Washington, June 1.—President Wilson told cabinet members today that he did not feel it to be wise for him to discuss Germany's reply to the American note until after he had consulted his cabinet and studied further questions involved.

The president said the American rejoinder, however, would not be many days delayed.

He spoke of having studied the official text last night and his intention to have a preliminary discussion with his cabinet today.

Calm and without showing any strain of the situation, the president received the Washington correspondents as is his custom.

He declared that probably he would draft a reply after the cabinet gathering.

Count Bernstorff will see the president tomorrow.

The president is said to be much impressed with practically the unanimous verdict of American editorial opinion that Germany's answer is not really an answer but an evasion of the greater issues of law and humanity.

His advisers say he regards it as a true reflection of opinion of the country and will endeavor by his action to express it.

Second Note Begun.

After the cabinet meeting this afternoon the preparation of a second note to Germany was begun and the note of warning to the warring factions of Mexico was completed.

It is understood a brief note will be dispatched to Germany asking whether the Imperial government intends by the answer to disregard international law.

If the German answer is unfavorable.

OUTSIDE STUDENTS MUST PAY FEE

SUPT. WILSON EXPLAINS RECENT ACTION OF STATE BOARD OF EDUCATION

State Supt. Wilson has issued the following:

The purpose of this letter is to inform you of the action of the board of education at its last meeting with reference to fees as provided for in senate bill No. 356.

After considering this measure at length and discussing fees charged by other states, I suggested to the board that it is unfair to charge students from a state where that state does not charge our students and that we should make our rules so as to extend to other states the same treatment as they extend to us. It was, therefore, passed by the board, by a unanimous vote, that we are to charge tuition to all students, by term or semester, as the case may be, to be paid in advance, the same tuition as is charged Oklahoma students for the same courses in the states from which those students come. It was, therefore, suggested and ordered by the board that the president of the university should collect data from other states and make a schedule or table showing the amount charged in other universities and that the normal schools should collect information regarding courses in the normal schools and make a schedule or table giving the different states, the amount of tuition charged and that all other secondary schools should make a like compilation and that this board be furnished with a copy after this compilation is made to be filed in the office of the secretary for the use of the board and that hereafter all students from other states entering for these courses shall be notified of these requirements on the date of entrance, and after they become students it will be the duty of the president of the institution to collect the tuition and turn same in to the state treasury as provided by law. This work should be completed before the opening of school for the fall term.
