# BIDS WANTED!

Bids will be received until 2 p. m., October 12, 1921, by Mr. John Howard Payne, Clerk of the Board of Education, Richmond, Ky., at the office of John Noland, on a twenty room school building. A certified check or preliminary bond of 5 percent must accompany the bid. Plans can be procured from C. C. and E. A. Weber, Architects, Third and Walnut street, Cincinnati, Ohio.

In response to the inquiry of many telephone subscribers: "What can I do to help my service?" this advertisement is published.

## The Right Way Saves Annoyance

There are two ways to call a telephone number.

The wrong way is to call from memory; to "take a chance," to trust to luck that your memory doesn't play a trick on you, with the fickle figures in a telephone number.

The right way is to consult the Telephone Directory before calling and make sure you have the right number.

The right way saves annoyance to yourself and to the persons you might have called by mistake. It helps build up a higher grade of service for yourself and others. It eliminates useless calls which hamper service.

## RED CROSS WORKING FOR HEALTHIER U. S.

Thousands Aided by Instruction in Care of the Sick, Food Selection and First Aid.

How the American Red Cross guides thousands of persons to health is shown in a summary of the society's activities in the health field based upon the annual report for the last fiscal year. Through its Nursing Service, its Home Hygiene and Care of the Sick courses, nutrition classes, First Aid classes, Life-Saving classes and Health Centers and in numerous other ways designed to acquaint masses of citizens with proper methods of living, the Red Cross carried its message of health into all parts of the country.

The work of the Red Cross during the war in its traditional field of nursing, furnishing the military and naval establishments of the nation with 12,577 nurses, is well known. And there are today 87,787 nurses registered with the American Red Cross and subject to call in emergency. During the fiscal year, 1,551 Red Cross nurses were accepted for assignment to Government service, 389 by the Army and Navy and 1,162 by the United States Public Health Service.

In addition to the nurses enrolled by the Red Cross for Government service, the Red Cross itself employed a total of 1,548 public health nurses in the United States and 10,000 in foreign service.

Home Hygiene and Care of the Sick classes, giving thorough instruction in the proper care of the sick in instances where the illness is not so serious as to require professional nursing care, during the fiscal year numbered 5,178. A statistical picture of the Red Cross operations in this field follows:

New classes formed during year..... 5,178  
Classes completed during year..... 4,290  
New students enrolled..... 101,000  
Students completing course..... 72,400

What the Red Cross accomplishes in giving proper instruction through its Nutrition Service is indicated by the following table:

New classes formed during year..... 1,100  
Classes completed during year..... 1,380  
New students enrolled..... 2,341  
Students completing course..... 2,910

In addition to the above, a total of 25,000 children were given instruction in the proper selection and preparation of foods.

Through its 200 Health Centers, the Red Cross reached 20,252 persons; these Health Centers, 4,202 health centers were given and 780 health exhibits held.

In the United States last year, 70,432 persons were killed and 3,000,000 injured in industrial accidents. To prevent this enormous waste the Red Cross held 3,100 first aid classes with a total of 104,000 students enrolled.

## RED CROSS RESCUED 600,000 FROM DEATH

Spent \$1,200,000 for Relief of Famine Sufferers in China Last Year.

To help overcome conditions of acute distress in five famine-stricken provinces of Northern China, where millions of persons were affected by an unprecedented shortage of food, the American Red Cross during the last fiscal year spent more than \$1,200,000, \$1,000,000 of which was contributed directly by National Headquarters and the remainder by various groups interested in the welfare of China.

Through the wide relief operations thus made possible it is estimated that more than 600,000 famine sufferers were saved from starvation.

To the end that similar prompt relief measures by the organization may always be possible the Red Cross is asking continued support by the American people by universal renewal of membership at the Annual Red Cross Roll Call, November 11 to 24.

The method of relief employed by the American Red Cross in its operations in China was particularly effective, for in addition to saving hundreds of thousands of lives it provided China with more than 900 miles of permanent roads that are sorely needed to prevent a recurrence of famine. At one time the Red Cross employed 74,000 Chinese workmen, paying them in food for themselves and dependents, this food being brought in from Manchuria and elsewhere.

## 850 DISASTER DEATH TOLL FOR ONE YEAR

Red Cross Gives \$1,871,000 Relief When 65,000 Families Are Made Homeless.

Forty-three disasters, resulting in the death in the United States of 850 persons and the injury of 2,500 called for emergency relief measures and the expenditure of \$1,871,000 by the American Red Cross during the fiscal year ending June 30, 1921, says an announcement based upon the forthcoming annual report of the Red Cross. These disasters caused property damage estimated at \$80,000,000, affected sixty-seven communities and rendered 65,000 families homeless.

The year's disasters were of varying types, including several which previously had not been thought of as falling within that classification. The Red Cross furnished relief in seventeen fires of magnitude fire floods, seven tornadoes or cyclones, one devastating storm, three epidemics, including the one in Wall Street; one building accident, two typhoid epidemics, the most serious being that at Salem, Ohio, which affected 9 per cent of the population; one smallpox epidemic, in the month of July; one train wreck, the one at Tulsa, Okla.; the famine in China emergency relief in famine among the Indians of Alaska, the grasshopper plague in North Dakota and an earth quake in Italy.

