**One of the advantages of Grape-Nuts food is that it is predigested in the process of manufacture.**  
The starch contained in the wheat and barley is transformed into grape-sugar by exactly the same method as this process is carried on in the human body, that is, by the use of moisture and long exposure to moderate warmth which grows the diastase in the grains, then long baking completes the remarkable change from starch to grape-sugar.

Therefore, the most delicate stomach can handle Grape-Nuts and the food is quickly absorbed into the blood and tissues—certain parts of it go

ing directly to build and nourish the brain and nerve centres. "There's a Reason."

**The Only Cat She Had, Too.**  
A woman went to Justice Miller's court the other afternoon and said: "Clem Ehlinger, the clerk, according to the Kansas City Times: 'I want you to come right out to my house and arrest my husband.' 'Why?' asked the clerk. 'He got drunk yesterday, hit his boss and got fired,' said the woman. 'Then he came home and killed the cat—and it's the only cat I've got left.' 'Well, I can't arrest a man for killing a cat,' Mr. Ehlinger replied, 'but I'll tell what I can do. I know where you can get another cat.' The woman took the address and left.

### Food Poisons

90 Per Cent of All Diseases Result of Undigested Putrefying Foods.

Men of affairs, women of society and children with active brains are too often sedentary in their habits, giving little time to exercise. To this evil is added that of high and irregular living—such a result, the stomach can not stand the demands made upon it. The abused and overtaxed stomach does not properly do the work of digestion, food taken in fermented and the poisons permeate the whole system. The body loses its weight and becomes a prey for the attack of whatever disease it may encounter.

Did it ever occur to you how busy this stomach of yours is? It only holds three pints, but in one year you force it to take in 2,000 pounds of material, digest it and prepare it for assimilation into the blood. No wonder it rebels when overworked. It is crowded with steaks and pastry, irritates its juices with spices and acids, and expects the stomach to do its work. It can't do it.

All over the inner layer of the stomach are glands which secrete the juices necessary to digestion. The entrance of food into the stomach is the signal for these glands to do their work. The more the food, and the more indigestible, the greater the demand upon them and upon the muscles of the wall adjoining.

Think of the loss of high-seasoned game, vegetables, and appetizers contained into this little food-pipe, and then wonder, if you will, why you are dizzy or unbalanced or constipated. Don't blame your stomach or curse your fate that you should be born so unfortunate. Blame yourself and apply the remedy.

First, get a small package of Stuart's Dyspepsia Tablets, taking one after each meal and at bed time. They are not a medicine, but a digestive. Your stomach is worn out and needs help, and medicine. Stuart's Dyspepsia Tablets will do the work that the stomach fails to do. There's enough power in one grain of Stuart's Dyspepsia Tablets to digest 2,500 grains of ordinary food, so you needn't fear that anything you eat will remain in your stomach undigested.

Stuart's Dyspepsia Tablets will root the poison because they remove the cause—food fermentation. They are nature's own cure for dyspepsia. The best of troubles dyspepsia is father of can not be numbered, for a healthy stomach is the source of all health. Seize your opportunity before worse conditions confront you. Send today for a free trial package of Stuart's Dyspepsia Tablets. They will bring your stomach relief. F. A. Stuart Co., 150 Stuart Bldg., Marshall, Mich.
