

DID NOT AMEND LONGWORTH ACT

Senate Turns Down Hamilton County Delegation.

PUT UP A HARD FIGHT

Hawkins Bill to Re-establish Dana Law Advanced on House Calendar. Senate Tinkering With Ritter Penitentiary Measure Not Appreciated by House and It Is Sent to Conference—Wire Tampering Bill Passed by Lower Branch of Assembly.

Columbus, O., March 6.—Senators Baker, Bader and Johnson, the Hamilton county delegation in the upper body of the assembly, saw their favorite bill go down to defeat. It was a proposed amendment to the Longworth law, establishing bond limits for cities. It raised the limit up to which bonds may be issued without an election from 4 to 6 per cent, and was intended to permit Cincinnati to eliminate some dangerous grade crossings, to build a new house of refuge and hospital, to establish parks and reconstruct an antiquated sewer system which has outlived its usefulness.

The calendar committee of the house advanced on the calendar the Hawkins bill, designed to re-establish in Ohio the old Dana law. This measure was passed by practical politicians a number of years ago and was designed to prevent fusion. It forbade the appearance of a candidate's name more than once on a ballot.

The Gillette bill increasing the salary of county recorders, which passed the senate two weeks ago, and against which a strong fight has been made, along with two bills to extend the terms of county auditors and clerks, has a good place on the calendar and may come to a vote in the house before adjournment.

The house adopted the resolution of Senator Tuttle, which went through the upper house a few days ago, authorizing the appointment of a commission to devise plans for the celebration of the centennial of Columbus in 1912.

When the Ritter penitentiary rebuilding bill came back to the house from the senate the house refused to concur in the amendments. Exception was not taken particularly to the amendment providing that the work of reconstruction should be placed in the hands of the board of managers instead of a special commission, but to the amendment providing for a new woman's prison opposite the present structure. The house members favor repairing the present women's department to last until such time as an entirely new women's prison on a site far removed from men can be constructed. The prison bill will be turned over to a conference committee, comprising Senators Lawyer, Huffman and Patterson, Representatives Ritter, Bowersox and Finley.

The senate passed several house bills, including the Norris bill, authorizing the appointment of two high school inspectors; Calvey bill, forbidding the employment of women about dust-making machinery; the Tuttle bill, legalizing industrial schools. The house passed the Hawkins bill, forbidding interference with telegraph and telephone wires.

BALTIMORE STORMBOUND

Depends on Wireless For Communication With Outside World.

Baltimore, March 6.—Practically isolated from the outside world, save by flickering wireless communication and belated trains, Baltimore made every effort to bring order out of chaos. The storm that brought havoc in its wake gave place to clear skies and cool, bracing air.

Hundreds of telegraph and telephone wires not only in the city but for a long distance in many directions lay on the ground, trains ran in and out of the city without orders, and city traffic was generally impeded. Gangs of workmen throughout the storm area worked all day in an effort to secure temporary service.

King Edward Goes to Biarritz.

London, March 5.—King Edward left this city for Biarritz. The special train on which he was traveling was delayed for half an hour at Bickley, about 10 miles out of London, owing to interruption of traffic caused by a collision of two passenger trains at Tix Tunbridge, in which two persons were killed. The special went on to Dover over another line.

Favors Later Inauguration.

Washington, March 6.—Speaker Cannon of the house declared himself in favor of changing the date of the presidential inauguration from March 4 to May 1, and added that as one representative in congress he would lend his aid in any effort to bring this about.

Grain Company Fails.

Kansas City, Mo., March 6.—The Christie Grain company of Kansas City, Kan., has failed. Judge Fisher of the Wyandotte county district court appointed W. M. Whitelaw as receiver for the firm. The liabilities will reach about \$125,000.

HOUSE IN SOUTH PARK BURNED

Residence of Hiram Glass Totally Destroyed—Carried \$400 Insurance.

The residence of Hiram Glass in South Park was destroyed by fire at ten o'clock Friday night. The fire originated from a lamp exploding in the residence room of Mr. Glass and had gained considerable headway before the fire department was notified. The fire made an unusually bright light and from a distance it looked as though the entire South Park was afire. After a few moments of work the department had the fire under control though the house is a total loss. The loss is about eight hundred dollars, with four hundred dollars insurance.

As the wagons were leaving the house, Steve Botto, a fireman, while attempting to catch the ladder wagon was thrown to the ground and the hind wheels of the wagon ran over his right leg and he had to be carried to his room. Medical aid was secured and the wounds dressed. His right ankle is badly bruised and the flesh all ground off. His knee is also badly bruised and cut. The physician in attendance has not yet been able to tell whether any bones are broken or not, although he stated that he feared it would be some time before Mr. Botto could leave his room.

The fire in the Glass residence seemed to be out when the department returned to the engine house, but later in the night the house again blazed out and the fire department was again called, which made the fourth call the department had Friday, which is a rare occurrence.

CITY ATTORNEY ENTERTAINMENT ON THE LIGHTS AT HIGH SCHOOL

Mr. Haggard Tells Rates the Electric Light Company May Charge the Citizens.

For some time there has been requests made by some of the citizens to City Attorney Haggard, regarding the prices charged by the Winchester Railway, Light and Ice Company for their lights. City Attorney Haggard has investigated the matter and has sent out the following letter:

Dear Sir and Friend:—Upon investigation I find that under the franchise of the Winchester Railway, Light and Ice Company, they have no right to require a citizen to use a meter unless more than 20 per cent of the lights furnished are used after midnight. The rates which they may charge per month for residence lights are as follows: One light, 16 candle power, 65 cents; five lights, 40 cents each; ten lights, 30 cents each; each additional light over ten, 25 cents.

If the customer so desires he may require the company to furnish a meter in which case the rates shall be so fixed that the customer shall not be required to pay more than one-half a cent per hour for the time the light is used, but in this case he will be required to pay as much as one dollar per month.

There is a clause in the contract which permits the company to require customers to use a meter when it appears that the customer is burning a greater proportion of lights after midnight than 20 per cent or is unnecessarily using current. I am of the opinion that you can require the company to furnish you with light at a flat rate.

Yours truly, F. H. HAGGARD, City Attorney.
