The Velvet tin is twice as big as shown here

"No Rheumatics" is a Mighty Poor Reason for Wearing a Wooden Leg

NO sting or hot burnin' is a mighty weak-kneed recommendation for tobacco. But when tobacco is mild and cool, and yet as full of "fun" as a barrel of monkeys—well, that's another story—that's Velvet.

And 'cause why?

'Cause Velvet is brought up—not jerked up by the hair. It's raised as carefully as a favorite child. It's cured in the big fresh air. And it mellows away for two years in wooden hogsheads 'til it's smooth and rich as cream. The wonder would be if Velvet wasn't a whacking good pipe smoke.

"Let Nature mellow yo' tobacco an' that tobacco will shore mellow yo' nature," says Velvet Joe. And he's pretty nearly right.

NATURE-AGEING in the wood does more to make tobacco friendly than any camouflage you can cover it with—and don't you forget it. See, taste, smell, feel the "real tobaccoess" in Velvet. Why, you can almost hear it. Velvet's the tobacco you can judge with your eyes wide open and specs on.

There's a whole lot in Nature's way of making good tobacco better. And it's all in Velvet.

Here's to a full pipe and a friendly one.

Liggett & Myers Tobacco Co.

THE BLOBE MAN'S DAILY STORY.

James G. Blaine and Neal Dow, although they did not agree in all respects in their views on the temperance question, were, nevertheless, very warm friends. One winter's morning, they were

walking along one of the streets in Portland, when suddenly Mr. Dow stepped on some ice and fell flat. Mr. Blaine, on seeing that Mr. Dow was not hurt, exclaimed, "Ah! The wicked stand in slippery places." "Yes," flashed back Mr. Dow. "I see they do, but I can't."—Boston Globe.

NEW ONE FROM INDIANA.

Mr. Babbage: I am sending 50 cents in stamps. Will you please send me your paper, The Breckenridge News for the next four months, Mrs. Maud Mattingly, Evansville, Ind., General Delivery.

SCHOOL NEWS AND VIEWS

(Continued From Last Week)

Several attempts to organize "Moonlight Schools" have resulted in failure so far as attendance is concerned. A special effort was made at Glen Dean to start a night school. The county superintendent, through the cooperation of the Post Master at that place, secured a special census of those who could not read and write and the local trustee called personally upon almost every one and secured their promise to attend. Miss Nell Moorman, a teacher in the State Normal School at Bowling Green, agreed to give the month of September to the work, but on the night set for the opening only two were present and the next night none. Probably the illiterates think it is not worth the while when even they are earning more than the teachers who propose to teach them. Another attempt will be made at Glen Dean by the teachers there.

How thoroughly do you plan and outline your different lesson assignments from day to day? You are on an examination for a certificate and are asked to "Outline a lesson plan as you would present it to the Sixth Grade Geography." what will you do with that proposition? Must you conjure up an assumed plan and wonder how much of a grade it will get you, or do you have a definite plan in mind that you have used and which you know to be a good one?

Are your pupils between seven and fourteen all in school? If not it is your duty to report them to your trustee and see why they are not in school at least three days in each week. We will never eradicate illiteracy so long as we have half our children of school age out of school for half the term and some even longer.

Teachers should write to John C. Winston Co., Philadelphia, Pa., and ask for the Teachers Manual which is given free to accompany the First and Second Winston Readers. This Manual is so arranged as to be of great help to the teacher, not only in presenting the lesson to the class but as a means of permanent improvement of the teachers ability as a teacher of reading.

This is a splendid time in the year to give practical lessons in Agriculture. Arrange with a near-by farmer to select his seed corn for him, then take your class in Agriculture to the field and select the seed corn from the standing stalks in the field. Give due regard to the size and proportion of the stalk, the height of the ear from the ground, the "Favored Environment" of the stalk, the proximity of barren stalks, the form of the ear, the shape of the grains, and the size of the cob. Make the points plain then ask the pupils to go home and help their fathers select his seed corn for next year in the same way. Any teacher can earn his salary in the district from the increased yield of corn alone, if careful selection is practiced for two or three years, and fall selection of seed introduced.

The tax paid in Breckenridge county for local school purposes amounts to about \$1.35 per child per year. A child who starts to school at six years of age and attends until the age of eighteen would spend twelve years in school. At the present rate the total cost of making an average American citizen of him would be \$16.20. This \$16.20 provides a rural school within the reach of every child, maintains the building, pays a large part of the teachers very poor salary, furnishes all the fuel and other incidentals, and maintains a first class High school free to every child in the county.

Twenty-four took the examination for teachers' certificate in September, and of that number seventeen made passing grades. Nine made First Class and eight made Second Class certificates. Three of the unsuccessful ones failed in Spelling, three in Arithmetic, and one on the General Average.

The Community Club organized by Mr. Chintz Royalty, the teacher in the Kingswood district, has saved to the farmers in that community several hundred dollars in the purchase of Fertilizers alone. The farmers of the community ordered their Fertilizer in car-load lots at a saving of several dollars per ton. You can do the same in your district.

I have mailed to each teacher a copy of a letter sent out by the State Board of Health suggesting precautions against a recurrence of the influenza epidemic. Let me urge that every teacher use his very best efforts to see that the suggestions are complied with. Every suggestion is a good one for the preservation of health even though no epidemic were imminent, and with the experiences of last season fresh in our memory we should let no corrective measure escape untried.

Carey ROLL ROOFINGS

LASTILE—

More Lasting—
More Beautiful—
in every way better than
cheap roll roofing.

The man who wants the best quality that can anywhere be obtained in roll roofing should buy Lastile.

The wool felt used in Lastile is made in Carey's own mill by machinery built specially to produce better roofing felt.

The asphalt used is the greatest waterproofing material ever known.

The surface is genuine crushed slate in the natural red or green color. Of course slate won't burn, that helps to make Lastile more fire-resisting. The color of the slate never fades

and the surface never requires paint. There's both beauty and economy.

Fire underwriters give Lastile a good rating. Contractors find it inexpensive to apply. Owners find it durable and the cheapest in the long run.

Consult us about Lastile and other Carey Building Materials.

Carey Building Materials

- Asbestos Built-Up Roofs
- Fibrock Asbestos Felts
- Asphalt Shingles
- Insulating Papers
- Asbestos Materials
- Asphalt Pitch Wallboard
- Roofing Paints
- Roll Roofings
- Carey Flexible Cement Roofing
- 85% Magnesia Pipe and Boiler Coverings
- Asphalt Built-Up Roofs
- Felted Asphalt Felts
- Damp-Proofing Comp'ds
- Fire Coating for Roofs
- Elastite Expansion Joint

LOUISVILLE
More Than 20 Years Experience

at Bewleyville, reports an average attendance for the first month of 43 with only 51 in the district. This is Miss Payne's fourth year at Bewleyville, and the district is supplementing her salary in order to keep her. If you are out for success, regardless of your employment, you must make your employer want your services, and to do this you must show him that your services are profitable to him. I still believe that any teacher can create such a demand for his services in the district in which he works that the district will not give him up regardless of the salary it takes to keep him. Are you creating a demand for your services?

NOTICE TO ROAD OVERSEERS
It is your duty to report to me by letter or in person any land owners on your section of the road, that has failed to clean out his fence corners on Public Highways as required by Kentucky Statutes. I will expect to hear from you immediately and for you to report all failures.
Any Road Overseer failing to make this report will be subject to a fine for neglecting his duty.
John Bloomer.
