CURE OF THE TOBACCO HABIT.

This Young Man Relieved His Cravings by Smoking Common Mistle.

One of the Shore Line trains was coming up from New York, says the Boston Herald. A young man entered the smoking car at New London, pulled a book from his grip and a T. D. from his pocket, filled the T. D., lighted it and settled comfortably into his seat for the journey.

Pretty soon a pleasant aromatic odor began to pervade the car in its vicinity. It had a suggestion of eucalyptus, but was not eucalyptus. There was a hint of sweet fern, yet it was different.

The drummers who were playing whist in the opposite seats sniffed the air and looked about; so did the old gentleman in the seat in front of the youth with the T. D.

By and by the old gentleman turned around and said: "I beg your pardon, young man, but may I ask what you are smoking?"

The young man smiled. "I am trying to break myself of smoking," he said. "My sweetheart objects to tobacco. She doesn't care how much I smoke if I let her great weed alone. Now you, as a smoker yourself, know that the principal pleasure of smoking comes from the habit of holding the pipe or cigar in the mouth and seeing the smoke curl away. It is quite as much that as the narcotic effects of the nicotine.

"Well, then, I have that pleasure in smoking this substance. But that is not all. While it has a very pleasant taste and odor, burns freely, soothes the nerves and helps materially any rawness of the throat or bronchial tubes, the peculiar thing about it is that after smoking it a cigar or tobacco in any form tastes so badly that a man positively can't smoke it. That's how I am curing myself of smoking tobacco."

A COMMON GEOGRAPHY.

Scheme for a Uniform Plan to Embrace All Countries.

WASHINGTON, Sept. 17.—The secretary of state has been informed by the Swiss charge d'affaires here that in the session of August 14, 1891, the international congress of geographical sciences, assembled at Berne, announced that it was urgent to elaborate and publish in all civilized countries, bibliographies of geographical sciences following, as far as possible, a uniform plan, and that the best methods of realizing this project would be to institute in each country a central commission, to which the work should be entrusted.

The directing committee of congress has charged the central commission of "Swiss Geographic Bibliography" to take the necessary steps for carrying out the wish expressed and to give to the resolution the widest possible publicity. As the geographical publications are scattered and incompletely catalogued at present, it is impossible to collect them for study.

LEMON JUICE A PREVENTIVE.

It Knocks the Bacilli Sillily—A Generous Gift From New York Fruit Dealers for Victims. NEW YORK, Sept. 17.—The importers and dealers in Mediterranean fruit held a meeting Thursday. The chairman, Mr. Hirzel, stated that the object of the call was to contribute a sufficient quantity of lemons to the cholera patients leading physicians.

On motion of Anthony Zucca, the dealers and the importers decided to contribute 100 boxes of the finest Messina lemons, which were sent to quarantine Friday morning. Chevalier Louis Contien, the president, read a communication from Dr. Christmas of the Pasteur college. Dr. Christmas says: "To render in time of cholera the use of unboiled drinking water harmless lemon juice is recommended. Acids are detrimental to cholera bacillus."

Dr. Christmas found that nine grains of acid of lemon used in water of the Paris aqueducts rendered within a quarter of an hour all the cholera bacillus harmless. Nine grains of said acid destroys in the same amount of water all the bacillus of typhus. Two grains of acid of lemon added to a quart of water is sufficient to make drinking water totally harmless.

In Indiana the percentage of those who can not speak English is 26.10; in Illinois, 30.24; in Michigan, 27.99; in Wisconsin, 42.23, and in Minnesota, 34.26.

The Inoculation Test.

NEW YORK, Sept. 17.—The Herald's inoculation cholera correspondent has left Paris for Hamburg. This is his statement before leaving: "I feel perfectly well from two inoculations with the exception of a tenderness and a certain pricking over portions of my body where the inoculation has spread. I go to Hamburg with the sole idea of testing Haffkine's cholera preventive. I go with the full knowledge and assent of Drs. Pasteur and Haffkine. Both have assured me that they will watch with the utmost interest the result of my experiences."

MANIAC'S DEED.

The Terrible Discovery Made By a Small Boy.

J. Van Meter, an Ohio Maniac, Kills His Wife and Child.

Their Heads Crushed and Bodies Mutilated in a Horrible Manner—The Murderer Missing, and the Finding of His Dead Body is Expected.

WAVERLY, O., Sept. 17.—A shocking tragedy, presumably the work of a maniac, occurred near Idaho in the western part of this county Thursday night. In this locality lived John J. Van Meter, a man about 35 years of age, with his wife and two children, the oldest boy about 8 years, and the youngest a baby in its mother's arms.

For some time Van Meter has shown evidences of mental derangement, but nothing serious was apprehended by his family or neighbors. Thursday night the family retired as usual, but when the eldest boy awoke Friday morning he was dumfounded to find himself alone in the house, his parents and baby sister having disappeared during the night.

After waiting a while for them to return the boy started to go to his grandfathers, about a mile distant. When about one hundred yards from the house he was horrified to find his mother and little sister lying dead in his path, their heads crushed and bodies terribly mutilated.

The terrified boy soon alarmed the neighbors, who at once instituted a search for Van Meter, but without success. It is thought that after murdering his wife and child Van Meter sought some out of the way place and took his own life. It may be some time before his body is found, if such is the case.

