Happy days on the Mississippi, which will entertain you for awhile.

THE RIVER IS FALLING.

A Decline of Several Inches at This Point During the Night.

The end of the present freshet has arrived at last.

It came in yesterday evening.

And it was a very welcome visitor, too.

The fall will be slow at the start, but as soon as it gets a good one it will go down in a hurry.

Yesterday the marks on the Government gauge were covered very slowly until the water reached 54.1, and there it hung until the top had concluded to start toward the bottom.

At 7 o'clock this morning the gauge stood 53.9, a fall of 2 inches.

The cold air on the water early in the morning caused a dense vapor to arise from the river up to about 8 o'clock yesterday morning, and it was almost impossible to distinguish objects on the Ohio shore.

The steamers had a tough time of it Monday night and all day yesterday. The towboat Dave Wood with a big tow was compelled to tie up above the mouth of Limestone creek all day, and the steamer Virginia, after breasting the storm, was compelled to make the run from Ironton to this city without being able to make a landing, and considerable freight was put off here to be reshipped to Portsmouth, Vanceburg, Concord, Rome and Manchester when she arrived yesterday afternoon.

And now comes the worst part of the freshet, the cleaning out of the mud and slime that is left by the falling water.

The weather for today is promised to be continued cold, and no prediction is made for tomorrow, but as a low barometer and a rising temperature are headed this way from the Northwest we'll bet a copper cent that was in the Opera-house fire to one with a hole in it that it rains or snows.

However, we cheerfully say "don't see" to the departing freshet.

Ray's Cough Syrup is guaranteed to cure.

For Sale—Tobacco Fertilizer and Seed Oats. T. J. Winter & Co.

Thomas Shipp, formerly of Millersburg, died at Winchester this week, aged about 80.

We have on hand several cars of Kanawha Crushed Coke which is giving splendid satisfaction to all who have used it.

The funeral of Mrs. P. M. McCarthey will take place this afternoon at 2 o'clock from the family residence, 125 East Second street, with services by the Rev. W. W. Hall. Friends of the family invited. The remains will be interred in the Maysville Cemetery.

THE YOUNG MEN.

What the Maysville Y. M. C. A. Is Doing For Their Betterment.

Seven spirited young men met in the Association Rooms Monday evening for the purpose of organizing a Y. M. C. A. Wheel Club.

A temporary organization was effected with Mr. T. Reed Chubb Chairman. Committees necessary to launching the permanent organization were appointed and date for next meeting decided upon.

It is thought that this will become one of the most attractive features of the Association and quite a large membership is already assured.

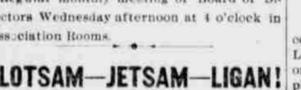

It is likely that a uniform will be adopted. It is probable that arrangements will be made for storing the wheels in the building during the summer months. The Association will seek to provide every convenience of the modern wheel club if the membership warrants. The shower baths will ever be in readiness for the men as they come in hot and tired from long runs.

The next meeting will be held in the Rooms Friday evening, March 10th, at 7 o'clock, and all men interested in cycling are cordially invited to attend.

Regular monthly meeting of Board of Directors Wednesday afternoon at 4 o'clock in Association Rooms.

FLOTSAM—JETSAM—LIGAN!

NEWSY NOTES FROM NATURE'S GREAT HIGHWAY.

The high winds on the river yesterday made navigation extremely dangerous.

The towboat Mariner Saturday ran through her machinery near Powhatan and is going to Pittsburgh on one engine.

The Joe B. Williams was inspected at New Orleans yesterday, found o. k., and left for Pittsburgh with a big tow of empties.

The Bostona has been floated off the Cincinnati Marine Ways by the flood, but will be put back on the cradles as soon as the river begins to fall.

William Ketchum is making a trip as chief engineer on the Queen City. Willard Alexander has taken a position as engineer at the Ashland Steel Works at Ashland.

The Ohio River boats are experiencing trouble. No towboats could depart from Pittsburgh on account of the high water and no coal shipments will be made until today, when the river will have fallen to a normal height.

The Queen City met with a slight mishap at the Ceredo bridge. In attempting to get through she knocked some of the fancy work of her pilot house. She laid up at Gallipolis, being unable to get under the Pt. Pleasant bridge.

The rate under the C. and O. Railroad tracks along Front street have been playing dodge with the dogs and rocks for several days. The high water ran them out of their holes, only to run into the jaws of a vicious dog or to run against a big rock from the hands of a small boy.

Judge Thompson has decided the celebrated Longfellow case at Cincinnati. Commodore Laidley had been sued for about \$60,000 damages on account of the sinking of the Longfellow, and Judge Thompson decided that Commodore Laidley was not liable except for the value of the wreck of the steamboat.

The Nisbet was unable to get under the Ceredo bridge Monday morning, and Commodore Laidley ordered her to exchange trips with the Urania which was on her way to Cincinnati. The Urania then returned to Pomeroy and the Nisbet went back to Cincinnati. She passed on her regular time last evening for all up-river points.

The amendment to the libel laws covering inland waters of the United States was also passed by Congress. Heretofore any member of a crew of a boat could attach the steamer for wages and tie it up at almost any port along the river. This cannot be done hereafter. Boat owners, however, must file a bond at the port in which the boat is entered to protect crews for any claims for wages that may be entered.

The high water did considerable damage along the Kanawha River. It rose to the height of 22 feet at Raymond City, and, besides flooding the Marmet-Smith Company's big store and a number of their houses, tore away their company's coal tipples. It is said that another tippie floated against the Raymond tippie and knocked it off its foundation. The Winfred Company lost its coal tippie, ten barges and its docks, and the Black Cat tippie was also carried away. No estimate of the losses could be made.
