**ANNOUNCEMENTS**

We are authorized to announce Hon. Harvey Heim a candidate to succeed himself in Congress, subject to the action of the Democratic party.

There is a general complaint about the high prices of the necessities of life and it seems to us the core of the whole matter lies in several causes combined. The growth of population which is simply another name for increased consumption, has over taken production of food supplies in the way of cereals and meats and as the converging lines of production and consumption approaches each other prices must advance. It is simply the law of supply and demand interferred with to some extent by tariff, by attempts more or less successful upon the part of enterprising and sometimes unscrupulous dealers to control the supply. The exports of our grains were 72 per cent less in 1908 than in 1909. If population on consumption increase in the future as rapidly as they have done the last few years and production per acre of our farms is not greatly increased by 1915 this country will have ceased to be a food producing nation and within ten years we will be importing more grain and more meat per annum than we have ever exported in any year of our history. So in that case well may we consider this high cost of living—No doubt if any country in the whole world except the U. S. in natural fertility of soil or has a more favorable climate, but with our careless, unimproved methods of seed-selection, fertilization and cultivation, our farms produce an annual yield of less than 14 bushels of wheat as compared with 32 bushels in England, 28 bushels in Germany, 34 in N. Ireland, and 20 in France, also Germany with an area somewhat less than some of our states produce more than seven times the number of bushels of potatoes than are produced in all the U. S. and potatoes are a staple food for the poor man, it behooves us as a nation to cultivate our soil more scientifically and were it done our agricultural products could be more than doubled. Horace Greeley said that one acre of productive soil properly used would be sufficient for the support of one man and five acres would be enough for a family so farmers of today, let it not be your aim to cultivate as many acres as possible but to get as much out of each acre as possible not forgetting that the cheapest and best is always to preserve the fertility of your soil.

It is conceded by all fair minded persons that a telephone regulation bill should have been passed ten years ago, yet each legislature has failed to enact such legislation and the present one has killed the Newcomb measure, placing the telephones of the State under the jurisdiction of the State Railroad Commission. Such actions are outrageous and can be described as nothing more or less. The people must be at the mercy of the telephone companies of the State, and pay such prices as they demand, with no tribunal to whom they can appeal for relief. It requires no argument to show that they should be regulated; all that is necessary is for the voters to refuse to elect in the future, any man who will not pledge his ef-

**Did You Know?**

That the crossing in front of the Christian church has been raised about five inches and that our thanks are due the street committee.  
 That Mr. G. S. Greenleaf is the right man in the right place.  
 That work with the new road machines will begin about the first of April.  
 That every land owner along the turnpikes should contribute a few rods.  
 That they are figuring on using about 50 rods to the mile.  
 That if they do our public highways will be like boulevards.  
 That more sheep have been killed by worthless dogs already this year than was ever known.  
 That the valuation of these sheep is far in excess of the money to be derived from the dog tax.  
 That the sheriff is not doing his duty if he fails to kill the dogs that are not listed.  
 That it is a penalty and you are subject to a fine if you fail to list your dogs.  
 That some people say it was a mistake to remove the two electric lights from the park.  
 That there is talk of removing the one from the depot.  
 That something we are all interested in, comes up before the City council next meeting night.  
 That the new bowling alley is almost completed and will be the best in the State.  
 That some people say that quite a deal of gambling is going on not a stones throw from the park.  
 That Brother Brown is giving us some fine sermons every night at the Presbyterian church.  
 That his audience Sunday night was a very large one.  
 That every farmer that hasn't a tobacco barn will build one this year.  
 That a loose leaf house will be in operation this fall on the distillery property.  
 That it will be a great help to the farmers of this county.  
 That they should show their appreciation by patronizing it.  
 That Lancaster will have the best fair this year in the history of the Association.

**Curious Method of Churning.**  
 Lady Brassey, in her "Voyage of the Sunbeam," describes a curious method of making butter. On the South American pampas, she says, the milk is put into a goatskin bottle, which is tied by a long rope to the saddle of the farmer, who gallops his horse until the jolting on the ground has churned the milk effectively.

**Fortunate Man Was Wise.**  
 Willy—You see, it was this way. They were all three as dead in love with her and all so eligible, that to settle the matter she agreed to marry the one who could guess the nearest to her age. Arthur—And did she? Willy—I don't know. I know that she married the one who guessed the lowest.—Life.
