Work on the preparation for the Grand Conclave, is progressing rapidly. GIVES DETAILS OF CERTIFICATION

State Superintendent Writes To Supt. Edwards Of Plans For Teaching Applicants

County Superintendent of Schools Ben F. Edwards, has received a letter from the State Superintendent regarding certification and qualification of applicants for teachers' certificates. It gives much important information for those who are planning to go into this work. The letter reads as follows:

April 10, 1920

My dear Superintendent:

Just a word about certification and qualification of applicants for certificates. All questions for all examinations will be prepared by the State Board of Examiners and sent to the county superintendents under the usual restrictions. The papers when answered are sent to this office for grading. Papers are to be designated by numbers so that those grading the papers here will have nothing to govern them except a number. The superintendents, of course, will send to this department the names of the applicants corresponding to the numbers. Examinations for white and colored teachers will be held the same day and not separately as heretofore. White teachers will be examined in one room and colored in another, but on the same day and on the same subject and using the same questions.

The fee to be paid by each applicant is \$2.00. These fees shall be forwarded to the State Superintendent. The two county examiners shall be allowed \$4.00 per day for their services. These fees shall be paid by the State Superintendent out of the fees that are sent to him by the county superintendents.

All certificates are of state rank. There shall be four grades of certificates issued to teachers of common schools:

- (a) Teacher's Diploma.
- (b) State Teacher's Certificate.
- (c) Elementary Certificate of the first grade.
- (d) Elementary Certificate of the second grade.

An elementary certificate of the first grade requires an average grade of 85 per cent upon all subjects in the common school course and upon the science and art of teaching including the State Course of Study for Elementary Schools. The lowest grade on any subject shall not be less than 70 per cent. This certificate is valid for four years.

An elementary certificate of the second grade shall be on the same subjects as an elementary certificate of the first grade and shall require an average of 75 per cent upon all subjects with not less than 60 per cent on any subject. This certificate shall be valid for two years and shall not be issued twice to the same person. Any holder of such certificates can teach in any county in the state.

The requirements for the State Certificate and the State Diploma remain as heretofore. No teacher now holding a State Diploma, State Teacher's Certificate or a county certificate is required to be re-examined until the expiration of such certificate.

After July 1, 1922, applicants for elementary certificates shall have had at least one year of high school work or its equivalent and in addition thereto, five weeks' study of professional subjects in a State Normal school or some other training school recognized by the State Board of Education.

After July 1, 1924, such applicants shall have had two years' high school work or its equivalent and in addition thereto, ten weeks' study or professional work in a Normal school, as aforesaid.

After July 1, 1926, such applicants shall have had four years' high school work or its equivalent and in addition thereto twenty weeks' study in a Normal school, as aforesaid.

All examinations for county school diploma shall be conducted by the county board of examiners. This is made a county function entirely, subject only to the approval of the State Superintendent. You will notice that no radical changes are contemplated in the requirements for teachers within the next two years. The
