

Last Notice To TAX PAYERS

Under the new revenue law, the Sheriff is bound to have his Quietus before he can receive tax book for 1912, so all delinquents please call and pay at once. Don't delay but call at our office TO-DAY.

G. T. BALLARD,
SHERIFF GARRARD COUNTY.

ITCH! ITCH! ITCH!

Scratch and rub-rub and scratch—until you feel as if you could almost tear the burning skin from your body—until it seems as if you could no longer endure these endless days of awful torture—these terrible nights of sleepless agony.

Then—a few drops of D. D. D., the famous Itchoma Specific and, OUI! who relief! The Itch goes instantly! Out and rest at last!

D. D. D. is a simple external wash that cleanses and soothes the inflamed skin as nothing else can. A recognized specific for Eczema, Psoriasis, Itch or any other skin trouble.

We can give you a full size lot of the genuine D. D. D. remedy for \$1.00 and if the very first bottle fails to give relief it will not cost you cent.

We also can give you a sample bottle for 25 cents. Why suffer another day when you can get D. D. D.?

R. E. McRoberts & Son

See any of BAILEY'S

Black Star COAL?

It's worth a look, its MORE than worth the price—nothing like it in town Don't buy it if you are afraid of a "spoiled" cook.

H. C. BAILEY.

FARMER'S COLUMN

space below this heading is for the exclusive use of our farmer subscribers, and is for the sale of stock, grain and such things on farm as the farmer cannot afford to advertise. No notice will be accepted over four lines, and will be only in two issues of the Record, free of charge.

Mr. Wm. Eason had a horse to die last week.

Robert Burton sold to Ison Bros. of Burgin a saddle horse for \$135.

Nice cottage and five rooms for rent at Lowell, see Sam C. Henderson.

Mr. A. R. Denny sold a pair of two year old mules to Mr. Baird for \$265.

Mr. Lewis Murphey bought of Mr. Thos. Hicks a bunch of heifers at \$20. per head.

W. B. Burton bought of Chas. Kerns of Perryville a four year old harness mare for \$125.

Charles Rogers of Paint Lick sold a combined five year old horse to W. B. Burton for \$130.

W. B. Burton sold to M. Lauber of Richmond Va. 28 mules at an average price of \$185. per head.

During the recent cold weather, Mr. Fletcher Ison had the misfortune to lose a jenet and colt, also a cow.

FOR SALE:—or will feed seven hundred shooks of fodder and 2 or 3, big straw ricks. J. B. Leavell, Bryantsville, Ky.

Monday was a good court day in point of the number of stock on the market and people in town. There were a great many mules and plug horses here and everyone was anxious to sell, the scarcity and high price of feed forcing them on the market, but there were few buyers and consequently but few changed hands.

That Kentucky will be released from quarantine, with the National Government has placed on sheep in this State by March 1st, is now certain. Dr. A. J. Payne, of the United States Government, who has charge of a corps of government inspectors at work in this State, stated recently that a re-inspection of the sheep infected with scabies would be started Feb. 1st, and that by March 1st, he thought nearly every county in the state would be released from the government quarantine.

W. B. Barton went over to Lexington last week and bought of Charley Thompson eleven mules, he selected this number from a large number which Mr. Thompson had on hand, they were unusually fine animals and Mr. Barton paid \$220. per head for them. Mr. Barton shipped on Monday a car load of mules consisting of 22 head to Wilson Live Stock Co. at Wilson N. C., the bunch having cost him on an average of \$210. per head. The Lexington purchase was included in this shipment.

Saved Two Lives.

"Neither my sister nor myself might be living to-day, if it had not been for Dr. King's New Discovery," writes A. D. McDonald of Fayetteville, N. C. R. F. D. No. 8 "For we both had frightful coughs that no other remedy could help. We were told my sister had consumption. She was very weak and had night sweats but your wonderful medicine completely cured us both. It's the best I ever used or heard of." For sore lungs, coughs, colds, hemorrhage, lagrippe, asthma, hay fever, croup, whooping cough, all bronchial troubles, its supreme. Trial bottle free, 50c and \$1.00. Guaranteed by R. E. McRoberts & Son.

Law's Dictum.

