

DALLAS.

Four Hundred Thousand People Expected to See the Exposition of Texas Progress and Prosperity.

Every Train Coming is Loaded With Exhibitors from All Parts of the State.

HAIRD AT WORK.

DALLAS, TEX., Oct. 8.—The people of Texas need have no hesitancy about attending the fair on Thursday, the opening day. The scene presented at the grounds now is a guarantee that everything will be in readiness for the public. No less than 500 men are at work night and day straggling exhibits. It is now far from an idea of the grand scale the fair will be conducted on the year. The fairs of preceding years are indeed insignificant when compared with the magnitude and scope of this year's enterprise.

And all indications point to the largest attendance yet had at the Dallas fairs. From correspondence daily received from all parts of the country, it is apparent that at least 400,000 visitors will see this grand exposition of Texas progress, Texas prosperity, Texas progress and behold in the spirit of this people, their greatness and patriotism. All fears of yellow fever have been banished from the confines of the republic and all sections will be represented, save those which are and have been quarantined against.

Dallas—great, progressive, unexcelled in well directed effort—appreciates the occasion. She is piling a monument of evidence of commercial greatness in exposition hall. She is lining her thoroughfares with hunting and exciting archways over them. She is preparing to entertain her guests in metropolitan style. The county is displaying in a neat and attractive building on the grounds the products of the soil, the incense fruits of orchard and vineyard, and the various specimens of the handwork of its citizens.

Every train comes laden with exhibits from all parts of the state. Every train adds to the burden of humanity that is assembling from all parts of the country. Every body is busy. This is the time for Dallas of all times. Dallas will prove equal to the emergency and she bids the state welcome.

FAIR NOTES.

Frank Lorch arrived last night with the Tom Green county exhibits, and he says he is striking for the sweepstakes banner. The Farm and Ranch building will be a center of attraction. Besides containing a matchless exhibit from the Farm and Ranch experimental farm, it will be the headquarters of the Texas Gazette, where its scores of thousands of friends will be welcome. The Globe-Democrat and St. Louis Republic will have tents on the grounds, where they will receive their friends. Other papers will be assigned quarters where applications are made.

Messrs. T. M. Jones & Co., the Texas booksellers and calligraph agents, are hard at work arranging their exhibit. They were the first on the ground this morning. They have a beautiful space in exposition hall covered with rich Brussels carpet. They are arranging to-day an elegant assortment of calligraph cabinets and machines. The thousands of people who visited their exhibit last year, will find this year's display far ahead of former efforts. Though last year's display was an extra fine one. Several expert operators will demonstrate throughout the fair the excellence of the calligraph, and all who are interested will be shown its usefulness and economy. This will be headquarters for calligraph operators throughout the state.

LOCAL NOTES.

Hon. Henry Exall returned yesterday from a month's absence in the north. A specialist named Ovide died at the hospital to-day of consumption. He was from San Antonio. Professor W. P. Weaver of the public school, died yesterday after an illness of several weeks. The public schools were closed to day.

THE TEXAS STATE WEATHER.

Weather Crop Bulletin No. 5, Week Ending October 6, 1888.

TEMPERATURE.

GALVESTON, TEX., Oct. 6.—During the last seven days the temperature in Texas has been slightly below the seasonal average. There was cool weather for a day or so during the first of the week, but the last four days have given temperatures which ranged above the normal. In general the temperature has affected the cotton crop favorably. The mean temperature for the state was 70.5. This average is slightly below the seasonal normal, and one degree below the average of last week. The highest temperature reported from any station was (91°) at Cleburne on the 5th; lowest (44°) at Cleburne.

RAINFALL AND SUNSHINE.

There has been more than the average amount of sunshine. The weather has, in general, been clear and dry. Very little rain has fallen except in the southern counties. In some of the northern counties rain is needed badly. The places below report rainfall as follows, in inches and hundredths: Brenham, .57; Brookston, .10; Columbia, .19; Columbia, .08; Galveston, .03; Houston, .10; Huntsville, .11; La Grange, .72; Logansport, .22; San Antonio, .17; Victoria, .25. Average for the state, 0.68.

