MAKES JUSTICE BLUSH.

It is such proceedings and decisions as that in the Coleman case in the Police Court that causes Judge Lynch to take an inning.

Coleman was guilty of a felony requiring his being held for the grand jury, or he was not guilty and should have been dismissed.

And, by the way, a Judge should be above "roasting" newspapers—it savors of gutter politics.

JEALOUS OF UNCLE SAM.

The real animus and jealousy of England toward the United States is frequently manifested despite the effusive flattery of the Government officials and press.

England not only has no love for the American Government or people, but of late years has come to regard the Americans as her chief rivals in trade and recently in diplomatic matters.

You will not learn this from the partisan political newspapers, but from the non-partisan commercial sources which care nothing about political parties and give the facts as they are with an eye solely to business.

any English firm could guarantee to do it. Other railroads are to be built and equipped in Africa by English companies, and an American firm has put in a bid to build the road, supplying all material, engines, cars, depots, in fact everything, and guaranteeing to finish the work complete for operation in a time so limited as to take away the breath of would-be English competitors.

This has raised a storm of protest among iron mill and machinery manufacturers in England, who insist that the Government having borne the expense and the English people sacrificed their lives in war to acquire this territory, they should be given the work of building the railroads and developing the country.

England furnishes the coal to Europe and other parts of the world. The American coal operators are bidding for this, and though the cost of shipment yet gives the English a fraction the advantage, the American by improved and time-saving facilities will overcome this and be delivering coal even in England cheaper and of better quality.

And the latest. Since the beginning of the use of tin the world had to rely on the Welsh and other sections of British territory for tin, even though they manufactured tin plate.

"Not satisfied with having despoiled Wales of its former exclusive market for tin plate in the United States, through the operation of the protective tariff, the American mills are now about to capture the domestic trade.

Marcus Daly, who died in New York, is another illustration of what an Irishman may become

when given a chance. By his death the country loses an honest and enterprising citizen. Born in Ireland and coming to this country a poor boy, by his integrity and zeal, fortified by a Christian life and undeniable devotion to his church, he became one of the most prominent and wealthy men of the United States.

The daily papers are now mentioning their favorites for office at the next city election, but we fail to notice the names of any of our many prominent Irish-American citizens.

Louisville sustained a serious loss in the death of Col. William D. Ray, who was one of its most enterprising and public-spirited citizens.