"Citizens eligible by law to vote—white men, black men, red men, drunks, men, deaf men, dumb men, lame men, sick men, rag men, bad men; citizens ineligible by law to vote—militars, idiots, insane, criminals women."—Bertha Knobe

Pale Faces

Pale-faced, weak, and shaky women—who suffer every day with womanly weakness—need the help of a gentle tonic, with a building action on the womanly system. If you are weak—you need Cardui, the woman's tonic, because Cardui will act directly on the cause of your trouble. Cardui has a record of more than 50 years of success. It must be good.

Take CARDUI

The Woman's Tonic

Mrs. Effie Graham, of Willard, Ky., says: "I was so weak I could hardly go. I suffered, nearly every month, for 3 years. When I began to take Cardui, my back hurt awfully. I only weighed 99 pounds. Not long after, I weighed 115. Now, I do all my work, and am in good health." Begin taking Cardui, today.

THE HOUSEWIFE CAN THANK HER LUCKY STARS THAT THE SUGAR TRUST DID NOT GET ITS JACKSACKS UNDER PRICES WHEN SHE WAS CANNING STRAWBERRIES IN JUNE.

While the practice of getting manure from most any place is commendable, it is a good idea to see to it that fertilizer is not spread on the land which contains the seed of noxious, perennial weeds, such as quack grass.

It does not require a great stretch of imagination to foresee the time when moving pictures will be used as a regular adjunct in the teaching of geography, natural history and some other branches in which individual pictures are already a great aid.

A London physician recently drank a glass of Thames river water said to have contained 250,000,000 typhoid fever germs, but did not seem to suffer any ill effects from it. The layman would be pardoned for the inference that immunity from the disease may have been due to an overdose.

A point decidedly in favor of the silo is its capacity for holding large amounts of fodder in a limited area. A silo having a size of 14 by 30 feet will receive into its capacious maw all the way from fifteen to twenty acres of corn, depending, of course, on the size and stand. In this one point of economy in storage space the silo is worthy of consideration.

Some medical authorities still stoutly maintain that bovine tuberculosis is not transferable to human beings, but even more authorities contend that it is and point to numerous instances where the milk from tubercular cows has caused the disease in those drinking it. The individual has the choice of holding whichever view he pleases, but if he is sensible he will err on the safe side.

The several railroads running through the western counties of Kansas have offered to transport seed wheat to the farmers there free of charge in order to help them out of the straits into which they have been forced as a result of the protracted drought. As a further aid bankers and others are loaning on easy terms money with which the seed wheat may be purchased.

In some localities it has been found that Canada thistles multiply only by the root system and not by seed. This seems to be due in part at least to the fact that there are two types of plants, one bearing male or staminate blossoms and the other female or pistillate. Neither type will produce seed by itself, and the pistillate blossoms will do so only when there are staminate blossoms near by to fertilize them.

Were the facts known doubtless many a mysterious barn burning might be traced to spontaneous combustion of mows of clover hay stored away without proper curing. In such cases the fire is the result of a fermenting chemical reaction similar to that which takes place in a manure pile. A close watch should be kept on all mows of clover hay where there is a possibility that such a condition might exist.

The close of the present summer season has served to emphasize more clearly than ever the damage to apple-trees and fruit—as a result of infection with spores of the cedar rust. Unfortunately one of the most highly prized of all our fall apples, the Wealthy, seems for some reason or another to be peculiarly susceptible to damage by the rust. Some trees we have noticed during the past few weeks have been well defoliated through infection of the leaves with numerous rust spots, while as a result of this unhealthy condition of the leaves or lungs of the tree the fruit is not more than one-third of its usual size, and scrawny and diseased at that. It is time to look as though, if the owners of Wealthy orchards don't "do" the cedars in the vicinity or spray very carefully, the cedar rust will "do" their orchards. If the rust infestation is as much worse next year than this, as this year's was than last year's, thousands of trees will perish. The problem is one that every orchard owner should look into carefully.

The law has much good sense to commend it which has recently been enacted in some states, whereby the tuition of country pupils attending nearby town schools is met by the school district in which they live and not by the individual parent or guardian, as heretofore. This arrangement makes possible a fuller utilization of the advantages of good town schools and relieves the country taxpayer of the double tax which he has heretofore paid in the support of the country school and tuition in the town school for those of his children who attended.