EXTRACTS FROM REPORTS.

OSCAR SAUNDERS, Austin—Outlook here remains fine. On the 21 instant heavy thunder storm at Giddings and vicinity. Reported damage to cotton crop.

E. A. Sterling, Bullock—Picking progressing favorably. The yield will be double that of last year. If weather continues favorable, the yield will be three times larger.

J. G. Sloan, Brenham—Weather and temperature favorable. Picking progressing rapidly.

BARRY BROS., Brookston—Low temperature has affected the cotton crop injuriously. The sunshine, however, has affected the crop favorably. Picking is about a month late.

J. P. Barry, Cedar Hill—Weather cool and dry. It has affected the cotton crop very favorably. The crop is about two weeks late, but will mature if the weather continues favorable.

J. S. Rogers, Columbia—While the weather in this vicinity has been most favorable, other parts of the county had more rain than needed. Cotton pickers in demand.

T. C. Osborn, M. D., Cleburne—Wind shifted to south to-day, and all danger of immediate frost is fairly over. As the crop opens, it is plain that an average

will not be realized. Worms are had in the eastern section.

T. B. Eiros, Cleburne—The rainfall has been beneficial to young cotton, and, although heavy, has not occasioned serious damage to matured cotton in the field. The prospect is encouraging.

W. H. Hamilton, Corsicana—Weather and temperature favorable to cotton.

H. D. Donald, Decatur—Weather clear and pleasant and as favorable for gathering crops as farmers could desire.

A. H. Hatcher, Houston—Cool weather during past week has retarded growth of cotton to the advantage of fruit. On the whole the staple has been benefited.

Joseph Cotton, La Grange—Cold and cloudy weather has effected the cotton crop injuriously. Too much rain this season for cotton, which averages nearly one-half bale to the acre. Vegetables and fruit product usually large, especially peaches and pears. Corn will average about thirty bushels to the acre, and hay fifteen and one-half bales per acre for one cutting. Two good cuttings can be gathered this season.

G. W. Koch, Lufkin—Very dry rain needed badly. Cotton coming in slowly. Good quality. Brouza cura for county only. Days and nights much warmer. Light shower on evening of the 5th. More needed.

Silas G. Licker, Mesquite—Cotton opening slowly. The nights are too cool and long for the staple. Paul Wippich, New Braunfels—Cotton worms have disappeared and new growth of cotton is doing well. On the whole, the weather has been favorable for cotton.

C. Range, New Uim—Weather and temperature favorable to crops.

John McGinnis, San Antonio—News from the cotton fields in this vicinity is generally very favorable. There is some complaint of worms in some localities.

William Schmidt, Victoria—Cotton worms were whipped from the stalks by the heavy rain on the 2d inst. Three houses were struck by lightning. Cotton growing splendidly. Pickers in demand.

W. H. Godver, West—Weather and temperature favorable to cotton.

M. J. Tucker, Weatherford—Picking progressing rapidly, and cotton receipts about 200 bales a day. S. O. Young, ALLEN EXCEL, Director. Signal Corps, Assistant Director.

GREENVILLE.

Cotton Coming in by the Hundreds of Bales—The Compress Full of Work.

GREENVILLE, TEX., Oct. 8.—On Saturday night while Lindsay Johnson, a young man of some sixteen years, was practicing with roller skates at the skating rink, the skates flew from under him and in catching himself on his hands he broke his right arm at the wrist, both bones being broken.

Cotton continues to come to this market by the hundreds of bales, the daily receipts ranging with unbroken regularity in the neighborhood of 400 bales, some days over this figure. A good number of wide awake and alert buyers are on the ground to thin out the bales. They fill up the square and streets adjacent.

