MODERN HEALTH SYSTEM IN CITY

Card Index and Map to Give Detailed Sanitation Data.

Absolute and exact knowledge of health conditions in Oklahoma City at every moment is the purpose of the city board of health. An index system is being installed at the health office in the city hall. Births, deaths and diseases will be so carefully checked that not an item of detail will be lacking.

A large health map will show by colored pins where every case of sickness is located and what is the ailment, and still another pin will have a black head with a colored head on top. A pile of trash is reported on a residential lot, the owner is given notice to have it cleaned up by a certain date. The owner's name will be written on an index card, and the card put in the holder for the date of the clean up. Every morning an inspector will look over the cards for that day, and will visit the places indicated. If the trash has not been removed, a second notice will be served, and then, if no attention is paid to it, an arrest will follow.

An elaborate and complete health system is in process of making, and when it is finished Oklahoma City will have one of the most modern and easily comprehended health systems in the country.

Supplemental to these will be a card index, kept up daily by the sanitary officer and physicians' reports. A yellow card shows smallpox; red, diphtheria; green, scarletina; white, tuberculosis, and the like. In this way, by looking at the color of a card, anyone can instantly recognize the disease and can count the cases at the time, and find their location.

Sanitary inspection of premises will also be indexed. If a pile of trash is reported on a residential lot, the owner is given notice to have it cleaned up by a certain date. The owner's name will be written on an index card, and the card put in the holder for the date of the clean up. Every morning an inspector will look over the cards for that day, and will visit the places indicated. If the trash has not been removed, a second notice will be served, and then, if no attention is paid to it, an arrest will follow.

Negroes Are Curiosity to Native Huns

America's Colored Troops Had Boche Soldiers Bluffed.

(By The Associated Press.)

WITH THE AMERICAN ARMY OF OCCUPATION, Jan. 4.—Wherever American negroes have appeared in the area occupied by the Americans they have attracted great attention among the civilians. In Treves, Coblenz and other places, during the early days of the occupation, crowds assembled wherever any negro soldiers stopped in the streets and it was necessary for the military police to enforce the orders prohibiting gatherings in the public thoroughfares.

The German soldier also regards the negro with great curiosity. According to a discharged German soldier in Remagord, the German army, early in the war, offered a reward of four hundred marks for the capture alive of each negro. The discharged German soldier said that throughout the war German soldiers lived in great fear and even terror of the negroes and it was in order to overcome this fear that rewards were offered.

LEWIS UPHOLDS WILSON POINTS

U. S. Cannot Omit One Principle, Senator Says.

NEW YORK, Jan. 25.—Senator James Hamilton Lewis of Illinois, speaking today before the Lawyers' club in support of the proposal for a league of nations, declared that the American government in the peace settlement could not abandon a single one of President Wilson's fourteen principles without laying itself open to the charge of perfidy.

Germany, Senator Lewis said, would have the right to refuse to abide by the terms of the armistice. The allies would be justified in withdrawing from the peace table and all small nations of aspiring peoples fighting with the United States on the basis of the president's proposals would be excused before the world in turning from America.

"The peace was made by Germany and her people on terms of the fourteen points proposed by the United States including the proposal of the league of nations for future peace," said Senator Lewis. "These were adopted by the allies as their only terms of peace. It is impossible for the United States to withdraw one of her terms or postpone one or omit to press one."

Add to your meal some merriment, and a thought for kith and kin; and then as your prime ingredient a plenty of work thrown in.

But spice it all with the essence of love, and a little whiff of plays, and a wise old book and a glance above. Complete the well made days.

85 SCHOOLS IN DEBATE LEAGUE

City Manager Plan to Be Discussed by Schools.

NORMAN, Okla., Jan. 25.—(Special.)—Eighty-five Oklahoma high schools are in the race for the interscholastic debating championship of Oklahoma. The contest is being conducted under the auspices of the Oklahoma High School Debate League, with headquarters at the University of Oklahoma.

Ravages of influenza caused the league to get a late start this school year but from now on the war will fly until the championship is settled at the annual interscholastic meet here in April.

The state is divided into eight districts. From now until the middle of April will be devoted to settling district championships. Then the inter-district, semi-finals and finals will be held at the university.

Last year inter-district contests were held over the state but the late start this year necessitated a change of plan to speed things up.

The feasibility of the city manager plan for cities of more than 5000 population is the subject for debate this year. Arguments for and against it and a great amount of information relative to it have been published in a bulletin, "The City Manager Plan," edited by J. W. Scroggs, director of extension work.

The high school league is limited to schools with full four-year accredited courses. A second league composed of schools not fully accredited is being organized by Doctor Scroggs. It will debate the issue of government ownership of railroads.