**Pueblo, Most Serious**  
By far the most severe of the disasters in the United States during the period covered by the Red Cross report was the Pueblo flood early in June, 1921. The rehabilitation problem confronting the Red Cross in Pueblo was one of the most difficult in recent years. When the first news of the horror was flashed throughout the country, the American Red Cross National Headquarters responded with a grant of \$103,000 for relief work. Governor Shoup of Colorado, appreciating the long and successful experience of the Red Cross in organizing disaster relief work, placed the entire responsibility for the administration of relief in its hands.

In response to appeals from President Harding, Governor Shoup and through local chapters of the Red Cross and other community organizations, public-spirited citizens brought the total contributed for Pueblo's rehabilitation to more than \$325,000.

The terrible havoc wrought by the flood, which was a matter of record, more than 2,500 homes were affected, 21,735 persons were left homeless. Estimates of \$500,000 as an absolute minimum for rehabilitation were made by Red Cross officials in charge of relief work.

**Fast Work in Wall Street**  
The Wall Street explosion was notable in that relief workers of the Red Cross were on the scene twenty minutes after the disaster occurred. The race riot at Tulsa also was unique in disaster relief annals in that outside of a small emergency relief fund contributed by the Red Cross, the only relief measures outside the city consisted of the service of social workers, nurses and a trained executive whose object was to assist local forces in directing their own efforts.

In decided contrast with the previous year, only one tornado assumed the proportions of a major disaster. This occurred on April 15, in the border sections of Texas and Arkansas, with the city of Texarkana as the center. The significant feature of this disaster relief work was the fact that it covered so much rural territory as to make necessary a large number of relief workers.

The famine in China, necessitating relief expenditures totalling more than \$1,000,000 by the American Red Cross was by far the most serious of the foreign disasters in which the Red Cross gave aid.

**Builds Up Its Machinery**  
In connection with the administration of disaster relief measures, an increasing effectiveness on the part of the Red Cross in dealing with emergencies was manifested during the past year. In 325 Chapters of the American Red Cross there have been formed special committees to survey the resources of their respective communities and to be prepared in case of disaster. In other of the 3,402 active Chapters, a network of communication has been formed through which instantaneous relief may be dispatched to any part of the United States.

The work in this field may be continued with ever greater effectiveness, the American Red Cross is appealing for widespread renewal of membership during its Annual Roll Call, to be conducted this year from November 11 to 24.

## LIFE-SAVING CORPS ENROLLMENT 10,000

Growth of Red Cross Life Saving Corps throughout the country continued unabated during the last fiscal year, a summary of the year's achievements by that Red Cross Service shows. There are now 100 Corps with a total membership of more than 10,000 members, of which 1,276 are sufficiently skilled in the work to act as examiners. Among the outstanding achievements of the Red Cross in this field during the last year was the organization at the United States Naval Academy, Annapolis, of what is perhaps the largest life saving corps in the world.

Mrs. Hite Adams, 62, is dead at Nicholasville.

## FARMERS SHOULD DELAY WHEAT SOWING

Delaying the sowing of wheat until after the Hessian flies have made their appearance or until after the dates shown on the map is the surest way that farmers in Madison and surrounding counties have of preventing injury to their crops by these pests, according to a warning issued by Harrison Garman, entomologist at the Kentucky Agricultural Experiment Station. Investigations have shown that as a general rule Oct. 5 is a safe date for sowing in this section, according to Mr. Garman. Sowing should be done as soon as possible after that date in order to give the grain a start before winter arrives.

According to entomologists, the flies come out as adults during September and lay their eggs on the young plants, the damage being done in the fall by the insects which hatch. These young become the fly-seed stage of the pest later in the season and remain in this condition on the wheat plants until the following spring when a new brood does additional damage. If the sowing is delayed until after the safe date no damage will be done since the flies will have disappeared before the wheat gets above the ground.

Some eggs may be placed on volunteer wheat and for this reason plants of this kind should be destroyed in order to prevent damage. It is necessary for all wheat growers to delay sowing until after the safe date if injury is to be prevented in the entire community since the young flies may spread from infested fields in the spring, Mr. Garman said.

Fertilizing all wheat land outside of the blue grass area with some phosphate fertilizer at the rate of 200 pounds an acre of acid phosphate or basic slag or 100 to 150 pounds of steamed bone meal which should be drilled in with the seed by means of a fertilizer attachment will be found helpful in obtaining a good stand of wheat, according to specialists at the station.

## Extra Comfort—Extra Values

When you lay down your good money for a Sedan you expect—and you are entitled to—extra comfort.

Long experience specializing in enclosed models has enabled Paige to produce cars of this type in which fundamentals of design, including such engineering features as spring suspension, give the Paige an ease of riding that can not be excelled.

Thanks to these basic principles, to an exclusive power plant that eliminates vibration and responds with marvelous flexibility, and to the best appointments that money can buy, the extra comfort the Paige 6-66 seven-passenger Sedan offers is beyond price.

All Paige enclosed models, whether built on the larger 6-66 chassis or the 6-44 chassis, are the finest combinations of comfort and mechanical efficiency for year-around family service now available.

The buyer of these enclosed models is guaranteed advantages which can not be matched elsewhere at any price. We suggest you confirm these statements for yourself by accepting a demonstration.

List prices of Paige Cars range from \$1635 to \$4030