Business is later opening fairly by fully two to three weeks this fall than is usual. Though good business is being done, the fall trade has not yet begun in earnest and in the way that counts. Most of the cotton thus far has gone to liquidate accounts with merchants, and this money has not been circulated to any appreciable extent.

It is now pretty generally conceded by those who ought to be in a position to judge, that even with the good fortune of a late frost Hunt county will not realize exceeding one-half of a good crop of cotton.

The new compress has now been running for several days and is reported to be doing most excellent work, even better than the press burned last fall, and of course has "no hands" fall.

A large supply of building material is on the ground to be used in the construction of the splendid flouring mill projected by the Hunt County Farmers' Alliance, and the work will soon be under good headway. The foundation is of the most substantial character and the plans, as shown your correspondent by President Rader, indicate that a building of the architectural design as well as of the most substantial build.

Many Hunt county farmers are sowing November wheat in view of the splendid mill which will be ready to grind in the next season.

TEXARKANA.

Jim Burrows, the leader of the Octet Belt train robbers, died in prison.

TEXARKANA, TEX., Oct. 8.—John Flynn, an old and prominent citizen of this city, and for many years a magistrate on the East Side, died last night and was buried this evening.

Jim Burrows, the leader of the Cotton Belt train robbers, who was sent from this place a short time ago to the penitentiary at Little Rock for safe keeping, died there last Saturday. William Brock, a member of the same gang, who turned State's evidence, is still in prison.

The Bowie county District court has been engaged to-day in the trial of George Edwards, the present Mayor of the Texas side of this city and a prominent candidate for Sheriff of the county, for the murder of Jack Carroll about eighteen months ago. The case has been on the docket for several terms, and the evidence, so far, seems to be in favor of the defendant. The arguments were continued until a late hour and it is doubtful if a verdict is reached to-night.

SHERMAN.

Henry Maynard on Trial for Outrageous Assault.

SHERMAN, TEX., Oct. 8.—The case of Henry Maynard, charged with an outrageous assault on Miss Carrie Peters, near Whittemont on the 10th day of last April, went to trial before a jury in the District court this afternoon. Miss Peters and her father were the only witnesses that have been examined up to a late hour to-night. Miss Peters' testimony is positive against the defendant. However, there are a large number of witnesses yet to be examined, and the result cannot be conjectured.

The City Council held a special session this evening for the purpose of making a tax levy for the present year, which was fixed at \$2 on the \$100.

Freight Train Ditched.

St. Louis, Mo., Oct. 8.—At a point two miles east of Washington, Ind., last night a freight train on the Ohio and Mississippi Railway struck a cow, ditching the engine and causing a bad wreck. The engineer was killed.

Log Cabin Logic.

Brawn and Brain!

The powerful engine, with its wonderful propelling power, coupled to the locomotive train freighted with the richest treasures of the intellectual looms of the country, what chances can stay the progress of this mighty force, when once under full steam along life's highway?

The American with brawn and brain does not see the necessity for titles of nobility, does not care for elevation by descent, he can reach out and pluck the stars.

But with brawn or brain impaired a man is badly handicapped in the mad race for success which is the marked characteristic of the present age.

The physical system is a most intricate piece of machinery. It ought to be kept well regulated, so that it will work harmoniously in all its parts than it is capable of an immense amount of work.

It is said that a watch, if expected to keep perfect time, must be wound daily. It will not keep good time unless it "runs for oil." More men break down because they don't "run regular" than for any other reason.

It is claimed by physicians that few men are killed by hard work. It is to the irregularities of modern social life that the high death rate is due. Men burn their candle at both ends, then wonder why it burns out so quickly.

The main thing in keeping the human machine in good working order is to keep the regulator all right. "The blood is the life," and sound health is measured so long as the blood flows through the veins a limpid stream of purity.

Regulate the regulator with Warner's Log Cabin sarsapailla, the old fashioned blood purifier, prepared after the best formula in use by our ancestors in good old Log Cabin days, and with the vigor of brawn and brain which must ensue, in your life's lexicon you will find no such word as fail.