Death in Roaring Fire may not result from the work of fire-bugs, but often severe burns are caused that makes a quick need for Bucklen's Arnica Salve, the quickest, surest cure for burns, wounds, bruises, boils, sores. It soothes and heals. Drives off skin eruptions, ulcers or piles. Only 25c at R. E. McRoberts & Son. 1m

The postoffice department is hot on the trail of a lot of Florida real estate swindlers on the ground that they have been using the mails to defraud. Pity they did not get after the sharks in this and some other states six or eight years ago, but investors should feel gratitude that the department has got action even at the eleventh hour.

Constalks add considerably to the soil in way of humus, which tends to improve its physical condition, but their value in this regard is far less than their value as a ration for dairy cows and steers when cut at the proper time, properly cured and fed. More than this, all the fertilizing value the stalks had is preserved in the manure which accumulates when they are fed.

The growers of timothy are in "clover" this year, due to the fact that they are receiving all the way from \$10 to \$13 per hundred for their seed. The shortage, due to the past summer's drought, is responsible for the high prices. In several instances we have noted lately that a crop of timothy seed alone is netting owners from \$20 to \$30 per acre.

On most farms perhaps the lighter fowls, such as Leghorns, are kept, there being plenty of ranges for them and opportunity to pick up much food by foraging. However, others keep heavy breeds, like the Brahmas, and are equally satisfied with them. They contend that they are better winter layers, while the cockerels marketed at five months old fetch 50 instead of 30 cents apiece.

What is said to be the most massive tree (not the tallest) in the world stands in the church-yard at Milta, Mexico. It is a true tree and has a circumference of 145 feet. A strange thing about the tree is that its circumference has not increased perceptibly in the past 200 years. Its age is placed at several thousand years. The tree shows signs of decline and decay, but special care is being taken to perpetuate it if possible.

The exhibitors of beef breeds made at state fairs within the past few weeks simply emphasize the need of such changes in the rules of judging beef cattle as will make it possible for their owners to show them in normal and breeding condition rather than in that demanded for "fat steers." It is high time that the fellows most interested—those who have valuable animals virtually ruined by getting them over-fat for exhibition—registered a kick so loud that it would be heard distinctly by those having cattle exhibitions in charge.

Perhaps there is no single phase of buttermaking, aside from the utmost cleanliness of all utensils used in the handling of milk, cream and butter, that is so important as the simple matter of cooling all cream before it is added to the cream supply already on hand. The reason for this is that if warm cream is added to the cold there is set up at once a rapid souring and ripening process that is very detrimental to butter quality if it occurs any considerable time before churning. Every buttermaker knows this as a first principle, the A or B of his business. Every farmer should remember it.

Sugar is now \$8 per hundredweight in New York city and on the climb. While it is the contention of the trust that this high price is due to a big shortage in the world's crop, it is contended by others who claim to know that there has never been a larger amount of sugar afloat in the channels of trade than now. The buyers are the subtlest of men, and the trust has us all on the hip and is making hay while the sun shines—for fines exacted from it in recent government suits and for a nest egg against the rainy day of prospective tariff revision. But, whatever the causes, the holdup is making political gunpowder and dynamite faster than any mill ever put in operation.

Mr. and Mrs. J. D. Carter and child ren were the guest of Mr. and Mrs. C. S. Roof and family Sunday.

Mr. I. C. Lane the new merchant has about completed his new dwelling house and is ready to move into it.

Mr. C. S. Robinson who was building a new residence but on account of cold weather waited till spring to finish and rented property near the oil well.

Mr. Cash Kinard was found dead below the Eph Mason place Friday morning in the road near Fall Lick was supposed to be froze to death he was buried in the Paint Lick cemetery Sunday.

COLDS VANISH.

The Sensible Overnight Remedy For Sensible People.

After you have upset your stomach with pills, powders and vile nostrums and still retain possession of that terrible cold, do what thousands of sensible people are doing. Do this:

Into a bowl three quarters full of boiling water pour a scant teaspoonful of HYOMEI (pronounce it High-o-me) cover head and bowl with a towel and breathe for five minutes the soothing, healing vapor that arises.

Then go to bed and awake with a clear head in the morning. HYOMEI does not contain opium, cocaine or any harmful drug. A bottle of HYOMEI Inhalant costs 50 cents at R. E. McRoberts & Son and druggists everywhere—Guaranteed for catarrh, asthma, croup and catarrhal discharges.

Grandfather's Clock.

(By G. M. Hendren, M. D.)

It's standing yet against the wall, Grandfather's clock, so grim and tall. It's "tick, tick" measures o'er and o'er.

Departing time just as of yore, As to and fro the pendulum.
