## Good Roads for Telephone Talk

THE good roads movement has not been confined to the highways.

The Bell Telephone system has covered the country with "good roads" for telephone talk, reaching every nook and corner.

There are more than 12,000,000 miles of these "good roads" in the Bell system. Some of them are strung in single pairs or in aerial cables from pole to pole; others are hidden away in underground conduits; they reach the heart of each industrial and commercial center of the nation and to the most remote habitations.

These "good telephone roads" of the Bell system, all operated by one system, under one policy, forming one continuous system of intercommunication, connect more than 7,500,000 telephones for universal service.
