children will be admitted for 25c.