WAR PROBABLE.

Two Hostile Forces of the Choctaw Nation Which May Renew the Conflict at Any Moment.

SOUTH McALLISTER, I. T., Sept. 17.—Dark and ominous clouds are rising over the entire Choctaw nation. Intense excitement prevails everywhere. The agreement which was signed by prominent leaders of both parties has been rescinded, and war is liable to break out at a moment's notice. Both parties are continually receiving reinforcements, despite Tuesday's agreement to disarm and disperse. A party from the Jackson faction is encamped near, while one from the opposite side is within shooting distance of them. The United States troops garrisoned at Ft. Reno have been placed at the disposal of Indian Agent Bennett by Assistant Adjutant General McKeener. Mr. Bennett has not as yet succeeded in his mission to restore peace. The bone of contention now is the disposition to be made of the fifteen prisoners who are held for the killing of four men Saturday. They are in the hands of their friends who propose to hold them for trial, but will not deliver them to the governors. It has been suggested that this controversy may be settled by delivering them to the federal jail at Ft. Smith, for safe-keeping, until they may receive proper trial. Unless some arrangement can be effected within the twenty-four hours, it is feared that the two parties will meet in mortal combat.

TRAMP ARRESTED.

He Begged at the Door of a Woman Whose Mother He Had Killed—Recognized. PADUCAH, Ky., Sept. 17.—A. W. Dorsey has been arrested in Metropolis charged with assaulting and causing the death of Mrs. Cynthia Henderson, of Lovelaceville, Ky., in 1884. Dorsey lived neighbor to Mrs. Henderson, and assaulted her and then robbed her. He was arrested, but before he was jailed escaped. Since then until he appeared at Metropolis he has been at large. As a tramp he went to the house of a daughter of Mrs. Henderson, and she recognized him and held him with a revolver until officers were called. Witnesses to the assault still live, and Dorsey will be convicted, if not mobbed. His deed was a most fiendish one, as Mrs. Henderson was 80 years old. His arrest has created excitement in his old home.

Shot by a Cripple.

BELFAST, Me., Sept. 17.—A double tragedy occurred in Belmont, about five miles from this city. Samuel A. Moody, a cripple, living with his sister near Johnson's Corner, Belmont, shot and killed Fannie Belle Nichols, aged 23, and then shot himself. LOTTERY COMPANY'S OFFER

To the Legislature for a Reasonable Franchise to Operate in That Country.

HONOLULU, Sept. 17.—The Hawaiian lottery has presented itself for passage favor here, and a bill was read in the legislature, August 30, granting an exclusive franchise to D. H. Cross, of Chicago; W. H. Davenport, of St. Louis, and John Phillips, J. J. Williams and Dr. Gilbert Foote, of Honolulu, to establish a lottery in Honolulu for a term of twenty-five years. The company is to pay for the franchise \$300,000 each year, in quarterly installments, the minister of the interior to disburse this sum for the following purposes: Ocean cable between Honolulu and any port on the North American continent connecting with the American telegraph system, \$100,000 per annum; a subsidy for the construction of a railroad around the island of Oahu, \$50,000 per annum; a subsidy for a railroad through Hilo and Hamakua, Hawaii, \$50,000 per annum; roads, bridges, landings and wharves in the Hawaiian kingdom, \$175,000 per annum; improving Honolulu harbor, \$50,000 per annum; encouragement to industries in the kingdom, \$50,000 per annum.

If, however, the reciprocity treaty with the United States is abrogated the last two items are to be applied to building dry docks. The last item is \$25,000 for the encouragement of tourist travel and immigration. The capital stock of the company is fixed at \$5,000,000, 50,000 shares, which may be increased to \$10,000,000. The bill provides two commissioners shall be appointed by the queen, on a salary of \$6,000 a year, to preside at all drawings of lottery. The grantees are to be exempted from all taxes and license fees, and to have the use of the Hawaiian mails. The bill has caused much discussion, and, though there is strong opposition, present appearances are in favor of the passage of the bill.

HE WAS TOO THIN.

The Reason Given By Mrs. Stern For Leaving Her Mate.

NEW YORK, Sept. 17.—Joseph Stern, a tailor, at No. 103 First avenue, applied to Justice Mays for the arrest of a woman who he said was his wife, but who, he said had been married to Charles Wirth, a baker, at Bayonne, by Rev. Mr. Andre, on May 8. Stern told a rather strange story. He said, he said, in 1888, he married the woman he now wants arrested. He says that after they came to this country his wife found fault with him because he wasn't fat enough to suit her. Taking advantage of his absence in Philadelphia, she fled to Morrisiana, where she married a man named Greter. Tiring of him after a while, she left him and went to Bayonne. All the evidence he had was a photograph, which he said was a picture of his wife. He had been told that it resembled the woman in Bayonne. Mrs. Wirth denied Stern's story, and her husband became security for her appearance when wanted, which will be when Stern gives some evidence to prove his story.

She has broken the record in the way of child bearing, and recently gave birth to six baby boys. They weigh from four and a half to nine pounds, and all are alive. Mrs. Billings is a woman of medium stature, 37 years old, and has four other children, but they were all born singly. Billings depends on wild game, fish, etc., for a living, but since the arrival of the sextette has been accepting congratulations and donations extended by rural hospitality.
