

LARGEST IN THE CITY.

Purely Business!

The columns of a newspaper represent a cash value. No publisher can afford to give advertising notices free any more than a merchant can toss over his counter free gifts of dry goods or shoes.

The Continued Calls

upon THE LEDGER for free notices have become so burdensome that we are forced to publish the following terms:

For Notices of Suppers,

excursions, fairs, or other public entertainments where a fee is charged, and for ordinary notices, resolutions of respect, &c., THE LEDGER will charge FIVE CENTS A LINE, and hereafter this will be the invariable rule.

Does Not Include

notices of Lodge meetings or Church services, which must not exceed ten lines.

Avoidance of Disputes.

Misunderstandings are unpleasant. The rate for Business Local in THE LEDGER is 10 cents a line for the first insertion and 5 cents a line for subsequent insertions. A customer orders a five-line local inserted in the paper. "I'll tell you when to take it out," he says to the bookkeeper. But he forgets all about it. The notice runs for two months—32 times—the bill is \$13.20.

All matter for publication must be handed in before 9 o'clock in the morning of each day.

A special from Flemingsburg says "Tom Calvert was arrested here Monday on a charge of burning his crop of tobacco in the barn. An insurance detective made the arrest." Yes; but he was arrested last Saturday instead of Monday, and officer Frank Purnell of this city is the "insurance detective" who made the arrest. With these trifling exceptions the "special" is all right.

The French say "it is the impossible that happens." This has proved to be the case with the Mount Lebanon Shakers. The whole scientific world has been laboring to cure dyspepsia, but every effort seemed to meet with defeat. The suffering from stomach troubles has become almost universal. Multitudes have no desire for food, and that which they do eat causes them pain and distress. Sleepless nights are the rule and not the exception, and thousands of sufferers have become discouraged.

The Shakers of Mount Lebanon recently came to the front with their new Digestive Cordial, which contains not only a food already digested, but is a digester of food.

It promptly relieves nearly all forms of indigestion. Ask your druggist for one of their books.

The reader of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHERRY & CO., Toledo, O. Sold by Druggists, 75 cents.

A trench has been cut in the channel of the Big Sandy river beneath the C. and O. Railroad bridge to allow the water to all flow through in one cut. This is to afford sufficient water to allow the passage of pushboats that alone for several months have been the only craft to penetrate the stream.

The Central Methodist of Catlettsburg, that has lately been taking the lead in the argument for a lock and dam system for the Big Sandy river, presents the following interesting figures of the business done on that stream: "The Big Sandy, including Levisa and Tug Forks, is navigable for 212 miles for about half of each year. For the year ending December 31st, 1893, 297,800 tons of freight were brought out of that stream. The total amount appropriated by Congress for the improvement of the main river is \$310,000, with \$23,250 for the Levisa Fork and \$23,250 for the Tug Fork, making a total for the main river and both forks of \$356,500. Kentucky river, with a tonnage of \$350,817 tons, has had appropriated by Congress \$1,408,000—more than four times as much as the Big Sandy, when its tonnage exceeds that of the Big Sandy by only 53,017 tons. With a tonnage almost equal, the appropriations have been unequal. Let our business men look into this matter."

"THAT'S WHAT!"

HOW THE "A. P. A." SWEEPED THE WHOLE PLATTER CLEAN.

Suggestions to Some People Who Think It a Crime For a Man to Be an American and a Protestant.

Some of the secret workings of the A. P. A. in connection with the recent elections are disclosed by Mr. A. T. Boyer, Editor of The United American, a publication devoted to the interests of the organization.

ONE THING.

"There is one thing," said Mr. Boyer, "that was proved by yesterday's election, and that was the influence and solidity of the A. P. A. There never had been a time in the history of the organization when it has taken such a prominent part in politics and with such pronounced success. Wherever the association put forth its power it carried the day, and there is no use in wasting time picking out local issues to account for that general landslide."

MASSACHUSETTS.

"Take the state of Massachusetts for example. There, of the two candidates, Greenhalge and Williams, the A. P. A. had nothing serious against either one of them. The members, as a rule, followed their personal preference at the polls, but many preferred Greenhalge, and the result speaks for itself."

IN OHIO.

"In Ohio the A. P. A. favored Bushnell, and our members were instructed to vote solidly for him, and with an organization of 75,000 men it is easy to see what happened Tuesday and how it came to pass. Campbell is a good man, but he is not in such close touch with the A. P. A. as is Bushnell, who has a very warm feeling for the organization and has virtually indorsed its principles. He got a rousing big majority, just as did McKinley, who was also friendly to the association."

BUT IT WAS IN KENTUCKY.

"But it was in Kentucky that the A. P. A. scored its grandest victory. There is a membership in that state of 50,000. It is absurd to mention Carlisle, Blackburn, the Tariff or any other feature as a cause for Republican success. The truth of the matter is that the Democratic platform contained a plank denouncing the A. P. A., and, furthermore, they placed some Roman Catholics on the ticket. Any man may become a member of the association, providing he pledges himself never to vote for a Catholic. Now, in Kentucky, and in the Southern States generally, where the Democratic party prevails, the majority of our members are Democrats, just as in the Northern states the majority are Republicans, but they are expected to put the principles of the association above party affiliations. "The Republican platform in Kentucky did not attack us, although they did not in so many words indorse our principles, and the result was that our association voted the Republican ticket solidly. That is the secret of the whole matter. "In Maryland there was no really American issue at stake, and it cannot be said that any victory was scored there, for the reason that there was no fight of any importance in which we took part."

HOW TO PREVENT CROUP.

Some Reading That Will Prove Interesting to Young Mothers—How to Guard Against the Disease.

Croup is a terror to young mothers, and to post them concerning the cause—its symptoms and treatment—is the object of this item. The origin of croup is a common cold. Children who are subject to it take cold very easily and croup is almost sure to follow. The first symptom is hoarseness; this is followed by a peculiar rough cough, which is easily recognized and will never be forgotten by one who has heard it. The time to act is when the child first becomes hoarse. If Chamberlain's Cough Remedy is freely given all tendency to croup will soon disappear. Even after the croupy cough has developed it will prevent the attack. There is no danger in giving this remedy, for it contains nothing injurious. For sale by J. James Wood, Druggist.
