### 554 CASES OF DIPHTHERIA REPORTED IN STATE OF TEXAS

The Sanitary Report made by City and County Health Officers to the State Board of Health for the month of October shows 554 cases of Diphtheria.

59 Counties out of the 252 counties in the State made reports of contagious diseases. 57 counties reported Diphtheria. The largest number of cases in any one county was 41.

If 15,000 units of antitoxin on an average was given to each patient, 8,310,000 units were used during this month. At \$12.50 for 15,000 units (the usual price), this quantity of serum would cost the people of Texas \$10,387.50, but if bought under the new contract made by the State Board of Health in September, 1915, at \$4.00 per 10,000 units, costs only \$2,324, showing a saving of \$7,963.50.

The State Health Department, including the Maritime and Border Quarantine Service, costs the State \$4,220 per month, leaving a difference in favor of the tax payers' pockets of \$2,342.50.

Many people did not get the advantage of this saving as the plan of distribution has not become generally known.

By the State Board Contract, distributing stations were established in every County Seat and all those central points where a druggist would accept a contract. This serum is inspected and passed by the U. S. Inspectors, with the same care and precision used as in the case of other Laboratories which sell their products at three times the price. If the people care to save this loss, the State Board of Health has made it possible for them to do so.

### A Statement.

Snyder, Texas, Nov. 26, 1915.

To The Snyder Signal: In your paper of October 29th, 1915, published an article about a rural line subscriber trying to get a doctor, but could not get central, there was some criticism in this article placing the blame on the operators.

I am a subscriber on the same line with the party who tried to get central as the above article stated and I positively know that the line was in trouble, being broken down and grounded. I have had occasion to use the telephone quite a lot both local and long distance and have always been treated courteously and all of my calls have been handled with promptness.

Am sure it is unjust to criticize the operators when these complaints

come from the rural lines as the lines are owned and maintained by the rural line subscribers.

Yours very respectfully,

E. H. KIMBLE.
