

Some New Arithmetic.
Detroit Free Press.

It is twenty-six rods from Smith's house to the saloon where he takes a nip six morning per week. In fifteen years how far has he walked?

If a college student tears down two signs, upsets four ash barrels, rips up five rods of sidewalk, breaks the windows and mashes the Professor of Latin all in one week, how would a charge of bird-shot effect his sacred constitution the following Monday night when girdling shadetrees?

A wise Arabian, who had \$13 in his vest pocket, wanted to divide it among five beggars so as to give each one \$3. How did he proceed? [This is the one that always kept the boy after school and gets his jacket dusted.]

How many boys three feet tall will it take to climb over a wall five feet high and carry off half a bushel of harvest apples? This must be figured by the rule of three—two boys and the old man's dog.

During a courtship of three years a young man writes his girl 472 love letters, calls her an angel 1,481 times, accompanies her to twenty-eight pic-nics and seventy-two singing schools, and then walks off on his ear and marries a widow with six children. Find how much the girl loses, providing she lights on the right kind of a lawyer to move a jury.

A peasant who had half a cord of wood at his door desired his five sons to saw it up in such ratio that the eldest should saw three-sevenths and the youngest one-sixth. How did they divide the wood? [Key: For the teacher only: They let the old man saw it, of course.]

The average woman speaks 142 words per minute. In a conversation lasting sixteen minutes a servant girl with her ear at the key-hole catches 356 words. How many does she miss, and how did she get that black eye?

If it takes a boy 12 years of age twenty-two minutes to bring in six small sticks of wood, how long will it take him to walk a mile and a half to see a circus procession?

A fond husband hands his wife \$20 with which to purchase a spring bonnet and—well, we don't remember the rest of it. He probably died soon after handing over the money, or she discovered that the twenty was a counterfeit, or something or other happened to cut the thing short. Come to think of it a fond husband bought himself a \$50 overcoat and gave his wife twelve shillings to get her fall hat clapped over for winter, and she thanked him kindly, and he smiled lovingly, and the mother-in-law went and hanged herself in the woodhouse.

A Son of Texas.
Galveston News.

"How is your son coming on?"
"Oh I am having a power of trouble with him."
"What's the matter now?"
"Well, you know I couldn't send him to school, because, thanks to Gov. Roberts, there are no free schools, and I could not afford to send him to a private school."
"Yes, I know that is so."
"Well, I sent him away from Galveston out to the frontier, and as luck would have it, he was convicted of horse stealing, and got five years in the penitentiary."
"That was bad."
"No, it wasn't for you see at the penitentiary he could learn a trade and become a useful citizen."
"Well, that's good."
"No, it isn't for Gov. Roberts has pardoned him on account of his youth and ignorance."

COUNTY POINTS.

STONE LICK.
Rebecca King is very ill at present. Sickness is still prevalent in this vicinity. Will Darnell has completed his dwelling, which he will soon occupy. Quite an interesting sermon by Rev. Wood, was appreciated by a large audience Sunday. Why was it that young gent took a certain lady but half way on Saturday eve? Echo answers why. Miss Wilcox's spring school opened April 3d. Her pupils were glad to welcome her again. Miss Kate Ellis, of Adams county, O., is the guest of her friend, Miss Annie Darnall. We have no wedding to report this week as our vicinity contains but few young ladies and "O, those bashful boys." BUTTERFLY.

A remarkable rough diamond has been lately brought into England from India. It is a pure blue-white stone, weighing sixty-seven carats, in form nearly a drop, and when cut and polished would be about the size of the Sancy diamond. The surface is slightly indented, but there are no marks of cleavage. The value of this precious stone is estimated at \$175,000.

BATCHELDER'S
Ventilated Egg Case.

Patented February 15, 1881.
Indispensable to Merchants Shippers And Producers.

The outside frame of this carrier contains five trays, held in place by fasteners at end of case, as seen in cut. These Trays are constructed in reversible halves. The above cut shows one whole tray filled ready to be placed in case, each egg resting in its cardboard socket in such a manner as to be readily counted, candled, or transferred from tray to tray, or case to case, without rehandling.
For cold storage this case will store 60 dozen with racks made to receive the half trays, hence this is the cheapest storage case manufactured, saving largely in space.
The manner of holding the eggs on end prevents oscillation, adding, or breakage, and adds greatly to their freshness when carried long in storage. Size of 30 dozen No. 1 cases 25x12x14, weighs 20 pounds.

PRICES IN CHICAGO.
Shipper's No. 1, 30 doz. Case with Filler complete 65 Cents.
Farmer's No. 1, 18 doz. Case with Filler complete, 55 Cents.
Cardboard Filler for refilling 20 Cents.
15 per cent. discount on lots of 100 cases.
Batchelder's Egg Tester, 1 string 6 doz. at once, saves to buyers many times its cost each season. Price \$3.00.

By special arrangements made by the manufacturers of this case most Railroads will receive them as fourth class freight.
The 18 dozen case made especially for Farmers' use, sent to any address by express, with out nailing, with full directions for setting up, on receipt of 50 cents. Every Farmer and consumer should have one of these cases, it will save its cost every month. Agents wanted in every county. Address,
J. H. BATCHELDER,
(In ordering mention this paper.)
125-5nd&w 69 South Water St., Chicago.