AN OLD LAND MARK.

One of the Buildings Turned Over by the French Demolished at New Orleans.

NEW ORLEANS, LA., Oct. 8.—Workmen began last week demolishing the old United States court building in Royal street, between Dumain and St. Philippe street. This was one of the public buildings turned over to the French in the transfer of Louisiana in 1803. In this building Dumain sat when he issued the bench warrant for the arrest of General Jackson for contempt of court in refusing to obey the writs of habeas corpus, and here the victorious General was brought by a United States marshal to answer therefor. He was fined \$1000 by the presiding judge, flung out his check and passed it over to the clerk and was discharged.

San Angelo.

SAN ANGELO, TEX., Oct. 8.—The Crystal Ice Factory of a six-ton capacity per day and the San Angelo Laundry Company will begin operations this week.

Several attempts have been made recently to fire business houses here. Who the would-be perpetrators of so base a deed are our good citizens are as yet ignorant.

R. Talbert, cashier of the Comoro National Bank, left this morning for Winona, Miss., where he is to visit Miss Mattie Hill of that place on the 15th inst. Mr. and Mrs. Talbert will return to San Angelo on the 25th.

A heavy rain, lasting seven hours, fell here to-day.

Vigor and Vitality.

Are quickly given to every part of the body by Hood's Sarsaparilla. That tired feeling is entirely overcome. The blood is purified, enriched and vitalized, and carries health in its course to every organ. The stomach is sound, and strengthened, the appetite restored. The kidneys and liver are reformed and invigorated. The brain is refreshed, the mind made clear and ready for work. Try it.

Hillsboro.

HILLSBORO, TEX., Oct. 8.—The following business has been had in the District court to date:

H. N. Penrod, murder, indicted by the grand jury, arrested and lodged in jail—will have habeas corpus trial Wednesday.

J. A. Cox, assault with intent to murder, indicted; arrested and gave bond in the sum of \$500 with A. Rosenbaum and J. J. Yarb as bondsmen.

C. T. Chas., assault with intent to rape, indicted; arrested and still in jail.

Wylie C. Dyer vs. Benjamin Clark et al, judgment for plaintiff for \$760.

Negro Co-Defender Shot.

ABERDEEN, MISS., Oct. 8.—Yesterday morning Slep Anderson, a colored butcher, met Solomon Copely, a negro farmer, in front of the Methodist church. Anderson accused Copely of planting conjuring bottles and voodoo roots around his house. Copely denied the charge, calling Anderson a liar. Anderson drew a revolver and fired, killing Copely instantly. The negroes claim that Anderson did right, as Copely was regarded by them as a professional conjurer.

A Dred of Trust.

NAVASOTA, TEX., Oct. 8.—C. V. Vaughan to-day made a deed of trust to James H. Freeman on his stock of general merchandise, notes, accounts and surety bonds, for the purpose of securing certain preferred creditors. The securities are about \$25,000, including about \$9,000 in notes and accounts. The liabilities are estimated at about \$16,000.

Callahan County at the Fair.

BAIRD, TEX., Oct. 8.—Major D. Richardson and Captain W. J. Mathey, as commissioners of Callahan county's immense exhibit, leave on the noon train to-day for the Texas State Fair to place the exhibit in position, and if the people attending the fair are not looking a "little" out, Callahan county will make some lasting mashes there.

J. Hesteron District Court.

JEFFERSON, TEX., Oct. 8.—The United States District court for the Eastern district of Texas which adjourned last week on account of the illness of Judge Sable, will convene to-morrow morning with a very heavy criminal docket and one of the heaviest civil dockets known for years. One suit involves the title of several sections of railroad land.

Weekly Gazette for the week ending 10 cents per month.

REMEMBER THE

OPENING DAY on OCTOBER 11th,

Will be the Great Day of the

TEXAS STATE FAIR

—AND—

DALLAS EXPOSITION.
